Power Xpert® Gateway "Wanna Trade?" Program

Get top-of-the-line network communications at an incredible value.

Powering Business Worldwide

Now is the time to upgrade your network communications devices, providing for faster connection, more log storage capacity, and a greater number of supported parameters (i.e. less connectivity hardware for more connectivity) at an incredible value... **PLUS,** we are offering Power Xpert Software and Power Xpert Reporting at a significant value (if purchased concurrently with a gateway).

How is the Power Xpert Gateway E series better?

The Power Xpert Gateway 400E and 600E contain all the features of the previous series with some significant enhancements:

- **Power Xpert Gateway 400E:** Improved processor, faster system response, increased data transfer rates
- **Power Xpert Gateway 600E:** All improvements to the Power Xpert Gateway 400E plus real-time monitoring of data points and logging of data points at five minute intervals, event logging, and ability to email events

	PXG400 & 600A	New PXG-E
RAM	64 MB	128 MB
Flash Memory	128 MB	1 GB
Max. quantity of supported parameters per gateway	4000	8000

The Power Xpert Gateway 800E is the top-of-the line in connectivity and power and energy monitoring features.

The Power Xpert Gateway 800E provides all the functionality of the Power Xpert Gateway 400E/600E, plus two major features:

- **Custom user views:** allows customization of device data presentation into easy-to-understand web pages. Important device data from one of five preset categories can be presented for any number of configured devices. Information is displayed in chart form with links to device pages and any available trended data. A user-uploaded image can also be displayed with the option to configure and place links to individual device pages or external pages on the image itself.
- **Custom events:** gives you the ability to build a rich assortment of events customized to your specific system configurations. An equation builder is used to build simple or complex equations for a single device's parameters or multiple configured devices.

How does the program work?

We've simplified the process:

1. Place an order with your authorized Eaton Distributor or Representative
2. Include your current gateway's configuration file (via email) with your order. This provides the proof of a qualifying gateway
3. You'll receive a pre-configured (based on the configuration file you provide) E series gateway

It's that easy!

What about the software you mentioned?

Trading in a qualifying Power Xpert Gateway, affords you the opportunity to purchase Eaton's software to monitor and pro-actively manage your entire power and energy system; Power Xpert Software. If you're already experiencing the benefits from Power Xpert Software or Foreseer Software, consider adding Power Xpert Reporting at a great value with your trade.

Adding Power Xpert Software and Power Xpert Reporting allows you to easily aggregate different types of device families' information.

Power Xpert Software provides:

- Ability to monitor the entire facility or power system showing the big picture of power quality and energy usage to pro-actively address issues
- Information to quickly attend to the most important events and identify reliability issues and cost-saving opportunities

Power Xpert Reporting provides:

- Information on power capacity reserves
- Ten report templates addressing various power, energy and green reporting needs
- Insight to locate and proactively manage potential high-power devices to save energy costs

Take advantage of the Power Xpert Energy Viewer

Wrangling all of the data provided by Power Xpert Gateways, Meters and other devices can be a challenge. That's why Eaton developed the free, downloadable Power Xpert Energy Viewer to get you started today! This program allows you to:

- Develop an energy baseline
- Compare energy values over time, month-to-month for example
- Compare two facilities' or devices' energy usage for a given time period
- At-a-glance graphical and tabular reports provide energy usage summaries

The Power Xpert Energy Viewer is a free download available from **www.eaton.com/pxev**

To locate your Eaton representative visit **www.eaton.com/pxg**.
