Solenoid Operated Directional Valve

DG4V-3-60 Design

**General Description**
Solenoid operated directional control valves are for directing and stopping flow at any point in a hydraulic system.

- Efficient control of greater hydraulic powers without increasing solenoid power consumption.
- Installed cost and space savings from higher power/weight-and-size ratios.
- Installation flexibility resulting from choice of numerous combinations of solenoid connectors and locations.

- Viton seals as standard for multi-fluid capability. Nitrile seals available as a model code option.
- Higher sustained machine productivity and higher uptime because of proven fatigue life and endurance, tested over 20 million cycles.
- Solenoid coils can be changed quickly and easily without leakage from hydraulic system.
- Compact, cost effective system design when used with Eaton® SystemStak™ valves and subplates.

**DG4V3-S/R- High Performance and Standard Performance Valves**

- Minimum pressure drop 2.5 bar at 30 l/min
- Range of coil connectors including DIN, Deutsch, AMP and terminal box
- Range of coil voltages and power options
- Up to 80 l/min (21 USgpm) and up to 40 l/min (10.5 USgpm) respectively at 350 bar (5000 psi).
- Offers designers the opportunity to select the optimum value package for each application.

- International standard interface. The valve mounting face conforms to ISO 4401, size 03 and is compatible with related international standards.
DG4V-3 Model Series

1. **Seal Type**
   - Blank – Viton
   - F6 – Buna Nitrile/High CAN

2. **Model series**
   - 4 – Solenoid operated
   - V – Pressure rating 350 bar (5000 psi) on P, A & B ports
   - 3 – ISO4401 Size 03

3. **Performance**
   - Blank – High performance
   - S – Standard performance
   - R – Standard performance with 8 Watt coil

4. **Spool Type**
   - Please refer functional symbols on Page 5 for spool types.

5. **Spool Spring Arrangement**
   - A – Spring offset, end-to-end
   - AL – Same as “A” but left hand build
   - B – Spring offset, end to center
   - BL – Same as “B” but left hand build
   - C – Spring centered
   - N – No-spring detented

6. **Manual Override Option**
   - Blank – Plain override(s) in solenoid end(s) only
   - H – Water-resistant override(s) on solenoid end(s)
   - Z – No overrides at either end
   - W – Twist and lock override in solenoid end(s)

7. **Solenoid Energization Identity**
   - Blank – None
   - V – Solenoid “A” is at port “A” end and/ or solenoid “B” is at port “B” end, independent of spool type
   - M – Electrical options and features
   - * (L) – Single solenoid valves
   - ** – No override in non-solenoid end of solenoid ends
   - 6* – Twist and lock override in solenoid end(s)
   - 5 – Water-resistant
   - 4* – No overrides at either end
   - 3 – Plain override(s) in solenoid end(s)
   - 2 – No-spring detented
   - 1 – Spring offset, end-to-end

8. **Solenoid Indicator Lights**
   - Blank – None
   - L – Solenoid indicator lights
   - ▲ – Flying lead coil type only

9. **Flag Symbol**
   - M – Electrical options and features

10. **Coil Type**
    - U – ISO4400, DIN43650 connector
    - U1 – ISO4400 fitted with PG11 plug
    - U6 – ISO4400 with fitted DIN plug with lights
    - KU – Top exit flying lead (150mm)
    - KUP4 – Junior timer (Amp) connector
    - KUP5 – Integral Deutsch connector
    - KUPM4L – Integral M12, 4-Pin connector
    - FW – Flying lead with 1/2” NPT thread wiring housing
    - FTW – Fly. lead wired terminal block & 1/2” NPT thread wiring housing
    - FPA3W – Fly. lead, 3 Pin connector & 1/2” NPT thread wiring housing
    - FPA5W – Fly. lead, 5 pin connector & 1/2” NPT thread wiring housing
    - X4 – Atex approved coil, ‘me’ type
    - X5 – Atex approved coil, ‘d’ type

11. **Surge Suppressor/Damper**
    - D1 – Diode positive bias
    - D2 – Negative bias
    - D7 – Transorb type

12. **Coil Rating**
    - B – 110V AC 50Hz/120V AC 60 Hz
    - BL – 110V AC 50Hz/120V AC 60 Hz
    - BS – 120V AC 60 Hz ▲
    - ES – 240V AC 60 Hz ▲
    - G – 12V DC
    - GL – 12V DC
    - H – 24V DC
    - HL – 24V DC
    - HM – 24V DC 8 watt
    - ▲ – X5 coil type only

13. **Tank Pressure Rating**
    - Refer to “Operating Data” for port T pressure ratings.
    - 4 – 70 bar (1000 psi) ▲
    - 5 – 100 bar (1500 psi) for standard performance models, DG4V-3S, with AC or DC solenoids.
    - 6 – 207 bar (3000 psi) for AC high performance models, DG4V-3, including spool position indicator type S6.
    - 7 – 207 bar (3000 psi) for DC high performance models, DG4V-3, including spool position indicator type S6.
    - ▲ – X5 coil type only

14. **Design Number**
    - 60 – Basic design
    - 61 – Type 8 spool

15. **Special Features**
    - “EN***” code number as required.

