Eaton® 9355 Version 2 Tie Cabinet

Installation Guide

use with Eaton 9355 20/30 kVA UPSs
Class A EMC Statements

FCC Part 15

NOTE  This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

ICES-003

This Class A Interference Causing Equipment meets all requirements of the Canadian Interference Causing Equipment Regulations ICES-003.

Cet appareil numerique de la classe A respecte toutes les exigences du Reglement sur le materiel brouilleur du Canada.

IEC 62040-2

Some configurations are classified under IEC 62040-2 as “C2 UPS for Unrestricted Sales Distribution.”
Special Symbols

The following are examples of symbols used on the UPS or accessories to alert you to important information:

**RISK OF ELECTRIC SHOCK** Observe the warning associated with the risk of electric shock symbol.

**CAUTION: REFER TO OPERATOR’S MANUAL** - Refer to your operator’s manual for additional information, such as important operating and maintenance instructions.

This symbol indicates that you should not discard the UPS or the UPS batteries in the trash. This product contains sealed, lead-acid batteries and must be disposed of properly. For more information, contact your local recycling/reuse or hazardous waste center.

This symbol indicates that you should not discard waste electrical or electronic equipment (WEEE) in the trash. For proper disposal, contact your local recycling/reuse or hazardous waste center.

**ON** - Indicates that the switch is in the ON position.

**OFF** - Indicates that the switch is in the OFF position.

**PHASE** - The word “phase.”

---

**IMPORTANT**

To ensure you have the most up-to-date content and information for this product, please review the latest manual revision on our website, [www.eaton.com/9355](http://www.eaton.com/9355).
EATON
END-USER LICENSE AGREEMENT

IMPORTANT, READ CAREFULLY. THIS END USER LICENSE AGREEMENT (THE "AGREEMENT") IS A BINDING CONTRACT BETWEEN YOU, THE END-USER (THE "LICENSEE") AND EATON INTELLIGENT POWER LIMITED, IRELAND, OR ONE OF ITS AFFILIATES ("EATON" OR "LICENSOR") BY OPERATING THIS UNINTERRUPTIBLE POWER SUPPLY (UPS) PRODUCT INCLUDING SOFTWARE EMBEDDED IN IT ("FIRMWARE"), YOU, THE LICENSEE, ARE AGREEING TO BE BOUND BY THE TERMS, CONDITIONS, AND LIMITATIONS OF THIS AGREEMENT. READ THE TERMS AND CONDITIONS OF THIS AGREEMENT CAREFULLY BEFORE, INSTALLING OR OPERATING THE PRODUCT. IF YOU DO NOT AGREE TO ANY OF THE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE UNUSED PRODUCT TO EATON.

1.0 DEFINITIONS

1.1 Documentation. "Documentation" means the user guides and manuals for the installation and use of the UPS, whether made available over the internet, provided in CD-ROM, DVD, hard copy or other form.

1.2 "Firmware" means software programs that are embedded in the product for which Licensor is granted a license hereunder, the Documentation therefore and, to the extent available, Updates thereto. The Licensor is licensed hereunder in object code (machine-readable) form only except that certain software programs may include limited portions in source code (human-readable) form.

1.3 Update. "Update" means a subsequent release of the Firmware, if and when developed by Eaton. An Update does not include any release, new version, option, or future product, which Eaton licenses separately.

2.0 Firmware License

2.1 Ownership. Eaton or its third party licensors retain all title, copyright and other proprietary rights in, and ownership of the Firmware regardless of the media upon which the original or any copy is stored or fixed.

2.2 License Grant. Eaton grants to Licensee a limited, non-exclusive, non-assignable license, in object code form only, to use the Firmware, in conjunction with the operation of the product to which the Firmware pertains or other products as described by Eaton in the Documentation. Licensee does not acquire any rights, express or implied, other than those expressly granted in this Agreement.

2.3 Restrictions and Requirements. Licensee will not, nor will it permit others to, modify, adapt, translate, reverse engineer, decompile, or disassemble the Firmware or any component thereof (including the Documentation), or create derivative works based on the Firmware (including the Documentation), except to the extent such forgoing restriction is prohibited by applicable law or applicable open source license to, and only to, any open source software component that is incorporated into the Firmware (if any). Copyright laws and international treaties will protect the Firmware, the Documentation, and any part thereof, expressly prohibited. For avoidance of doubt, Eaton does not grant Licensee a license to any of Eaton's brands, logos, designs, trade dress, service marks, trade names or any derivative thereof, in whole or in part. Licensee agrees to install or allow installation of all corrections of substantial defects, security patches, and other enhancements, for the Firmware in accordance with the instructions and as directed by Eaton.

