EATON
Powering Business Worldwide
1.0 Setup

Verify that system voltages do not exceed those listed in Section 1.5, Specifications.

- All AC measurements should be completed with an RMS voltmeter.
- All DC measurements should be completed with a DC voltmeter.
- DO NOT INSTALL FILTER IF MEASURED VOLTAGE EXCEEDS MAXIMUM SUGGESTED OPERATING LIMITS.

Choose location for filter installation so that maximum separation can be maintained between input leads, output leads and ground leads.

1.1 Before Installation

REMOVE POWER FROM ELECTRICAL SYSTEM BEFORE MOUNTING FILTER.

- Filter MUST be mounted within an enclosure to assure personnel safety from exposed terminals.

IMPORTANT:

FILTER SHOULD BE LOCATED SO THAT THE SHORTEST POSSIBLE CONDUCTOR LENGTH MAY BE USED. FILTER SHOULD BE MOUNTED TO ALLOW MAXIMUM SEPARATION BETWEEN INPUT AND OUTPUT WIRING.

- Filter contains no position-oriented components and can be mounted upside down or sideways.
- Filter should be placed in electrical circuit so that it is the last device in the circuit before equipment to be protected.
- Suitable for use on a circuit capable of delivering not more than 5000 rms symmetrical Amperes when protected by a circuit breaker rated: Circuit Breaker Ratings of 15A, 240/415V, 10kA Min. AIC Rating. 3
  - Contains no serviceable parts.

1.2 Installation

 FILTER MUST BE CONNECTED TO ELECTRICAL SYSTEM WITH A CIRCUIT BREAKER:

For AC Applications

  - Note: Pre-existing breakers of the rated load size may be utilized if provisions for multi-conductor connections are made according to NEC 110-14A.
  - If Neutral wire is to be utilized as L2, then a circuit breaker must be provided for that phase.

For DC Applications

- DC units to be installed after an overcurrent protective device that is rated not to exceed 100% of the current rating of the unit.

REMOVE POWER FROM ELECTRICAL SYSTEM BEFORE INSTALLING FILTER.

Mechanically mount filter.

- Mount filter using mounting flange holes or optional DIN bracket listed below.
- Filter should be mounted to allow maximum separation between input and output wiring.
- Filter contains no position-oriented components and can be mounted upside down or sideways.
- Filter should be placed in electrical circuit so that it is the last device in the circuit before equipment to be protected.

1.2.1 DIN Rail Kits

Mounting bracket and foot adaptable to DIN Rail systems DIN EN 50022. DIN EN 50035 and DIN EN 50045 are available through Eaton Order Center and can be ordered separately.

- Eaton Cat# DINRAILKIT-10ACF
- Eaton Innovative Technology Cat# DINRAILKIT-10ITCF
1.3 Wiring

**NOTICE**

AN INSULATED GROUNDING CONDUCTOR THAT IS IDENTICAL IN SIZE AND INSULATION MATERIAL AND THICKNESS TO THE GROUNDED AND UNGROUNDED CIRCUIT SUPPLY CONDUCTORS, EXCEPT THAT IT IS GREEN WITH OR WITHOUT ONE OR MORE YELLOW STRIPES, IS TO BE INSTALLED AS PART OF THE CIRCUIT THAT SUPPLIES THE FILTER. SEE TABLE 250-122 OF THE NATIONAL ELECTRIC CODE (NEC) REGARDING THE APPROPRIATE SIZE OF THE GROUNDING CONDUCTOR.

THE GROUNDING CONDUCTOR IS TO BE GROUNDED TO EARTH AT THE SERVICE EQUIPMENT OR OTHER ACCEPTABLE BUILDING EARTH GROUND SUCH AS THE BUILDING FRAME IN THE CASE OF HIGH-RISE STEEL FRAME STRUCTURE.

ANY ATTACHMENT-PLUG RECEPTACLES IN THE VICINITY OF THE FILTER ARE TO BE GROUNDED TYPE, AND THE GROUNDING CONDUCTORS SERVING THESE RECEPTACLES ARE TO BE CONNECTED TO EARTH GROUND AT THE SERVICE EQUIPMENT OR OTHER ACCEPTABLE BUILDING EARTH GROUND SUCH AS THE BUILDING FRAME IN THE CASE OF HIGH-RISE STEEL FRAME STRUCTURE.

