

# Intelligent Power Manager (IPM) Vulnerability Advisory Communication

## CVE-2018-12031

<b>Date:</b>	16.01.2019
<b>Subject:</b>	Intelligent Power Manager (IPM) Vulnerability Advisory
<b>Severity rating:</b>	High
<b>Product:</b>	Intelligent Power Manager (IPM)

## Summary

Eaton has identified a path traversal vulnerability (CVE-2018-12031) in its Intelligent Power Management (IPM) software (v1.62 and previous).

## Recommended course of action

A new version of this firmware (v1.64) has been released that remediates this vulnerability.

Eaton recommends all customers using this product to upgrade to the new version. Please download the latest firmware (v1.64) from our [portal](#).

## Other information

### Cybersecurity standards and best practices

Eaton recommends that users of the affected products follow the recommendations outlined in Eaton's Cybersecurity Considerations for Electrical Distribution Systems whitepaper at the link [here](#).

## Support