16. **Orifice Plug**
    - 00 – No orifice required
    - 03 – 0.3 mm dia.
    - 06 – 0.6 mm dia.
    - 08 – 0.8 mm dia.
    - 09 – 0.9 mm dia.
    - 10 – 1.0 mm dia.
    - 13 – 1.3 mm dia.
    - 15 – 1.5 mm dia.
    - 20 – 2.0 mm dia.
    - 23 – 2.3 mm dia.

17. **Seal Type**
    - Blank – Viton
    - F6 – Buna Nitrile/High CAN

18. **Model series**
    - 4 – Solenoid operated
    - V – Pressure rating 350 bar (5000 psi) on P, A & B ports
    - 3 – ISO4401 Size 03

19. **Performance**
    - Blank – High performance
    - S – Standard performance
    - R – Standard performance with 8 Watt coil

20. **Spool Type**
    - Please refer functional symbols on Page 5 for spool types.

21. **Spool Spring Arrangement**
    - A – Spring offset, end-to-end
    - AL – Same as “A” but left hand build
    - B – Spring offset, end to center
    - BL – Same as “B” but left hand build
    - C – Spring centered
    - N – No-spring detented

22. **Manual Override Option**
    - Blank – Plain override(s) in solenoid end(s) only
    - H – Water-resistant override(s) on solenoid end(s)
    - Z – No overrides at either end
    - W – Twist and lock override in solenoid end(s)

23. **Solenoid Energization Identity**
    - Blank – None
    - V – Solenoid “A” is at port “A” end and/ or solenoid “B” is at port “B” end, independent of spool type
    - M – Electrical options and features
    - * (L) – Single solenoid valves
    - ** – No override in non-solenoid end of solenoid ends
    - 6* – Twist and lock override in solenoid end(s)
    - 5 – Water-resistant
    - 4* – No overrides at either end
    - 3 – Plain override(s) in solenoid end(s)
    - 2 – No-spring detented
    - 1 – Spring offset, end-to-end

24. **Solenoid Indicator Lights**
    - Blank – None
    - L – Solenoid indicator lights
    - ▲ – Flying lead coil type only

25. **Flag Symbol**
    - M – Electrical options and features

26. **Coil Type**
    - U – ISO4400, DIN43650 connector
    - U1 – ISO4400 fitted with PG11 plug
    - U6 – ISO4400 with fitted DIN plug with lights
    - KU – Top exit flying lead (150mm)
    - KUP4 – Junior timer (Amp) connector
    - KUP5 – Integral Deutsch connector
    - KUPM4L – Integral M12, 4-Pin connector
    - FW – Flying lead with 1/2” NPT thread wiring housing
    - FTW – Fly. lead wired terminal block & 1/2” NPT thread wiring housing
    - FPA3W – Fly. lead, 3 Pin connector & 1/2” NPT thread wiring housing
    - FPA5W – Fly. lead, 5 pin connector & 1/2” NPT thread wiring housing
    - X4 – Atex approved coil, ‘me’ type
    - X5 – Atex approved coil, ‘d’ type

27. **Coil Rating**
    - B – 110V AC 50Hz/120V AC 60 Hz
    - BL – 110V AC 50Hz/120V AC 60 Hz
    - BS – 120V AC 60 Hz ▲
    - ES – 240V AC 60 Hz ▲
    - G – 12V DC
    - GL – 12V DC
    - H – 24V DC
    - HL – 24V DC
    - HM – 24V DC 8 watt
    - ▲ – X5 coil type only

28. **Tank Pressure Rating**
    - Refer to “Operating Data” for port T pressure ratings.
    - 4 – 70 bar (1000 psi) ▲
    - 5 – 100 bar (1500 psi) for standard performance models, DG4V-3S, with AC or DC solenoids.
    - 6 – 207 bar (3000 psi) for AC high performance models, DG4V-3, including spool position indicator type S6.
    - 7 – 207 bar (3000 psi) for DC high performance models, DG4V-3, including spool position indicator type S6.
    - ▲ – X5 coil type only

29. **Design Number**
    - 60 – Basic design
    - 61 – Type 8 spool

30. **Special Features**
    - “EN***” code number as required.