2.4 Transfer and Assignment Restrictions. Licensee will not sell, resell, assign, lease, sublicense, encumber, or otherwise transfer its interest in this Agreement or in the Firmware, or the Documentation in whole or in part, or allow any other person or entity, including any parent or subsidiary of Licensee or other subsidiary of Licensee's parent, to copy, distribute, or otherwise transfer the Firmware without the prior written consent of Eaton. Licensee may transfer the Firmware directly to a third party only in connection with the sale of the Eaton product in which it is installed.

3.0 Term

3.1 Termination. This Agreement and the license granted hereunder automatically terminates in the event that Licensee breaches any provision of this Agreement. Eaton may terminate this license at any time with or without cause.

3.2 Effect of Termination. Immediately upon termination of this Agreement or the license granted hereunder, Licensee will cease using the product. The parties' rights and obligations under this Agreement will survive termination of this Agreement. Article 1.0, Section 2.1, Section 2.3, Section 2.4, Article 3.0, Article 4.0 and Article 5.0 remain in full force and effect.

4.0 Infringement and Warranties

4.1 Infringement. To the extent that any demand, allegation, or indication that the UPS with its Firmware infringes or misappropriates any third party intellectual property rights (including any right to use a trademark, trade dress, or trade secret) ("Intellectual Property Claim"), Licensor will notify Eaton promptly of such claim. Eaton may, in its sole discretion, assume the defense and settlement of said Intellectual Property Claim and Licensee will provide reasonable assistance and protection to Eaton for the defense of such claims.

4.2 Disclaimer of Warranties. THE Firmware is PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND. Eaton does not WARRANT THAT THE Firmware will be ERROR-FREE OR SECURE FROM UNAUTHORIZED ACCESS. THE LICENSEE EXPRESSLY ACKNOWLEDGES THAT TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE "AS IS" STATE OF THE PRODUCT IS AT LICENSEE'S SOLE RISK.

5.0 GENERAL PROVISIONS

5.1 Notice. All notices required to be sent hereunder will be in writing and will be deemed to have been given when mailed by first class mail to the address shown below:

LICENSE NOTICES
Eaton House,
30 Pamplorke Road,
Dublin 4.
Ireland

5.2 Governing Law. This Agreement will be interpreted and enforced in accordance with the laws of Ireland, without regard to any principles of law that provide for conflict of laws. Any action brought hereunder shall be brought only in the Courts of Ireland, unless mandatory law imposes otherwise.

Chapter 1 Introduction

A Tie Cabinet can be installed as a wall-mounted bypass or to provide support for a parallel system for redundancy or extra capacity.

A wall-mounted bypass switch is used to bypass the UPS during maintenance or servicing, providing wrap-around bypass for UPS service without shutting down the load.

A parallel (load sharing) system provides more capacity than a single UPS and can provide backup, depending on the load and configuration. In addition, when one UPS is taken out of service for maintenance or is not operating properly, a redundant UPS continues to supply uninterrupted power to the critical load. A parallel Powerware® Hot Sync Controller Area Network Bridge Card provides connectivity for system metering and operational mode control. The parallel system consists of two to four UPSs, each with a parallel CAN Bridge Card and a parallel cabinet.

Figure 1 shows the Eaton® 9355 UPS.

Introduction
Chapter 2  Safety Warnings

IMPORTANT SAFETY INSTRUCTIONS SAVE THESE INSTRUCTIONS

This manual contains important instructions that you should follow during installation and maintenance of the UPS and batteries. Please read all instructions before operating the equipment and save this manual for future reference.

DANGER

This UPS contains LETHAL VOLTAGES. All repairs and service should be performed by AUTHORIZED SERVICE PERSONNEL ONLY. There are NO USER SERVICEABLE PARTS inside the UPS.

WARNING

- This UPS contains its own energy source (batteries). The UPS output may carry live voltage even when the UPS is not connected to an AC supply.
- To reduce the risk of fire or electric shock, install this UPS in a temperature and humidity controlled, indoor environment, free of conductive contaminants. Ambient temperature must not exceed 40°C (104°F). Do not operate near water or excessive humidity (95% maximum).
- To reduce the risk of fire, connect only to a circuit provided with 125 amperes maximum branch circuit overcurrent protection in accordance with the National Electrical Code® (NEC®), ANSI/NFPA 70.
- Output overcurrent protection and disconnect switch must be provided by others.

CAUTION

- Batteries can present a risk of electrical shock or burn from high short circuit current. Observe proper precautions. Servicing should be performed by qualified service personnel knowledgeable of batteries and required precautions. Keep unauthorized personnel away from batteries.
- Proper disposal of batteries is required. Refer to your local codes for disposal requirements.
- Never dispose of batteries in a fire. Batteries may explode when exposed to flame.

