E·T·N

Powering Business Worldwide

Serving Commercial & U.S. government with quality products & services

Eaton has been providing world-class solutions for technology-intensive environments since 1934 and we've been a GSA Contract vendor for over 35 years.

Support from concept to installation and beyond

Our project management team, which includes a dedicated design team, customer care team and technical sales experts, will see your project through from concept to installation and beyond.

Design and technical expertise

Our design and technical experts will visit you on-site. We do the measuring, inventory your equipment, and determine the requirements necessary to meet your unique needs.

Next, our creative designers develop customized drawings to bring your workspace concepts to life, so you can visualize just how things will look once they are installed in your space.

Certified installation support

Once the design is approved and the products are manufactured to your specifications, our project management team will schedule an installation plan that helps minimize disruption for your staff. Our certified installers arrive to take care of unpacking, assembling and arranging all of the equipment as well as coordinating technical integration with your on-site information systems teams.

Service and support

For continued support, we provide services and extended warranties on all of our products. Simply contact your local Eaton sales representative for assistance.

Complimentary 3-D CAD drawings and color renderings of your proposed solution.

Environmental sustainability

The following items hold the GREENGUARD Certification.*

- OnGuard
- Profile
- LMS
- Tech Bench/Tech Organizer

*The GREENGUARD Certification Program is internationally recognized for evaluating product emissions that meet stringent indoor air quality criteria defined by GREENGUARD Environmental Institute (GEI). Products undergo rigorous, third-party testing to determine their impact on indoor air pollution with requirements for ongoing verification. Certified products are recommended for use by leading sustainable building programs including the U.S. Green Building Council's (USGBC) Leadership in Energy and Environmental Design (LEED) Rating System.

OnGuard

OnGuard Command Console

OnGuard Command Console

Superior performance, less downtime

Eaton's high performance consoles keep your operations running smoothly — day after day, year after year.

The OnGuard™ command console is ideal for a multitude of technology-intensive environments including: public safety answering points (PSAPs), emergency operation centers (EOCs), network operation centers (NOCs), transportation management centers, process control, security and other monitoring and surveillance environments.

Features & benefits

- Large single-surface lift
- Accommodates four to twelve 27" monitors
- Integrated cable lay-in features to help manage cables quickly and easily
- Customizable storage options
- Personal Environment System
- Designed and manufactured in U.S. facilities by tenured craftsmen and engineers
- Durable design withstands the rigors of a 24/7/365 multi-shift environment
- Features all steel construction, heavy-duty lifts and durable finish
- Eaton's portfolio of ePDUs *(Power Distribution Units)*, UPSs *(Uninterruptible Power Supply)*, surge protectors and other power products ensure that your mission-critical operation runs at peak performance

OnGuard command console

OnGuard command console dimensions

	Length (in)	Height (in)	Depth (in)
Small	120.66"	22"*	60.12"
Medium	133.66"	22"*	60.12"
Large	145.66"	22"*	60.12"

*The worksurface height ranges from 22" (lowest) to 47.60" (highest)
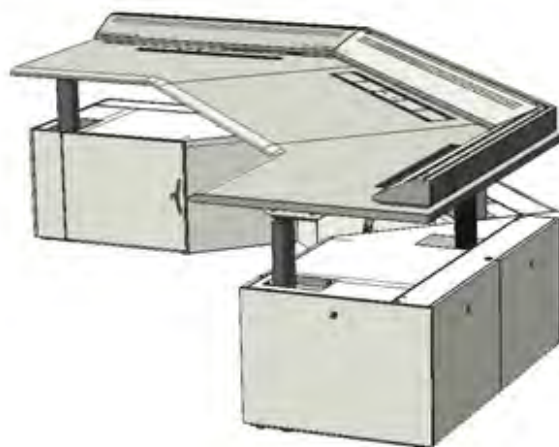

OnGuard

OnGuard Command Console

OnGuard command consoles are designed to handle as few as four monitors and up to as many as twelve 27 inch monitors. The size of the units allow flexibility in monitor layouts as your business and technology changes.

A. TechTrack
Located in the center of the worksurface, the TechTrack is a perfect spot for monitor placement. It houses the air vents for the optional Personal Environment System, and it can accommodate connective accessories such as USB, charging ports or data jacks.

B. TechCurb
Allows for cables to be routed continuously around the perimeter of the workstation. Cables and power are conveniently accessed right at the desktop.

C. Comfort edge
The front of the worksurface has an ergonomic urethane edge for maximum user comfort.

D. Monitor pole track
The monitor pole track (located on the left and right sides of the worksurface), allows for monitor pole mounting based on your design. The patent-pending track facilitates optimal placement, and provides the flexibility to relocate in the future without causing damage to the worksurface.

E. Lift technology
All OnGuard command consoles feature lifts to accommodate the varying heights of operators who share workstations, as well as provide sit-to-stand flexibility for users throughout their shift; promoting a healthier work environment.

