

2023 NEC Code changes

Stay ahead of the Code curve

GFCI – Kitchen Receptacles

List item (6) in section **210.8(A)** was expanded to require GFCI protection of all receptacles in a dwelling unit kitchen.

Receptacles in Islands and Peninsulas

The 2023 code cycle made the placement of a receptacle on islands and peninsulas optional, but provisions must be put in place to ensure it can be added in the future. Additionally, **Article 210.52(C)(2) Island countertop spaces** and **210.52(C)(3) receptacle outlet location** specifies the receptacle must be on or in the countertop to avoid cords of appliances draping over the edge of the countertop.

GFCI – Kitchen Appliances

Section **210.8(D)** ensures the GFCI protection for appliances rated 150 V or less to ground and 60 A or less, single- or three-phase, is placed in the branch circuit either at the breaker, the receptacle, or some other location upstream of the outlet to which the appliance hard-wired.

GFCI Solutions for Kitchens

- TRGF15 15A Slim GFCI
- TR 20 20A Slim GFCI
- TRGF15_WP 15A Slim GFCI with wallplate