CONSIGNES DE SÉCURITÉ IMPORTANTES — CONSERVER CES INSTRUCTIONS

Ce manuel comporte des instructions importantes que vous êtes invité à suivre lors de toute procédure d’installation et de maintenance des batteries et de l’onduleur. Veuillez consulter entièrement ces instructions avant de faire fonctionner l’équipement et conserver ce manuel afin de pouvoir vous y reporter ultérieurement.

DANGER!

Cet onduleur contient des TENSIONS MORTELLES. Toute opération d’entretien et de réparation doit être EXCLUSIVEMENT CONFIIÉE A UN PERSONNEL QUALIFIÉ AGREE. AUCUNE PIÈCE RÉPARABLE PAR L’UTILISATEUR ne se trouve dans l’onduleur.
AVERTISSEMENT!

- Cette onduleur possède sa propre source d'alimentation (batteries). Il est possible que la sortie de l'onduleur soit sous tension même lorsque l'onduleur n’est pas connectée à une alimentation CA.
- Pour réduire les risques d’incendie et de décharge électrique, installer l'onduleur uniquement à l’intérieur, dans un lieu dépourvu de matériaux conducteurs, où la température et l'humidité ambiante sont contrôlées. La température ambiante ne doit pas dépasser 40 °C. Ne pas utiliser à proximité d’eau ou dans une atmosphère excessivement humide (95 % maximum).
- Afin de réduire les risques d'incendie, n’effectuez le raccordement qu’avec un circuit muni d’une protection de surintensité du circuit de dérivation maximum de 125 ampères conformément au Code Électrique National (National Electrical Code) des États-Unis ANSI/NFPA 70.
- La protection de surintensité de sortie ainsi que le sectionneur doivent être fournis par des tiers.

ATTENTION!

- Les batteries peuvent présenter un risque de choc électrique ou de brûlure provenant d’un courant de court-circuit haute intensité. Observez les précautions appropriées. L’entretien doit être réalisé par du personnel qualifié connaissant bien les batteries et les précautions nécessaires. N’autorisez aucun personnel non qualifié à manipuler les batteries.
- Une mise au rebut réglementaire des batteries est obligatoire. Consulter les règlements en vigueur dans votre localité.
- Ne jamais jeter les batteries au feu. L’exposition aux flammes risque de les faire exploser.

INSTRUCCIONES DE SEGURIDAD IMPORTANTES — GUARDE ESTAS INSTRUCCIONES

Este manual contiene instrucciones importantes que debe seguir durante la instalación y el mantenimiento del SIE y de las baterías. Por favor, lea todas las instrucciones antes de poner en funcionamiento el equipo y guarde este manual para referencia en el futuro.

PELIGRO

Este SIE contiene VOLTAJES MORTALES. Todas las reparaciones y el servicio técnico deben ser efectuados SOLAMENTE POR PERSONAL DE SERVICIO TÉCNICO AUTORIZADO. No hay NINGUNA PARTE QUE EL USUARIO PUEDA REPARAR dentro del SIE.
ADVERTENCIA

- Este SIE contiene su propia fuente de energía (baterías). La salida del SIE puede transportar voltaje activo aun cuando el SIE no esté conectado con una fuente de CA.
- Para reducir el riesgo de incendio o de choque eléctrico, instale este SIE en un lugar cubierto, con temperatura y humedad controladas, libre de contaminantes conductores. La temperatura ambiente no debe exceder los 40°C. No trabaje cerca del agua o con humedad excesiva (95% máximo).
- Para reducir el riesgo de incendio, realice la conexión únicamente hacia un circuito que cuente con un máximo de 125 amperios de protección contra sobrecorriente de circuito derivado, de acuerdo con el Código Eléctrico Nacional, ANSI/NFPA 70.
- La protección contra sobrecorriente de salida y el conmutador de desconexión debe suministrarse por parte de terceros.

PRECAUCIÓN

- Las baterías pueden constituir un riesgo de descarga eléctrica o quemaduras por corriente alta de corto circuito. Adopte las precauciones debidas. Personal calificado de servicio que conozca de baterías y esté al tanto de las precauciones requeridas debe darle servicio al equipo. Mantenga al personal no autorizado alejado de las baterías.
- Es necesario desechar las baterías de un modo adecuado. Consulte las normas locales para conocer los requisitos pertinentes.
- Nunca deseche las baterías en el fuego. Las baterías pueden explotar si se las expone a la llama.
Safety Warnings
Chapter 3  Tie Cabinet Installation

The Eaton 9355 UPS has the following power connections:

- 3–phase (L1, L2, and L3), neutral, and ground connection for rectifier/bypass input
- 3–phase (L1, L2, and L3), neutral, and ground connection for load output

The nominal input/output voltages are:

- 120/208 or 127/220 Vac

Output overcurrent protection and disconnect switch must be provided by others. Figure 9, Figure 10, Figure 12 and Figure 13 show the oneline diagrams.

