Installation Instructions for Eaton Surge Protective Device XXCFXXX10-DIN and XXCFXXX10-DIN2

Contents

Description                                   Page
1.0 Setup                                      2
1.1 Before Installation                        2
1.2 Installation                               3
   For AC Applications                          3
   For DC Applications                          3
1.3 Wiring                                     3
   1.3.1 Series Wiring Applications             3
   1.3.2 Parallel Wiring Applications           4
   1.3.3 Wiring Note                             4
1.4 Apply Power                                4
1.5 Specifications                             4
1.6 Warnings                                   5
1.7 Warranty                                   5

EATON
Powering Business Worldwide
**WARNING**

HAZARDOUS VOLTAGES PRESENT

IMPROPER INSTALLATION OR MISAPPLICATION OF THESE DEVICES MAY RESULT IN SERIOUS INJURY TO INSTALLER AND/OR DAMAGE TO ELECTRICAL SYSTEM OR RELATED EQUIPMENT. READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION. PROTECTIVE EYEWEAR SHOULD BE WORN WHENEVER WORKING AROUND HAZARDOUS VOLTAGES. THIS DEVICE CONTAINS NO SERVICEABLE PARTS.

**NOTICE**

ALL INSTRUCTIONS AND MEASUREMENTS MUST BE COMPLETED BY A LICENSED/QUALIFIED ELECTRICIAN IN ACCORDANCE WITH THE U.S. NATIONAL ELECTRICAL CODE, STATE AND LOCAL CODES OR OTHER APPLICABLE COUNTRY CODES. THE U.S. NATIONAL ELECTRICAL CODE AND STATE AND LOCAL REQUIREMENTS (OR OTHER APPLICABLE COUNTRY CODES) SUPERSEDE THIS INSTRUCTION.

---

## 1.0 Setup

Verify that system voltages do not exceed those listed in Section 1.5, Specifications.

- All AC measurements should be completed with an RMS voltmeter.
- All DC measurements should be completed with a DC voltmeter.
- **DO NOT INSTALL THE SURGE PROTECTIVE DEVICE IF MEASURED VOLTAGE EXCEEDS MAXIMUM OPERATING LIMITS.**

Choose location for the Surge Protective Device installation so that maximum separation can be maintained between input leads, output leads and ground leads.

### 1.1 Before Installation

REMOVE POWER FROM ELECTRICAL SYSTEM BEFORE MOUNTING THE SURGE PROTECTIVE DEVICE.

- The Surge Protective Device MUST be mounted within an enclosure to assure personnel safety from exposed terminals.

### IMPORTANT

**THE SURGE PROTECTIVE DEVICE SHOULD BE LOCATED SO THAT THE SHORTEST POSSIBLE CONDUCTOR LENGTH MAY BE USED. THE SURGE PROTECTIVE DEVICE SHOULD BE MOUNTED TO ALLOW MAXIMUM SEPARATION BETWEEN INPUT AND OUTPUT WIRING.**

- The Surge Protective Device contains no position-oriented components and can be mounted upside down or sideways.
- The Surge Protective Device should be placed in electrical circuit so that it is the last device in the circuit before equipment to be protected.
- The Surge Protective Device may be installed in series with the load or, if the load current exceeds 15A, it may be installed in parallel.

---

1 UL 1449 4th Edition does not list SPD products rated less than 110 Vac or DC voltages.
1.2 Installation

THE SURGE PROTECTIVE DEVICE MUST BE CONNECTED TO ELECTRICAL SYSTEM WITH A CIRCUIT BREAKER

For AC Applications

Note: Pre-existing breakers of the rated load size may be utilized if provisions for multi-conductor connections are made according to NEC 110-14A.

- If Neutral wire is to be utilized as L2, then a circuit breaker must be provided for that phase.

For DC Applications

- DC units to be installed after an overcurrent protective device that is rated not to exceed 100% of the current rating of the unit.

REMOVE POWER FROM ELECTRICAL SYSTEM BEFORE INSTALLING THE SURGE PROTECTIVE DEVICE.

Mechanically mount the Surge Protective Device.

- The Surge Protective Device should be mounted to allow maximum separation between input and output wiring.
- The Surge Protective Device contains no position-oriented components and can be mounted upside down or sideways.
- The Surge Protective Device should be placed in electrical circuit so that it is last device in circuit before equipment to be protected.

1.3 Wiring

NOTICE

AN INSULATED GROUNDING CONDUCTOR THAT IS IDENTICAL IN SIZE AND INSULATION MATERIAL AND THICKNESS TO THE GROUNDED AND UNGROUNDED CIRCUIT SUPPLY CONDUCTORS, EXCEPT THAT IT IS GREEN WITH OR WITHOUT ONE OR MORE YELLOW STRIPES, IS TO BE INSTALLED AS PART OF THE CIRCUIT THAT SUPPLIES THE FILTER. SEE TABLE 250-122 OF THE NATIONAL ELECTRIC CODE (NEC) REGARDING THE APPROPRIATE SIZE OF THE GROUNDING CONDUCTOR.

THE GROUNDING CONDUCTOR IS TO BE GROUNDED TO EARTH AT THE SERVICE EQUIPMENT OR OTHER ACCEPTABLE BUILDING EARTH GROUND SUCH AS THE BUILDING FRAME IN THE CASE OF HIGH-RISE STEEL FRAME STRUCTURE.

ANY ATTACHMENT-PLUG RECEPTACLES IN THE VICINITY OF THE SURGE PROTECTIVE DEVICE ARE TO BE GROUNDING TYPE, AND THE GROUNDING CONDUCTORS SERVING THESE RECEPTACLES ARE TO BE CONNECTED TO EARTH GROUND AT THE SERVICE EQUIPMENT OR OTHER ACCEPTABLE BUILDING EARTH GROUND SUCH AS THE BUILDING FRAME IN THE CASE OF HIGH-RISE STEEL FRAME STRUCTURE.