F. Steel or laminate base unit panels
OnGuard may be ordered with steel or laminate end and rear panels to complement the design of your work environment.
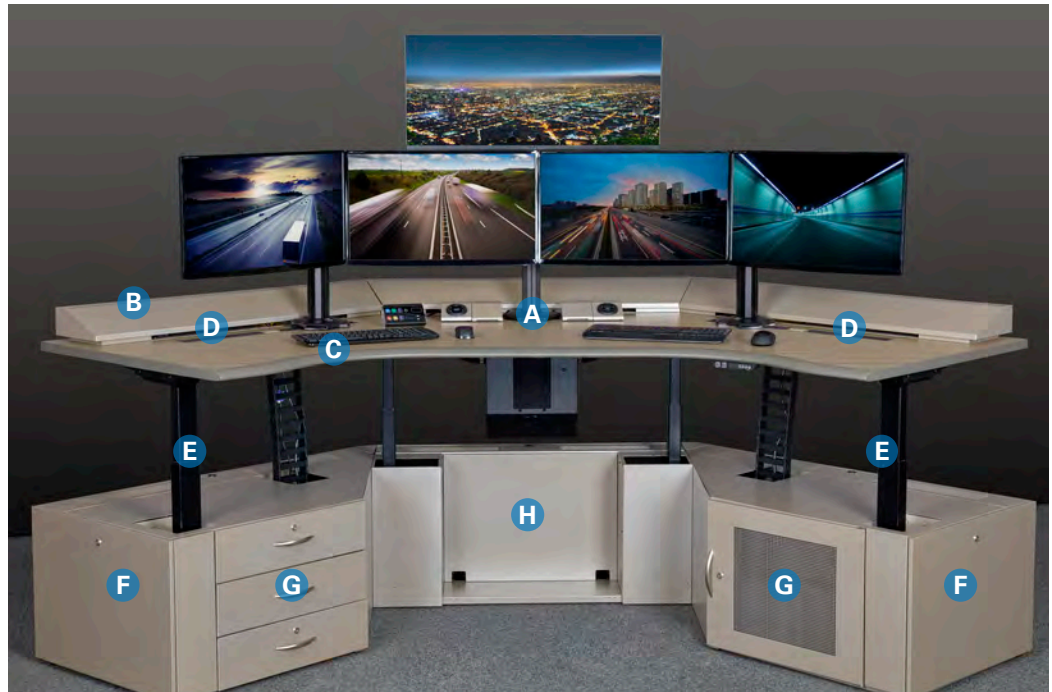

OnGuard Command Console

OnGuard

OnGuard command console – small

Item	Description	Qty.
Configured	**Small OnGuard unit**	
AWS553DRM8F	OnGuard console, 4 monitor wide base unit, steel rear panels, steel end panels, left 3 drawer storage, right rack mount storage, center personal environment storage, Freedom color collection	
KONWLC20B	20" Monitor mounting column & base plate kit	3

Profile Advanced Console System

Profile Advanced Console System

Created specifically for high-density Flat Panel Display (FPD) monitoring applications, the Profile™ Console System features a versatile design that makes it ideal for a multitude of technology-intensive environments, including dispatch centers, network operation centers, medical imaging reading rooms, nurses stations and security stations.

Features & benefits

- Offers advanced technology access and integrated cable management solutions
- Ultra-durable steel frame system designed to withstand the rigors of 7x24 environments
- Sophisticated, ergonomic console solutions that manage the convergence of today's technology and the human interface with which it integrates
- Perfect for applications where sit-to-stand accommodation is desired
- Single and dual electronic height-adjustable solutions, as well as manual height-adjustable keyboard platforms

Profile

FPD integration – aluminum extruded slatwall inserts allow mounting of FPDs and various filing accessories. The slatwall insert includes an easily removable panel to access interior cabling.

Electronic lifting worksurface allows for an ergonomically correct operation. Available in dual or single lift or single lift with manual height-adjustable keyboard platform. Perfect for applications where sit-to-stand accommodation is desired.

High density technology storage featuring ventilation perforations which help increase convection airflow. Front and rear access offers ease of service.

LMS Technical Lab Furniture

LMS Technical Lab Furniture

Eaton's modular LMS™ furniture provides the highly efficient design and configuration capabilities required in today's lab environments. Specializing in the integration of people, technology, workspace and workflow, Eaton's approach to building effective and efficient laboratories encompasses four basic principles:

- Ergonomic workspace
- Modular configuration
- Technology integration
- Vertical space utilization

Computer/graphics stations

TechBench Workbench System

TechBench and TechOrganizer with sit-to-stand features
Built for durability, designed for flexibility

TechBench Workbench System

A Strong, durable, modular steel TechOrganizer allows for a myriad of desktop and overhead storage accessories and options. Helps to keep worksurfaces clear and contributes to proper 'lean' lab management principles.

B Worksurfaces are available in high-pressure laminate, phenolic resin and maple hardwood.

C Integrated modular power and data distribution solutions are available.

Features & benefits

- Strength and durability required in today's instrumentation chemistry applications
- Optional components for space management and storage for analytical instrumentation and supplies
- Flexible solutions for flat panel displays, computers, keyboards, power, and data
- Height configurable from desk to workbench height
- Available in 24" to 96" widths and 30" and 36" worksurface depths
- Multiple worksurface materials are available

TechBench

Linear TechBench (laminate worksurface)

Item	Description
TBLW7236A	72"W x 36"D TechBench with laminate worksurface

Vantage Enclosure System

Features & benifits

Vantage Characteristics
- 12U, 25U, 35U, 40U, 42U, 45U & 50U
- Widths: 24", 27", 30"
- Frame Depths: 25", 31", 36", 42" & 48"
- Full Doors & Split Doors
- 2 Bay - (2) 22Us and 3 Bay (3) 14Us
Colo Options
- 2,000 Weight Capacity
- Ships Fully Assembled

- Fully-perforated doors and top ensure adequate cooling, providing the front-to-back airflow
- A wide variety of components and accessories, the Vantage enclosure can be custom configured to suit your needs.
- Additional security is available by utilizing locks on side panels and front and rear doors.