---

**WARNING**

Only qualified service personnel (such as a licensed electrician) should perform the UPS installation and initial startup. Risk of electrical shock.

---

To hardwire the Tie Cabinet:

1. Verify that the electrical connections to the installation site have been properly installed.

2. A wall-mounted, user–supplied, readily–accessible disconnection device must be incorporated in the input wiring. Compare the circuit breaker ratings to the ones in Table 1.

3. Switch off utility power to the distribution point where the Tie Cabinet and UPSs will be connected. Be absolutely sure there is no power.

4. Determine your equipment’s grounding requirements according to your local electrical code.

5. Remove the Tie Cabinet front cover rails (see Figure 2).
6. Remove the cover panel to gain access to the breakers (see Figure 3).

Figure 2. Front Cover Rails

Figure 3. Cover Panel
7. Punch holes for the conduit (AC input, UPS output, load connection, and maintenance bypass contact wires) using a Greenlee® punch or similar device.

8. Verify that the Tie Cabinet bypass breaker is in the OFF position (see Figure 4).

**Figure 4. Tie Cabinet Bypass Breaker**

9. Mount the Tie Cabinet to the wall and install the conduit.

10. Remove the UPS front door.

11. Verify that the UPS input circuit breaker is in the OFF position (see Figure 5).

12. Verify that the UPS battery circuit breaker is in the OFF position.

13. If you ordered the UPS with the optional output circuit breaker, verify that the output circuit breaker is in the OFF position.

14. Remove the UPS wiring access cover and retain.
15. Remove the UPS conduit landing box from the rear panel and retain.

16. Punch two holes in the conduit landing box for the input and output conduit using a Greenlee punch or similar device.

17. Route the wiring from the back of the UPS, through the wiring tray, to the front of the UPS.

18. Hardwire the UPS input terminations.

See Table 1 for specifications and Figure 6 for a detailed view of the UPS terminal block.

**NOTE 1**  
Input neutral must be wired for proper operation or the UPS will not start.

**NOTE 2**  
The Eaton 9355 UPS is shipped as a single-feed UPS and can be converted to a dual-feed UPS in the field.

**NOTE 3**  
DO NOT overtighten the screws; be sure to use the specified tightening torque values shown in Table 1.

</table>

¹ Use only 90°C-rated copper wire. Minimum wire size is based on 120/208 full load ratings applied to NEC Code Table 310-16. Code may require a larger AWG size than shown in this table because of temperature, number of conductors in the conduit, or long service runs. Follow local requirements.

² Per NEC article 300-20(a), all three-phase conductors must be run in the same conduit. Neutral and ground must be run in the same conduit as the phase conductors.

³ Conduit is sized to accommodate one neutral conductor the same size as the phase conductor and one ground conductor. If two neutral conductors or an oversized neutral conductor are to be installed, check the size of the conduit needed to accommodate the extra wire or size and use that conduit size in place of the conduit size listed. Conduit sizes were chosen from NEC Table C1, type letters RHH, RHW, RHW–2, TW, THW, THHW, THW–2.
NOTE 1 The two input neutral terminals are jumpered together; use either one of these terminals to make the input neutral connection.

NOTE 2 The two output neutral terminals are jumpered together; use either one of these terminals to make the output neutral connection.

19. Hardwire the output terminations from the UPS to the Tie Cabinet (see Figure 7).
20. Repeat Step 10 through Step 19 for each UPS.
21. Hardwire the load to the Tie Cabinet (see Figure 8).
22. Wire the maintenance bypass auxiliary contacts and terminate to the maintenance bypass wires in the Tie Cabinet (see Figure 6).
Connect the black and the red wire to TB4 on the UPS (see Figure 9 or Figure 10). Cap the blue wire.

**NOTE 1** The maintenance bypass contacts are normally-open. To ensure proper bypass operation, DO NOT use the blue wire (it is normally-closed).

**NOTE 2** There are two sets of maintenance bypass wires; you can terminate to either set. If you are installing four UPSs, it is recommended to terminate two UPSs to one set of wires and two UPSs to the other set of wires.

