Industrial Hose and Tubing Solutions

What can we offer you?

Wide Range of Options
• Compounds: PVC, EPDM, natural rubber, modified vinyl, UHMW, XPE, PPE, and others.
• Variety of reinforcements to give you the exact hose you need for every application: spiral and braid, solid braided, wire braided, wire braided with helical wire.
• Large variety of cover colors.
• Ability to Private Brand.

Markets and Applications
• Dry bulk transfer
• Hot air blower
• High pressure cleaning
• Washdown of food processing plants
• Blasting cleaning
• Sand blast cleaning
• Water suction and discharge
• Transfer of cleaning agents
• Fertilizer and pest control
• Hot tar pumping
• Nitrogen transfer
• Hydrocarbon drain
• Paint spray
• Rotary drilling on-oil rigs
• Fuel oil transfer
• Food & beverage dispensing
• Water and bilge lines
• Transfer of non-dairy products
• Bulk liquid transfer
• Acid & chemical transfer
• Petroleum transfer and miscing
• Tank spinners
• Steam transfer
...and many more!

Reasons to Choose Eaton Industrial Hose
• Eaton Industrial Hose Specialists located at our Central Distribution Center in Cleveland, TN. are ready to assist you with your order.
• Hose qualified with select Eaton couplings provides longer life through matched performance.
• Detailed laylines and custom colors.

It’s a distinct advantage being one of the most experienced hose producers in the market. With over 100 years of manufacturing and research and development, consistency in an ever-evolving marketplace is something we pride ourselves in.
What can we offer you?

It's a distinct advantage being one of the most experienced hose producers in the market. With over 100 years of manufacturing and research and development, consistency in an ever-evolving marketplace is something we pride ourselves in.
Eaton specializes in thermoplastic hose and tubing products that are sold into the industrial, recreation, beverage, and irrigation markets. These thermoplastic hose products are manufactured out of materials such as PVC, polyethylene, nylon, EVA, urethane, and specialized thermoplastic rubber materials including Santoprene. Applications for these products include (but are not exclusive to) air, water, chemical, food and pesticide conveyance. Specialized products, configurations and packaging to meet our customers’ unique requirements are our core competencies.

Thermoplastic products can be constructed to meet FDA, NSF, UL, SAE, MIL-Spec., and various other industry specifications in custom lengths, colors and individualized branding. We offer the lowest minimum run quantities in the business.

These pages show a range of customized products we have created to address the demanding needs of our customers. Read through them and then call us to find out what Eaton’s Industrial Hose and Tubing Solutions can do for you.

**Steam Hose**
Eaton industrial steam hose has many unique features and benefits:
- Our steam hose has a 10 to 1 safety factor
- Chlorobutyl tube for high temperatures
- Engineered system available with our Concord 250 hose and Crimp Wolf Coupling

**Crimp Wolf Coupling**
Engineered system qualified to work with a variety of Eaton Industrial hose, including:
- Concord 250® Steam
- Hydrocarbon Drain
- Hot Tar Pumping
- Hydrocarbon Drain

**Custom Capabilities**

### Size Capabilities
- **Steam Hose:**
  - 0.30” – 2.00” I.D. for non-reinforced tubing
  - 0.125” – 2.00” I.D. for reinforced hose
  - 0.625” – 3.00” I.D. for suction hose
- **Custom Capabilities**
  - 0.490” – 2.80” I.D. for non-reinforced hose
  - 0.625” – 3.88” I.D. for suction hose

### Donovan’s Gamble, Use Royalflex®!

Eliminate scrap and additional coupling costs, with Royalflex’s long, continuous lengths. This kink-resistant hose services many applications:
- Petroleum and chemical transfer
- Pumping, suction and discharge of water and slurries

This state-of-the-art product is only offered through Eaton.

### Hose with a history

Eaton Industrial Hose and Tubing Solutions offer product reliability, diverse applications and a long history—which means experience.
