Magnum narrow frame cassette rejection bracket kit

⚠️ WARNING
(1) ONLY QUALIFIED ELECTRICAL PERSONNEL SHOULD BE PERMITTED TO WORK ON THE EQUIPMENT.
(2) ALWAYS DE-ENERGIZE PRIMARY AND SECONDARY CIRCUITS IF A CIRCUIT BREAKER CANNOT BE REMOVED TO A SAFE WORK LOCATION.
(3) DRAWOUT CIRCUIT BREAKERS SHOULD BE LEVERED (RACKED) OUT TO THE DISCONNECT POSITION.
(4) ALL CIRCUIT BREAKERS SHOULD BE SWITCHED TO THE OFF POSITION AND MECHANISM SPRINGS DISCHARGED.
FAILURE TO FOLLOW THESE STEPS FOR ALL PROCEDURES DESCRIBED IN THIS INSTRUCTION LEAFLET COULD RESULT IN DEATH, BODILY INJURY, OR PROPERTY DAMAGE.

Section 1: General information
Magnum™ drawout circuit breakers come in a variety of continuous current and interrupting ratings. To prevent the insertion of a drawout circuit breaker into a cassette with which it is incompatible, rejection interlock key plates are provided for both the circuit breaker and the cassette. As the breaker is pushed into the cassette, the interlock pins on the breaker move past the pins in the cassette if they are compatible.

Section 2: Installation of rejection bracket
To install the rejection bracket, proceed with the following three steps:

**Step 1:** Align the supplied bracket as shown, and fasten to the floor of the cassette with two supplied M6 x 10 thread-forming screws. Torque to 8–10 ft-lbs (10.5–13 Nm). Refer to Step 2 for a three-pole cassette or Step 3 for a four-pole cassette.

**Note:** Do not install the bracket for the 40/42 kA rating (MWN4___ or MDN4___).

![Figure 1. Step 1](image-url)
Step 2: Position the bracket and hardware as shown for a three-pole cassette.

Figure 2. Step 2

Step 3: Position the bracket and hardware as shown for a four-pole cassette.