23. Reinstall the UPS wiring access cover removed in Step 14.

24. Reinstall the UPS conduit landing box in the reversed position (removed in Step 15).

**Figure 9. Parallel Wiring Diagram – without Maintenance Isolation Switch (MIS)**

**Figure 10. Parallel Wiring Diagram – with MIS**
25. Reinstall the UPS front door removed in Step 10.
26. Wire the AC input to the bypass breaker (see Figure 11).

Figure 11. Bypass AC Input Wiring

27. Verify the phase rotation for each UPS and the bypass input.
28. Reinstall the Tie Cabinet cover panel removed in Step 6.
29. Reinstall the Tie Cabinet front cover rails removed in Step 5.
30. Proceed to Chapter 4 Installing Options to continue the installation process.

Tie Cabinet Installation
Chapter 4 Installing Options

This section describes the Powerware Hot Sync Controller Area Network Bridge Card.

For other options, such as additional X-Slot® cards, LanSafe® Power Management Software, remote emergency power-off (REPO), relay output contacts, or programmable signal inputs, refer to the Eaton 9355 UPS (20/30 kVA) User’s Guide.

Figure 14 shows the location of the communication options and control terminals on the UPS.

Figure 14. Communication Options and Control Terminals

4.1 Powerware Hot Sync CAN Bridge Card

The Powerware Hot Sync CAN Bridge Card, shown in Figure 15, can be installed to provide connectivity for operational mode control and metering of a parallel system at any UPS in the system.

Figure 15. Powerware Hot Sync CAN Bridge Card
To install the Powerware Hot Sync CAN Bridge Card:

1. Remove the UPS front door.

2. Remove the communication wiring access plate from the UPS rear panel and punch a hole in it using a Greenlee punch or similar device (see Figure 16).

3. Install conduit for the communication wiring.

4. Set the jumper pins on the Powerware Hot Sync CAN Bridge Card according to the parallel configuration (see Figure 17):
   - If only two UPSs are paralleled, then set both cards to Pins 1 and 2.
   - For three or four paralleled UPSs, set the cards of the first and last UPSs to Pins 1 and 2; set the cards for the middle UPSs to Pins 2 and 3.
5. Install the CAN Bridge Card into X-Slot 2 (see Figure 14 and Figure 19).
6. Strip shielded, four-wire, twisted-pair wire (maximum 18 AWG recommended) for CAN Bridge Card wiring and pull-chain wiring.
7. Repeat Step 1 through Step 6 for each UPS.
8. Route the wiring through the conduit from the communication wiring access plate to the opening between the two X-Slot communication bays on each UPS (see Figure 18).

**Figure 18. Routing the Cables**

9. Install the CAN Bridge Card wiring between each UPS (see Figure 20 on Figure 20).
Use three wires of the four-wire twisted-pair wire. Reserve two wires for pull-chain wiring in Step 11. Be sure to check correct polarity for Pins 8 and 9:

- Connect SHIELD Pin 10 on all cards together.
- Connect CAN H Pin 9 and CAN L Pin 8 (twisted pair) on all cards together.

10. Route the pull-chain wiring through the middle of the fan section and secure in the cable clips for each UPS (see Figure 19).

**Figure 19. Installing Communication Cables**

11. Wire the pull-chain wiring to Signal Input 2 on each UPS and daisy chain the wiring to each UPS as shown in Figure 20. Be sure to check correct polarity:

- Connect Pull-Chain Output Contact Pin 1 to Signal Input 2 Pin 1 on each UPS.
- Connect Pull-Chain Output Contact Pin 2 to Signal Input 2 Pin 2 on each UPS.
CAUTION

If polarity or wiring is not correct, the parallel system does not operate normally. For example, when shutting down one UPS, the remaining UPS transfers the load to bypass instead of supporting the load. Verify all CAN Bridge Card wiring is correct for proper operation.

NOTE

Signal Input 2 can still be used for building alarms; it is automatically rerouted to the CAN Bridge Card.

12. Reinstall the communication wiring access plate on each UPS (removed in Step 2).
13. Replace the UPS front door on each UPS (removed in Step 1).

Chapter 5  Service and Support

If you have any questions or problems with the UPS, call your Local Distributor or the Help Desk at one of the following telephone numbers and ask for a UPS technical representative.

United States: 1-800-843-9433
Canada: 1-800-461-9166 ext 260
All other countries: Call your local service representative

Please have the following information ready when you call for service:

• Model number
• Serial number
• Firmware version number
• Date of failure or problem
• Symptoms of failure or problem
• Customer return address and contact information
Chapter 6  Warranty

For warranty information, please refer to the Resources link on our website, www.eaton.com/9355.
