- Products are serviced by only factory certified contractors.
- Eaton generator and transfer switch products are backed by competitive warranties.
- For additional information or to place an order, contact your local Eaton representative or visit us at **www.generators.eaton.com.**

Power. Our lives depend on it.

From everyday necessities like heating, cooling and lights, power outages are occurring more frequently than ever and lasting longer with devastating effects. Eaton carries an extensive line of residential, light commercial standby and portable generators.

Standby Solutions

Eaton's standby generator line includes product, performance, and cost saving benefits that make getting backup power easy, affordable and worry-free. The line up of standby generators range from 8kW – 150kW.

Air Cooled

Features and Benefits:

All units are single phase, operate on natural gas or propane fuel, are field convertible, feature OHVI engines, and quiet sound levels of 66dB or less.

- Units range from 8 – 20kW.
  - 8 and 10kW boast 410cc and 530cc engines.
  - 14, 17 and 20kW offer enough power for whole house comfort.
- Hinged lids and easy to remove access panels to allow best service access in the industry.
- Aluminum enclosures available for coastal applications (17kW optional and 20kW standard).

Liquid Cooled

Features and Benefits:

All units are available in single and three phase options, operate on natural gas or liquid propane fuel.

- Units range from 22 – 150kW.
  - 22kW/27kW/36kW and 48kW provide low speed automotive engines that operate at 1800 RPM.
  - 25kW/30kW/45kW and 60kW provide whole house power protection for larger homes and essential circuit protection for small and medium businesses.
  - 70kW/80kW/100kW/130kW and 150kW provide full power protection for large homes and commercial applications.
- All steel enclosures have a RhinoCoat finish.
- Aluminum enclosures available on selected models.

Automatic Transfer Switches

Features and Benefits:

All units offer the Active Load Control feature allowing the end user to do more with less. (Except for the 50A models).

- Available in 50 – 400 amp models.
- By utilizing the active load control the user can:
  - Save money up front by spending less on a smaller generator.
  - Save money ongoing by consuming less fuel each month.
  - Become more environmentally friendly by decreasing greenhouse gas emissions.
- Universal and can be used with any generator on the market.
- Eaton offers a Generator Ready Loadcenter for new home construction. (See Publication BR00405005E)

Portable Solutions

Eaton's portable generator line offers the perfect solution for home use, camping, construction or outdoor events. The wide range of sizes give the flexibility to choose as much power as needed for any specific application.

Portable Generators

Features and Benefits:

- OHVI engine provides the longest running time in the industry.
- Electric start models include starting battery.
- Never-Flat Wheels and Fold-Down handles provide easy portability.
- Hour meter tracks usage and includes maintenance resets.
- Steel fuel tank includes incorporated fuel gauge.
- Low-Tone muffler provides quiet operation.
- CSA and CA emissions models available.
- Less than 5% Harmonic Distortion allows to run sensitive test equipment.

Manual Transfer Switches, Generator Panels, and Power Inlet Boxes

Features and Benefits:

All units feature premium CH interiors.

- Allow for an affordable option for backup power.
- Contractor friendly construction allows for quick and easy installation.
- Switches and panels feature mechanically interlocked main disconnects to prevent paralleling of normal and emergency power sources.
- Indoor and outdoor designs available.