NOTE: Refer to page 4 for further details.
The valve function schematics apply to both U.S. and European valves.

**Solenoid Identified to US and European Standards**

For applications where valves are to remain pressurized (either energized or de-energized) at pressures over 210 bar (3045 psi) without frequent switching, it is recommended to use the high performance model, DG4V-3.

1st half cycle; armature fully retracted.

This product has been designed and tested to meet specific standards outlined in the European Electromagnetic Compatibility Directive (EMC) 2004/108/EC. For instructions on installation requirements to achieve effective protection levels see this leaflet and the Installation Wiring Practices for Vickers Electronic Products leaflet 2468. Wiring practices relevant to this Directive are indicated by 

Electromagnetic Compatibility (EMC).

- Pin 3: 0V
- Pin 4: Normal Open

EMC Protection DIN EN 61000-6-1/2/3/4, Aug 2002
Humidity 0-95% rel. (nach DIN 40040)
Protection Class IP65 DIN 40050
Vibration 0-500Hz Max. 20g
Shock Max. 50g

Factory setting ensures this condition under all combinations of manufacturing tolerance and of temperature drift (see “Temperature Limits”).

Wiring Connections

Warning
All power must be switched off before connecting or disconnecting any plugs.

Pin number 4, “Normally open”  Pin number 3, 0V
Pin number 1, Supply +ve  Pin number 2, “normally closed”

Customer’s protective ground connection

WARNING: Electromagnetic Compatibility (EMC)
It is necessary to ensure that the unit is wired up in accordance with the connection arrangements shown above. For effective protection the user’s electrical cabinet, the valve subplate or manifold and the cable screens should be connected to efficient ground points.
In all cases both valve and cable should be kept as far away as possible from any sources of electromagnetic radiation such as cables carrying heavy current, relays and certain kinds of portable radio transmitters, etc. Difficult environments could mean that extra screening may be necessary to avoid the interference.

A change to another specific gravity will yield an approximately proportional change in pressure drop.

The specific gravity of a fluid may be obtained from its producer. Fire resistant fluids usually have higher specific gravities than oil.
Installation Dimension

Models for use with ISO 4400 (DIN 43650) connectors

Double solenoid models
- DG4V-3(S)-*C.**-(V)M-U.**-60
- DG4V-3(S)-**-M-**-**-60

Single solenoid models
- DG4V-3(S)-**-A(-**)
- DG4V-3(S)-**-B(-**)
- DG4V-3(S)-**-AL(-**)
- DG4V-3(S)-**-BL(-**)

As shown

- DG4V-3(S)-*FL(-**)
- DG4V-3(S)-*BL(-**)
- DG4V-3(S)-*AL(-**)

Solenoid and end cap interchanged

Alternative plug positions by loosening knurled nut, turning coil, and re-tightening.

Not applicable to type “8” spool.
+ Can vary dependent on source of plug.

Dimensions in mm(in).

Model type | AC or DC | A Dim. | B Dim. | C Dim. | D Dim. |
---|---|---|---|---|---|
All | DC | 220 (8.66) | 156 (6.14) | 61 (2.5) | 73 (2.87) |
DG4V-3 | AC | 200 (7.87) | 146 (5.75) | 51 (2.1) | 63 (2.48) |
DG4V-3S | AC | 200 (7.87) | 146 (5.75) | 45 (1.7) | 63 (2.48) |

DG4V-3-*A(L)-(V)M-S7-U-**-60

Single solenoid models with Inductive type switch indicating when the spool is in the spring off-set position. Refer Pg6 connection to switch.

For coil removal:
- 64 (2.51) DC coil
- 54 (2.12) AC coil

Location of solenoid for RH build models

Location of switch for RH build models

237.7 (9.35) with DC solenoid
227.7 (8.69) with AC solenoid

For RH build models

For steel and SG (ductile) applications requiring emergency selection of valve for a period of time in the event of electrical failure.

Order in multiples of 25

Spacer prevents interchanged coil and re-tightening.

Coil types: U (shown), KU, SP1, SP2 (see Model Code)

Solenoid and switch locations are reversed.

54 (2.12) AC coil
64 (2.51) DC coil
Installation Dimension

Models with “F” type coils (lead wires) and conduit box.

