**WARNING**

HAZARDOUS VOLTAGES PRESENT

IMPROPER INSTALLATION OR MISAPPLICATION OF THESE DEVICES MAY RESULT IN SERIOUS INJURY TO INSTALLER AND/OR DAMAGE TO ELECTRICAL SYSTEM OR RELATED EQUIPMENT. READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION. PROTECTIVE EYE WEAR SHOULD BE WORN WHENEVER WORKING AROUND HAZARDOUS VOLTAGES.

**NOTE**

ALL INSTRUCTIONS AND MEASUREMENTS MUST BE COMPLETED BY A LICENSED/QUALIFIED ELECTRICIAN IN ACCORDANCE WITH THE U.S. NATIONAL ELECTRICAL CODE, STATE AND LOCAL CODES AND STATE AND LOCAL REQUIREMENTS (OR OTHER APPLICABLE COUNTRY CODES) SUPERSEDE THIS INSTRUCTION.

¹UL1449 4th Edition does not list SPD products rated less than 100Vac or DC voltages.

1. **Setup**

Verify system voltages do not exceed those listed in Section 1.5, Specifications.

- All AC measurements should be completed with an RMS voltmeter.
- All DC measurements should be completed with a DC voltmeter.
- DO NOT INSTALL FILTER IF MEASURED VOLTAGE EXCEEDS MAXIMUM OPERATING LIMITS.

Choose location for filter installation so that maximum separation can be maintained between input leads, output leads and ground leads.

1.1 **Before Installation**

REMOVE POWER FROM ELECTRICAL SYSTEM BEFORE MOUNTING FILTER.

- Filter MUST be mounted within enclosure to assure personnel safety from exposed terminals.

**IMPORTANT:**

FILTER SHOULD BE LOCATED SO THAT THE SHORTEST POSSIBLE CONDUCTOR LENGTH MAY BE USED.

- Filter should be mounted to allow maximum separation between input and output wiring.
- Filter contains no position-oriented components and can be mounted upside down or sideways.
- Filter should be placed in electrical circuit so that it is the last device in the circuit before equipment to be protected.

1.2 **Installation**

FILTER MUST BE CONNECTED TO ELECTRICAL SYSTEM WITH A CIRCUIT BREAKER:

**Note:** Pre-existing breaker(s) of the rated load size may be utilized if provisions for multi-conductor connections are made according to N.E.C. 110-14A.

- If Neutral wire is to be utilized as L2/NEU, then circuit breaker should be provided for that phase.

REMOVE POWER FROM ELECTRICAL SYSTEM BEFORE INSTALLING FILTER.

Mechanically mount filter.

- Mount filter using mounting flange holes or optional DIN bracket listed below.
- Filter should be mounted to allow maximum separation between input and output wiring.
- Filter should be placed in electrical circuit so that it is the last device in circuit before equipment to be protected.

1.2.1 **DIN Rail Kits**

Mounting bracket and foot adaptable to DIN Rail systems DIN EN 50022, DIN EN 50035 and DIN EN 50045 are available through Eaton Order Center and can be ordered separately.

For 15A and 30A devices:

- Eaton Cat# DINRAILKIT-30ACF
- Eaton Innovative Technology Cat# DINRAILKIT-30ITCF

For 60A devices:

- Eaton Cat# DINRAILKIT-60ACF
- Eaton Innovative Technology Cat# DINRAILKIT-60ITCF

1.3 **Wiring**

AN INSULATED GROUNDING CONDUCTOR THAT IS IDENTICAL IN SIZE AND INSULATION MATERIAL AND THICKNESS TO THE GROUNDED AND UNGROUNDED CIRCUIT SUPPLY CONDUCTORS, EXCEPT THAT IT IS GREEN WITH OR WITHOUT ONE OR MORE YELLOW STRIPES, IS TO BE INSTALLED AS PART OF THE CIRCUIT THAT SUPPLIES THE FILTER. SEE TABLE 250-122 OF THE NATIONAL ELECTRIC CODE (NEC) REGARDING THE APPROPRIATE SIZE OF THE GROUNDED CONDUCTOR.

THE GROUNDING CONDUCTOR IS TO BE GROUNDED TO EARTH AT THE SERVICE EQUIPMENT OR OTHER ACCEPTABLE BUILDING EARTH GROUND SUCH AS THE BUILDING FRAME IN THE CASE OF HIGH-RISE STEEL FRAME STRUCTURE.

ANY ATTACHMENT-PLUG RECEPTACLES IN THE VICINITY OF THE FILTER ARE TO BE GROUNDING TYPE, AND THE GROUNDED CONDUCTORS SERVING THESE RECEPTACLES ARE TO BE CONNECTED TO EARTH GROUND AT THE SERVICE EQUIPMENT OR OTHER ACCEPTABLE BUILDING EARTH GROUND SUCH AS THE BUILDING FRAME IN THE CASE OF HIGH-RISE STEEL FRAME STRUCTURE.

