

Eaton RPP and PDU field upgrades

Unleash the power of your Eaton RPP or PDU.

Want to maximize the benefits of your Eaton Remote Power Panel or Power Distribution Unit?

Eaton® is proud to offer a new line of cutting-edge UL listed field upgrade kits to provide unparalleled reliability, efficiency and insight to get the most out of your RPP or PDU.

Eaton's factory-trained field technicians can seamlessly upgrade your RPP or PDU on-site.

These options allow you to meet your budget requirements and offer the pay-as-you-grow option to increase the power density for your data center.

RPP

PDU

Available Upgrades

RPP

- Branch Circuit Monitoring System (BCMS) upgrade

PDU

- Panelboards
- Monitoring upgrade (BCMS)
- Subfeed breakers

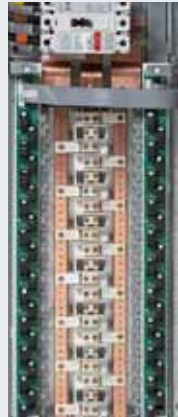

Powering Business Worldwide

Energy Management System

Add Eaton Energy Management System upgrade for branch circuit monitoring capabilities to existing PDU and RPP units.

Universal controller board

CT strip-mounted panel board

Monitoring upgrade

Seamless integration of monitoring capability offers intelligent power management to add, change or move breakers, as well as:

- Continuously monitors power conditions at branch circuit, sub-feed and main breaker levels.
- Issues warnings and alarms if current loads of environmental conditions exceed user-defined thresholds.
- Tracks event history with integrated, real-time clock for time stamping.
- Collects data from up to eight panelboards and 252 pole positions.
- Makes all data available on state-of-the-art local display.
- Sends data to remote monitoring or management systems using optional interface card.
- Stores 24 months of data for diagnostics, comprehensive load profiling and energy planning.
- Provides remote monitoring capability.
- Up to 100A branch breaker CTs available.

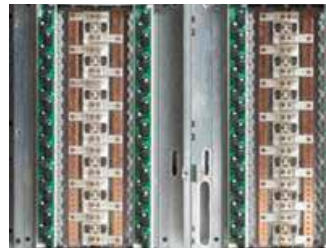

Subfeed breaker upgrade

Provides subfeed breaker upgrade to add as follows in the table below:

Max Amp	PRL3	PRL4	BCMS
225A	80% rated	80% rated	Yes
400A	—	80% or 100% rated	Yes
600A	—	80% or 100% rated	Yes

* If terminal block is available in existing unit, each of the above breakers can be installed with auxiliary and shunt trip options.

** All of the above breakers can be installed in existing PDU provided adequate space is available. For further information, please contact a customer support engineer.

42 pole (CCT) panelboard upgrade

Addition of 42 pole (CCT) and PRL3 panelboards for existing front and rear access PDUs only.

Industry leading service and support

With 240 field technicians in North America, 1,200 international authorized service providers and more than 100 dedicated customer support team members, we have more service personnel than any other UPS manufacturer.

At Eaton, we deliver service 24 hours a day, 7 days a week, when and where you need it.
