1. The CT shorting block (G01 and G02), is used to short out metering CT’s. The CT shorting block is located in the top cutout.

2. The jumper block (G02 and G03), is used for cell to cell wiring or header wiring. The jumper block is in the bottom cutout.

Step 1: To assemble CT shorting block and jumper block.

Step 2: Push down on the block until all the clips snap into place on the inside of the cassette.

Instructions for Installation and Wiring of 1B93094, CT Shorting Block and Jumper