PRESSURE TERMINAL OR PRESSURE SPLICING CONNECTORS AND SOL- DERING LUGS USED IN THE INSTALLATION OF THE FILTER SHALL BE IDENTIFIED AS BEING SUITABLE FOR THE MATERIAL OF THE CONDUCTORS. CONDUCTORS OF DISSIMILAR METALS SHALL NOT BE INTERMIXED IN A TERMINAL OR SPLICING CONNECTOR WHERE PHYSICAL CONTACT OCCURS BETWEEN DISSIMILAR CONDUCTORS UNLESS THE DEVICE IS IDENTIFIED FOR THE PURPOSE AND CONDITIONS OF USE.
1.3.1 Series Wiring Applications

- Connect incoming system GROUND wire to terminal labeled GND on unprotected end (labeled as LINE).
- Connect load side GROUND wire to terminal labeled GND on protected end (labeled as EQUIP).

For AC Applications

- Connect incoming system NEUTRAL wire to terminal labeled L2/NEU on unprotected end (labeled as LINE).
- Connect load side NEUTRAL wire to terminal labeled as L2/NEU on protected end (labeled as EQUIP).
- Connect incoming system HOT wire to terminal labeled L1 on unprotected end (labeled as LINE).
- Connect load side HOT wire to terminal labeled as L1 on protected end (labeled as EQUIP).

For DC Applications

- Connect incoming system NEGATIVE wire to terminal labeled L2/NEU on unprotected end (labeled as LINE).
- Connect load side NEGATIVE wire to terminal labeled as L2/NEU on protected end (labeled as EQUIP).
- Connect incoming system POSITIVE wire to terminal labeled L1 on unprotected end (labeled as LINE).
- Connect load side POSITIVE wire to terminal labeled as L1 on protected end (labeled as EQUIP).

1.3.2 Parallel Wiring Applications

**IMPORTANT:**

FILTER SHOULD BE LOCATED SO THAT THE SHORTEST POSSIBLE CONDUCTOR LENGTH MAY BE USED. CONDUCTORS SHOULD BE TWISTED TOGETHER TO REDUCE IMPEDANCE FACTOR. EXCESSIVE WIRE LENGTH AND SHARP BENDS DEGRADE FILTER PERFORMANCE; THEREFORE, AVOID EXCESSIVE WIRE LENGTH AND SHARP BENDS.

- Connect incoming system GROUND wire to terminal labeled GND on unprotected end (labeled as LINE).

For AC Applications

- Connect incoming system NEUTRAL wire to terminal labeled L2/NEU on unprotected end (labeled as LINE).
- Connect incoming system HOT wire to terminal labeled L1 on unprotected end (labeled as LINE).

For DC Applications

- Connect incoming system NEGATIVE wire to terminal labeled L2/NEU on unprotected end (labeled as LINE).
- Connect incoming system POSITIVE wire to terminal labeled L1 on unprotected end (labeled as LINE).

Note: For ungrounded or isolated control transformer secondary, DO NOT CONNECT Ground terminal on either LINE or EQUIP side.

1.4 Apply Power

Apply power to system. Indicator light(s) should glow and alarm contacts should move to normal state. If the light does not glow, remove power and contact supplier.

1.6 Warranty

Eaton warrants these products for a period of 5 years from the date of delivery to the purchaser, 10 years if registered on www.eaton.com/spd, to be free from defects in both workmanship and materials. Eaton assumes no risk or liability for results of the use of the products purchased from it, including but without limiting the generality of the foregoing; (1) The use in combination with any electrical or electronic components, circuits, systems, assemblies, or any other materials or substances; (2) Unsuitability of any product for use in any circuit or assembly.

Purchaser's right under the warranty shall consist solely of requiring Eaton to repair, or at Eaton's sole discretion, replace, free of charge, F.O.B. factory, and defective items received at said factory or failure to give any advice or recommendations by Eaton shall not constitute any warranty by or impose any liability upon Eaton. The foregoing constitutes the sole and exclusive liability of Eaton AND IS IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED, IMPLIED OR STATUTORY AWS TO THE MERCHANTABILITY, FITNESS FOR PURPOSE SOLD, DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER.

In no event shall Eaton be liable for special or consequential damages or for delay in performance of the warranty.

This warranty does not apply if the product has been misused, abused, altered, tampered with, or used in applications other than specified on the nameplate. At the end of the warranty period, Eaton shall be under no further warranty obligation expressed or implied.

The product covered by this warranty certificate can only be repaired or replaced by the factory. For help on troubleshooting the Critical Protection Product, or for warranty information, call 1-800-809-2772, Option 4, sub-option 2. Repair or replacement units will be returned collect. If Eaton finds the return to be a manufacturer's defect, the product will be returned prepaid.