PRESSURE TERMINAL OR PRESSURE SPlicing CONNECTORS AND SOLDERING LUGS USED IN THE INSTALLATION OF THE FILTER SHALL BE IDENTIFIED AS BEING SUITABLE FOR THE MATERIAL OF THE CONDUCTORS. CONDUCTORS OF DISSIMILAR METALS SHALL NOT BE INTERMIXED IN A TERMINAL OR SPlicing CONNECTOR WHERE PHYSICAL CONTACT OCCURS BETWEEN DISSIMILAR CONDUCTORS UNLESS THE DEVICE IS IDENTIFIED FOR THE PURPOSE AND CONDITIONS OF USE.

CONDUCTORS SHOULD BE TWISTED TOGETHER TO REDUCE IMPEDANCE FACTOR. EXCESSIVE WIRE LENGTH AND SHARP BENDS DEGRADE FILTER PERFORMANCE; THEREFORE, AVOID EXCESSIVE WIRE LENGTH AND SHARP BENDS.

### 1.3.1 Series Wired Applications

- Connect incoming system **GROUND** wire to terminal labeled **GND** on unprotected end (labeled as **LINE**).
- Connect load side **GROUND** wire to terminal labeled **GND** on protected end (labeled as **EQUIPMENT**).

**For AC Applications**

- Connect incoming system **NEUTRAL** wire to terminal labeled **L2/NEU** on unprotected end (labeled as **LINE**).
- Connect load side **NEUTRAL** wire to terminal labeled **L2/NEU** on protected end (labeled as **EQUIP**).
- Connect incoming system **HOT** wire to terminal labeled **L1** on unprotected end (labeled as **LINE**).
- Connect load side **HOT** wire to terminal labeled **L1** on protected end (labeled as **EQUIP**).

**For DC Applications**

- Connect incoming system **NEGATIVE** wire to terminal labeled **L2/NEU** on unprotected end (labeled as **LINE**).
- Connect load side **NEGATIVE** wire to terminal labeled **L2/NEU** on protected end (labeled as **EQUIP**).
- Connect incoming system **POSITIVE** wire to terminal labeled **L1** on unprotected end (labeled as **LINE**).
- Connect load side **POSITIVE** wire to terminal labeled as **L1** on protected end (labeled as **EQUIP**).

### 1.3.2 Parallel Wired Applications

- Connect incoming system **GROUND** wire to terminal labeled **GND** on unprotected end (labeled as **LINE**).

**For AC Applications**

- Connect incoming system **NEUTRAL** wire to terminal labeled **L2/NEU** on unprotected end (labeled as **LINE**).
- Connect incoming system **HOT** wire to terminal labeled **L1** on unprotected end (labeled as **LINE**).

**For DC Applications**

- Connect incoming system **NEGATIVE** wire to terminal labeled **L2/NEU** on unprotected end (labeled as **LINE**).
- Connect incoming system **POSITIVE** wire to terminal labeled **L1** on unprotected end (labeled as **LINE**).

**Note:** For ungrounded or isolated control transformer secondary, DO NOT CONNECT Ground terminal on either LINE or EQUIP side.

### 1.4 Apply Power

Apply power to system. Indicator light should glow. If light does not glow, remove power and contact supplier.

1.6 Warranty

Eaton warrants these products for a period of 5 years from the date of delivery to the purchaser, 10 years if registered on www.eaton.com/spd, to be free from defects in both workmanship and materials. Eaton assumes no risk or liability for results of the use of the products purchased from it, including but without limiting the generality of the foregoing; (1) The use in combination with any electrical or electronic components, circuits, systems, assemblies, or any other materials or substances; (2) Unsuitability of any product for use in any circuit or assembly.

Purchaser’s right under the warranty shall consist solely of requiring Eaton to repair, or at Eaton’s sole discretion, replace, free of charge, F.O.B. factory, and defective items received at said factory or failure to give any advice or recommendations by Eaton shall not constitute any warranty by or impose any liability upon Eaton. The foregoing constitutes the sole and exclusive liability of Eaton AND IS IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED, IMPLIED OR STATUTORY AS TO THE MERCHANTABILITY, FITNESS FOR PURPOSE SOLD, DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER.

In no event shall Eaton be liable for special or consequential damages or for delay in performance of the warranty.

This warranty does not apply if the product has been misused, abused, altered, tampered with, or used in applications other than specified on the nameplate. At the end of the warranty period, Eaton shall be under no further warranty obligation expressed or implied.

The product covered by this warranty certificate can only be repaired or replaced by the factory. For help on troubleshooting the Critical Protection Product, or for warranty information, call 1-800-809-2772, Option 4, sub-option 2. Repair or replacement units will be returned collect. If Eaton finds the return to be a manufacturer’s defect, the product will be returned prepaid.
