

# Control your environment with software-defined power

## What is Intelligent Power Manager?

Eaton's Intelligent Power Manager® (IPM) software provides the tools needed to monitor and manage power equipment in your physical or virtual environment keeping IT devices up and running during a power or environmental event. This innovative software solution ensures system uptime and data integrity by allowing you to remotely monitor, manage and control devices on your network.

## Why Eaton?

### Validated alliance solution provider

Eaton is the leader in virtualized power management and differentiates itself by having over 500 hours invested in validation testing with our network of alliance partners. Focused on building our integration and alliance partnerships, we've done the heavy lifting by validating our power management offering on the industry's leading IT platforms to increase efficiency and reliability.

## The value of using IPM

<p><b>Achieve more with less</b></p> <p><b>REDUCE</b> physical infrastructure cost and space</p>	<p><b>Maintain business continuity</b></p> <p><b>MINIMIZE</b> information technology (IT) operating costs</p>	<p><b>Ease of use</b></p> <p><b>INCREASE</b> productivity and responsiveness</p>
