EATON

Powering Business Worldwide

The Time is NOW

America can't wait.

The American Recovery and Reinvestment Act (ARRA) envisions a modernized, more energy-efficient America. Through targeted investments, the ARRA seeks to update and renovate our infrastructure, making us more energy-efficient and self-sustaining far into the future.

Living the vision

At Eaton, we have been living this vision for a while and are ready to do anything it takes to help the country get back to work. Our industry-leading products and services are designed to deliver:

- Energy Efficiency
- Reliability
- Safety
- Cost Effectiveness

Eaton Corporation is a power management company headquartered in Cleveland, Ohio. We help customers manage power more efficiently, effectively and safely.

Facility managers choose Eaton's electrical products for their safety, energy efficiency and reliability attributes. Contractors choose Eaton's electrical equipment because it is intelligently designed for faster installation and fewer callbacks. And, Eaton's service arm is chosen time and time again for their electrical expertise, PowerChain Management® audits, and ability to modernize power systems quickly and efficiently.

- Over 130,000 products covered under GSA contract
- 1,500 Sales and service engineers worldwide

ELECTRICAL PRODUCTS AND SERVICES PEOPLE TRUST

Our roots in the electrical industry run deep. Over the years, we have combined the Cutler-Hammer electrical products and services with the Westinghouse Distribution and Control Business Unit and the electrical group of Powerware to bring you some of the most trusted names in electrical solutions.

- Power Distribution
- Power Quality
- Power Management
- Control
- Engineering Services

Products that Power

Military Barracks
& Public Housing

Residential Power Distribution

Eaton provides new construction and renovation solutions for residences including military barracks and public housing.

- Loadcenters
- Circuit Breakers
- Meter Sockets
- Meter Breakers
- Structured Wiring Solutions
- Surge Protection
- Arc Fault Circuit Interrupters
- Back-up Power

Eaton Certified Contractor Network (ECCN)

ECCN has been developed to identify the best residential contractors in the country for public housing, military barracks and family housing. Eaton's certification program supplies electrical contractors with the knowledge and tools needed to provide the safest and most technologically advanced electrical system.

Offices
Wind Farms

Power Distribution

Eaton's power distribution equipment includes:

- Panelboards
- Switchboards
- Transfer Switches
- Low and Medium Voltage Switchgear
- Generator Connection Solutions
- Paralleling Switchgear
- Protective Relays
- Busway
- Safety Switches
- Transformers

America

| Schools | Courthouses | Hospitals | Airports | Hydro Plants
| Solar Farms | Water/Wastewater Treatment Plants | Data Centers

Power Quality

Eaton offers a wide range of power quality products including:

- Three-phase UPS
- Surge Protective Devices
- Single-phase UPS
- Power Factor Correction
- Harmonic Mitigating Transformers
- Adjustable Frequency Drives

Power Management

Transform your power system into an integrated, agile system that you can monitor, control and manage effectively:

- Switchboard Class Power Meters
- Power Management Software and Communications
- Lighting Control

Control

Eaton's power control products include:

- Motor Control Centers (MCC)
- Low and Medium Voltage Variable Speed Drives
- Pilot Devices
- Medium Voltage Motor Control
- Motor Contactors and Starters
- Control Relays and Timers

Engineering Services

Eaton's Electrical Services & Systems team offers a comprehensive portfolio of services tailored for every stage of a power system's life cycle. Our services integrate and optimize the elements of a power system to make sure it's aligned with federal, state and local government goals. We can help keep your power system safe, efficient, reliable and up-to-date.

- Turnkey Systems
- Retrofit and Modernization Services
- Power System Audits
- Training

Modernizing America

One Power System at a Time

It all starts with the understanding that the power system needs to be managed as an integrated, strategic asset over its lifecycle. When that happens, your power system is positioned to return real benefits, including energy efficiency, reliability, safety and cost effectiveness.

Identify Opportunities for Improvement

PowerChain Management Audit

Perhaps the most strategically important step you can take is to schedule an Eaton PowerChain Management Audit of your power infrastructure. Often, the power system is a disparate collection of equipment that doesn't always work in harmony to deliver the

desired level of energy efficiency, reliability, safety, or operating costs. As a power system evolves, it can become more complicated, inefficient and harder to manage over time—even as expectations for its performance rise. Our expert engineers can audit your power system to identify inefficiencies and opportunities for improvement.

Modernizing the Power System

We can help you optimize performance and extend the life of your power system by supplying the appropriate products and implementing the recommendations from the PowerChain Audit. We maintain an experienced team of engineers, field technicians and customer support engineers to assist you with your modernization needs.

Energy Efficiency

LEED Certification

Eaton's products and services are designed with energy efficiency in mind and collectively have the potential to contribute up to 40% of the credit points towards the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) certification. Eaton has at least one LEED Accredited Professional in every district sales office across America.

Doing Business Right

Eaton has been recognized for our uncompromising business ethics that guide every decision we make.

- Ranked by *Fortune* magazine as one of the “Most Admired Companies.”
- No. 2 on *Corporate Responsibility Officer* magazine’s list of “100 Best Corporate Citizens” and No. 1 on the publication’s list of “Best Corporate Citizens” in our industry sector.
- CALSTART Blue Sky Award for innovation and advancement in sustainable transportation technology.
- Named among “World’s Most Ethical Companies” by the Ethisphere Institute.
- “Employer of Choice Award” from the Minority Corporate Counsel Association and “Best in Class” for senior management diversity according to the Greater Cleveland Partnership’s Commission on Economic Inclusion.
- Designated one of “America’s Most Shareholder-Friendly Companies 2009” by *Institutional Investor* magazine.
- Recognized as an employer who has gone above and beyond the requirements for supporting our employees’ military duty.
- As part of the Business Roundtable RESOLVE project, Eaton has pledged to reduce our greenhouse gas emissions by 2012 — and by 2007 we were halfway to our goal.

Eaton is proud to be involved and associated with the following:

- Electrical Safety Foundation International (ESFi)
- Energy Star
- Green Grid
- Independent Electrical Contractors (IEC)
- International Association of Electrical Inspectors (IAEI)
- Institute of Electrical and Electronics Engineers (IEEE)

- National Association of Homebuilders (NAHB)
- National Electric Code (NEC)
- National Electrical Contractors Association (NECA)
- National Fire Prevention Association (NFPA)
- National Society of Professional Engineers (NSPE)
- Society of American Military Engineers (SAME)
- U.S. Green Building Council