PRESSURE TERMINAL OR PRESSURE SPlicing CONNECTORS AND SOLDERING LUGS USED IN THE INSTALLATION OF THE SURGE PROTECTIVE DEVICE SHALL BE IDENTIFIED AS BEING SUITABLE FOR THE MATERIAL OF THE CONDUCTORS. CONDUCTORS OF DISSIMILAR METALS SHALL NOT BE INTERMIXED IN A TERMINAL OR SPlicing CONNECTOR WHERE PHYSICAL CONTACT OCCURS BETWEEN DISSIMILAR CONDUCTORS UNLESS THE DEVICE IS IDENTIFIED FOR THE PURPOSE AND CONDITIONS OF USE.

CONDUCTORS SHOULD BE TWISTED TOGETHER TO REDUCE IMPEDANCE FACTOR. EXCESSIVE WIRE LENGTH AND SHARP BENDS DEGRADE FILTER PERFORMANCE; THEREFORE, AVOID EXCESSIVE WIRE LENGTH AND SHARP BENDS.

1.3.1 Series Wiring Applications

- Connect incoming system GROUND wire to terminal labeled G on unprotected end (labeled as LINE).
- Connect load side GROUND wire to terminal labeled G on protected end (labeled as EQUIP).

For AC Applications (See Figures 1 and 2)

- Connect incoming system NEUTRAL wire to terminal labeled N on unprotected end (labeled as LINE).
- Connect load side NEUTRAL wire to terminal labeled N on protected end (labeled as EQUIP).
- Connect incoming system HOT wire to terminal labeled L on unprotected end (labeled as LINE).
- Connect load side HOT wire to terminal labeled L on protected end (labeled as EQUIP).

For DC Applications (See Figure 3)

- Connect incoming system NEGATIVE wire to terminal labeled N on unprotected end (labeled as LINE).
- Connect load side NEGATIVE wire to terminal labeled N on protected end (labeled as EQUIP).
- Connect incoming system POSITIVE wire to terminal labeled L on unprotected end (labeled as LINE).
- Connect load side POSITIVE wire to terminal labeled L on protected end (labeled as EQUIP).

Figure 1. Single Phase Series AC Application

Figure 2. Split Phase Series AC Application (shown with Neutral utilized as L2)

Figure 3. Series DC Application
1.3.2 Parallel Wiring Applications

- Connect incoming system GROUND wire to terminal labeled G on unprotected end (labeled as LINE).

For AC Applications
- Connect incoming system NEUTRAL wire to terminal labeled N on unprotected end (labeled as LINE).
- Connect incoming system HOT wire to terminal labeled L on unprotected end (labeled as LINE).
- This will install the SPD in parallel with the supply and it will not be subjected to any load current.

For DC Applications
- Connect incoming system NEGATIVE wire to terminal labeled N on unprotected end (labeled as LINE).
- Connect incoming system POSITIVE wire to terminal labeled L on unprotected end (labeled as LINE).
- This will install the SPD in parallel with the supply and it will not be subjected to any load current.

Note: For ungrounded or isolated control transformer secondary, DO NOT CONNECT Ground terminal on either LINE or EQUIP side.

1.3.3 Wiring Note

Note: A circuit breaker or fuse must be inserted in the LINE input side of the incoming supply. Rating will be according to the required load current and applies to Series connections only.

1.4 Apply Power

Apply power to system. Indicator light should glow. If light does not glow, remove power and contact supplier.

1.6 Warnings

⚠️ WARNING
ALL DEVICES LISTED IN THIS MANUAL CONTAIN NO SERVICEABLE PARTS.

⚠️ WARNING
XXCFXXX10-DIN2 DEVICES ARE SUITABLE FOR USE IN CLASS I, DIVISION 2 GROUPS A, B, C AND D OR NON-HAZARDOUS LOCATIONS ONLY.

⚠️ WARNING
EXPLOSION HAZARD
DO NOT DISCONNECT EQUIPMENT UNLESS POWER HAS BEEN SWITCHED OFF OR THE AREA IS KNOWN TO BE NON-HAZARDOUS.

1.7 Warranty

Eaton warrants these products for a period of 5 years from the date of delivery to the purchaser, 10 years if registered on www.eaton.com/spd, to be free from defects in both workmanship and materials. Eaton assumes no risk or liability for results of the use of the products purchased from it, including but without limiting the generality of the foregoing; (1) The use in combination with any electrical or electronic components, circuits, systems, assemblies, or any other materials or substances; (2) Unsuitability of any product for use in any circuit or assembly.

Purchaser’s right under the warranty shall consist solely of requiring Eaton to repair, or at Eaton’s sole discretion, replace, free of charge, F.O.B. factory, and defective items received at said factory or failure to give any advice or recommendations by Eaton shall not constitute any warranty by or impose any liability upon Eaton. The foregoing constitutes the sole and exclusive liability of Eaton AND IS IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED, IMPLIED OR STATUTORY AS TO THE MERCHANTABILITY, FITNESS FOR PURPOSE SOLD, DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER.

In no event shall Eaton be liable for special or consequential damages or for delay in performance of the warranty.

This warranty does not apply if the product has been misused, abused, altered, tampered with, or used in applications other than specified on the nameplate. At the end of the warranty period, Eaton shall be under no further warranty obligation expressed or implied.

The product covered by this warranty certificate can only be repaired or replaced by the factory. For help on troubleshooting the Critical Protection Product, or for warranty information, call 1-800-809-2772, Option 4, sub-option 2. Repair or replacement units will be returned collect. If Eaton finds the return to be a manufacturer’s defect, the product will be returned prepaid.
