

UPS Basic Operator Training

At your location, on your schedule, whenever you need it.

Eaton basic operation and overview training videos currently available for the Eaton 9x55, 9390, 9395 and 93PM UPS

This training course provides comprehensive user and operator training instruction tailored to both non-technical and experienced operators. Each video is unique to the characteristics of the particular UPS model and covers its basic safety and operating steps.

Video topics include:

- 1. Safety:** Understand and follow all safety guidelines.
- 2. Introduction:** Basic description and configuration of the UPS model.
- 3. Controls:** How to navigate the LCD front panel display, and how to use it to tell the UPS what to do.
- 4. Battery:** How to safely open and close the UVR battery breaker(s).
- 5. Alarms:** How to use the information on the front panel LCD screen to identify and troubleshoot potential problems.
- 6. Startup:** How to start up a single Reverse Transfer UPS System from the shutdown state.
- 7. Transfer:** How to manually transfer a load to static bypass without dropping the load.
- 8. Special features and monitoring options:** If your UPS has an Energy Saver System (ESS) installed, you'll know how to enable or disable it.
- 9. Support:** How to contact Eaton for service and support.

Each video provides comprehensive, model-specific training critical to the operation of your UPS
