

MEM® Memera Consumer Units
and Protective Devices

Cross-reference & price guide

Effective 6 April 2009

EAT-N

Powering Business Worldwide

This UK Price List encompasses both Eaton and MEM products.

Prices contained herein
supersede and take precedence
over all previously published
information, effective for all
goods purchased within the
UK on or after 6th April 2009.

All orders are subject to Terms
and Conditions of Sale.

Consumer Units – Metalclad

1. For Flush Mounted Units – Add F to the end of the reference number e.g. **EAS2F**
2. For Lockable Units – Add L to the end of the reference number e.g. **EAS38L**
3. For Flush Mounted Lockable Units – Add FL to the end of the reference number e.g. **EAS18FL**

Consumer Units – Metalclad

Features & Benefits

Features & Benefits

Features	Benefits	Moulded	Metalclad	Benefit To Whom
Quarter turn, quick release cover fasteners	Saves installation time	✓		Contractor
Takes standard EAD MCBs, RCBOs and other modular devices	Enables stockist to offer complete range of units and associated devices	✓	✓	Distributor
Maximised wiring space for RCBOs when incorporated into the installation	To enable compliance with the 17th Edition wiring regulations	✓		Specifier/Contractor
Modern, stylish aesthetics	Suites with domestic and commercial environments	✓	✓	Specifier/End User
All units are factory assembled to include all the main controlling devices	Saves installation time	✓	✓	Contractor
Removable clip-in earth bar	Gives full access to the base	✓		Contractor
High Quality clear sub circuit identification labels	Enables the installation to be completed professionally with all the appropriate internal warning and circuit identification labels.	✓	✓	Contractor/End User
Modern IP30 robust steel enclosure with ample cable knockouts in top bottom and rear faces	Ideal for both domestic and light commercial applications where a more robust metal enclosure is needed		✓	Specifier/Contractor/End User
Modern IP30 moulded, flexible enclosure with ample cut-outs in top side and rear	Ideal for larger trunking easy cable access	✓		Specifier/Contractor/End User
Attractive modern curved moulded door	Suites with domestic and commercial environments	✓	✓	Specifier/End User
Attractive magnolia and white metal units	Blends with any decor	✓	✓	End User
Full door covers all devices	Lockable version required where safety is an issue		✓	Specifier/Contractor/End User
Available with single or multiple incoming device options as well as the various dual RCD combinations	To enable compliance with the 17th Edition wiring regulations	✓	✓	Specifier/Contractor
The split load and multiple RCD units all feature a variable split design with snappable busbars	Can be configured on site, minimising number of variants to be stocked	✓	✓	Distributor
Dual RCD units incorporating an Isolator Main switch and providing grouped 30mA RCD protection in two zones, can also be configured with high integrity ways fed directly off the Isolator	Ideal for protecting selected circuits with independent RBCOs as well as grouped protection	✓	✓	Specifier/Contractor
Full instructions and a comprehensive labelling kit	Assists with installation of units and devices	✓	✓	Contractor
Units providing additional wiring space for RCBO circuits	Easier to install multiple RCBOs in unit	✓		Specifier/Contractor
Snappable busbar	Easy configuration on site	✓	✓	Contractor
Availability of Factory Built Assemblies	Built to customer requirements	✓	✓	Specifier/Contractor

1. When will I start seeing the new consumer units and devices?

The release for sale is planned during May 2009 when we will have available stocks and all the marketing support material.

2. Will the existing range of Circuit Protection Devices fit into this new consumer unit?

The existing range of Circuit Protection Devices **will not** fit into the new consumer units, as the size profile is different.

3. Will the existing range of Circuit protection devices continue to be available for projects already planned and to serve our installed base?

We forecast significant ongoing demand for the existing product line for sometime into the future and have therefore put in place a manufacturing strategy to meet this demand.

When demand falls we will make it an Aftermarket product and continue to supply spares for many years to come as we have for the Memera 21 devices of some 20 years old vintage.

4. When will we stop supplying the current Memera Consumer Units?

Our plan is to cease manufacturing of the existing Memera Consumer Units in early May 2009 by which time the new products will be available in our distributor supply chain.

5. Will Eaton accept stock returns for Memera products?

There is no reason to return any of the existing Memera range since we are continuing to supply the existing devices to support the range.

Our Distributors already have the ability to return stock under the existing commercial policy.

We anticipate that the levels of returns will be minimal, due to the pull through demand in the market place. We will be working closely with our Distributors to manage the introduction and transition of change to the new range.

6. Why is Eaton changing such a successful range of product?

Memera is regarded as the Benchmark for Consumer Units in the UK and has earned a strong reputation for meeting today's electrical Domestic installation needs.

We do, however, need to maintain a competitive position in the market place and the new consumer unit, which has undergone minimal change can now accommodate alternative devices from Eaton's global manufacturing resources.

7. Where can I get details of this new range?

Log onto: www.eaton.com/uk and click on the Product link for Consumer Units.

Eaton Corporation is a diversified power management company ranked among the largest Fortune 500 companies. Eaton is a global technology leader in electrical components and systems for power quality, distribution and control; hydraulics components, systems and services for industrial and mobile equipment; aerospace fuel, hydraulics and pneumatic systems for commercial and military use; and truck and automotive drivetrain and powertrain systems for performance, fuel economy and safety. For more information, visit www.eaton.com.

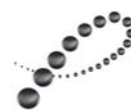

Eaton's electrical business is a global leader in power distribution, power quality, control and industrial automation products and services. Eaton's global electrical product lines, including Cutler-Hammer®, Moeller®, Powerware®, Holec®, MEM®, Santak®, and MGE Office Protection Systems™ provide customer-driven PowerChain Management® solutions to serve the power system needs of the data center, industrial, institutional, government, utility, commercial, residential, and OEM markets worldwide.

PowerChain Management solutions help enterprises achieve sustainability and a competitive advantage through proactive management of the power system as a strategic, integrated asset throughout its life cycle. With Eaton's distribution, control and automation and power quality equipment; full-scale engineering services; and information management systems, the power system is positioned to deliver powerful results: greater reliability, operating cost efficiencies, effective use of capital, enhanced safety, and risk mitigation.
