Protect eyes, nose and mouth with one face shield

Eaton is committed to meeting your critical needs. At a time when personal protection is crucial, we can help. Designed with safety at the forefront, Eaton’s face shield protects from exposure to potentially harmful substances. Easy to clean and sanitize between uses, the face shield is also fully-adjustable and includes foam straps for maximum comfort.
Eaton’s face shield is designed to provide protection for eyes, nose and mouth, all with just one product. While additional personal protective equipment (PPE) can still be worn, the face shield offers a reusable product with maximum comfort.

We know you want to provide your employees with the right protective gear, and we’re here to help. Because we make safe and sound work.

Features:
- Covers a larger portion of the face than wearing only a face mask
- Foam cushioning between strap and skin enhances comfort during extended use
- Clearance between the face and shield reduces fogging and heat
- Helps protect against splashes, sprays and splatter of bodily fluids
- Can be worn with other face/eye PPE
- Visor is made from scratch-resistant materials
- Easy to clean and sanitize for re-use

Cleaning:
- Clean each part regularly based on best practices outlined by your organization or the CDC

Technical specifications:
- Width: 15.5 in (394 mm)
- Height: 11.25 in (285.75 mm)
- Headband material: Polypropylene
- Visor thickness: 0.02 in (0.5 mm)
- Visor material: Polyethylene Terephthalate Glycol (PETG) or Polycarbonate (PC)
- Polycarbonate visor meets ANSI/ISEA Z87.1-2015 requirement for Standard (Non-Impact) Rated face shields with D3 product marking for splash and droplet
- Visor is replaceable as a standalone item (see table below for details)