Double solenoid models
DG4V-3(S)-*C-**-(V)M-**-60
DG4V-3(S)-*N-**-(V)M-**-60

Single solenoid models
DG4V-3(S)-*A(-**)
DG4V-3(S)-*B(-**)
DG4V-3(S)-8BL(-**)
DG4V-3(S)-*AL(-**)
DG4V-3(S)-*BL(-**)
DG4V-3(S)-8B(-**)

As shown

Spolenoid and end cap interchanged

Codes “FW”: 2 lead wires for each solenoid, approximately 150,00 (6.00) long. M3 (#6) terminals provided for customer connection.

Codes “FTW”: Valve supplied with lead wires connected into terminal strip suitable for M3 (#6) terminals for customer connection.
**Installation Dimension**

**M12 Connector type**

- **+24 VOLT (positive) PIN #4**
- **-0 VOLT (negative) PIN #3**
- **PINS #1 & #2 are unused**

**Interface protected by shipping cover**

- **21.75 [0.856]**
- **5.38 [0.212] DIA**

**Dual solenoid models**

- **219.43 [8.639]**
- **155.72 [6.130]**
- **72.72 [2.863]**
- **74.00 [2.913]**

**Single solenoid models**

- **23.50 [0.925]**
- **4700 [1.850]**

**Interface complies to NFPA D-03**

- **ISO 4401-03**
- **Seals provided**

**Electrical Schematic**
**DIN 43650 Connector**

- **Cable diameter range:** Ø6–10 mm (0.24–0.40)
- **Wire section range:** Ø0.5–1.5 mm² (0.0008–0.0023 in²)
- **Terminals:** Screw type
- **Type of protection:** IEC144 class IP65, when plugs are fitted correctly to the valves with interface seals (supplied with plugs) in place.

Connectors with and without indicator lights are available (order separately):

- **KU**
- **KUP4**
- **KUP5**
- **X4**
- **X5**
**Terminal strip and lights**

For valves with type “F” coils.

1. For DC coils the +ve lead(s) must be connected to the terminal(s) marked +. When using 3-wire incoming leads to double solenoid valves (i.e. common neutral) the inner pair of terminals must be interconnected.

2. For correct light indication of energized solenoid ensure that solenoid leads are correctly connected: light terminals are common with each outer pair of solenoid terminals according to the side with + mark.

**Insta-Plug**

DG4V-3(S)—FPA—60
DG4V-3(S)—FPBW—60

Eaton 2-part “Insta-Plug” eliminates breaking electrical inputs for valve disconnect. A male half is pre-wired to the valve body. The mating plug is inside a wire housing with external terminals for machine wire connections. Captive thumb screws, when loosened, permit the wire housing to be pulled clear of the valve for disconnect. A longer ground post provides first make/last break ground connection.

**PA configuration**

Dimensions in mm(in).
Electrical Plugs and Connectors

NFPA Connector T3.5.29-1980

DG4V-3(S)–FPA3W(L)*-(**)-(V)M-FPA3W(L)
DG4V-3(S)–FPA5W(L)*-(**)-(V)M-FPA5W(L)

The receptacle is a standard three or five pole connector with shortened leads and terminals added. The five pole plug has four leads 101.6 (4.0) long and one 177.8 (7.0) long. The three pole has two leads 101.6 (4.0) long and one 177.8 (7.0). All wires have underwriters recognized non-solder insulated eyelet terminals. The green wire is used for the ground (earth) connection (No. 8 screw furnished). Valves are supplied pre-wired.

Connection details and model type/model code references

Surge Suppression Devices (For DC Valves)

Diode in parallel with coil, positive bias. When switch (S1) is opened, the energy stored in the coil is trapped and dissipated by the diode (D1), (D2).

- Works only with DC voltage
- Polarity dependent
- Increase drop out time

Surge Suppression Devices (For DC Valves)

Diode in parallel with coil, negative bias. When switch (S1) is opened, the energy stored in the coil is trapped and dissipated by the diode (D2).

- Works only with DC voltage
- Polarity dependent
- Increase drop out time

Transzorb (D7)

Diode and Zener diode in parallel with coil. When switch (S1) is opened, the energy stored in the coil is trapped and dissipated by the diode (D1) and Zener diode (Z1) and the coil resistance.

- The Zener makes exact limitation of inductive spikes.
- Works only with DC voltage
- Polarity dependent

NOTE: These surge suppression devices are “Polarity Dependent.” Proper biasing conditions must be met when installing/connecting a coil in a system. Times represent cessation/application of voltage to coil versus velocity (start/stop) of a cylinder using a single solenoid, spring offset valve (time in milliseconds).

Valve Shift and Dropout
