

Release Notes: VFX Support Package for Pro-FX® Control

Version 1.4.0

VFX Platform Support Package V1.4.0 is a release to provide new features and address issues identified in earlier versions. Eaton recommends all users working with earlier versions of the VFX Support Package update to this latest version.

Installation

Install this package using the Package Manager in Pro-FX Control. Go to Tools->Package Manager, then select Install and browse to the package file. Follow the prompts to complete the installation, and restart Pro-FX Control. This package requires Pro-FX Control 1.3. It can also be used with CODESYS 3.5.5 by following the same process. It is necessary to download new firmware to the VFX prior to downloading new application based on this support package. The firmware same firmware file is used for all VFX variants and can be found at:

C:\Users\Public\Pro-FX\VFX 1.4.0\update.tar.gz

Updates

- Improved Parameter Handler for both HFX and VFX
- VFX72 improved touch performance
- Fix for CODESYS floating point bug on VFX that caused instability in Parabolic Ramp function block
- Video mirroring and rotation on VFX

Known Issues

- None
