

Power Defense™ Molded Case Circuit Breakers

# What will you build? And how will you defend it?

# EATON

*Powering Business Worldwide*

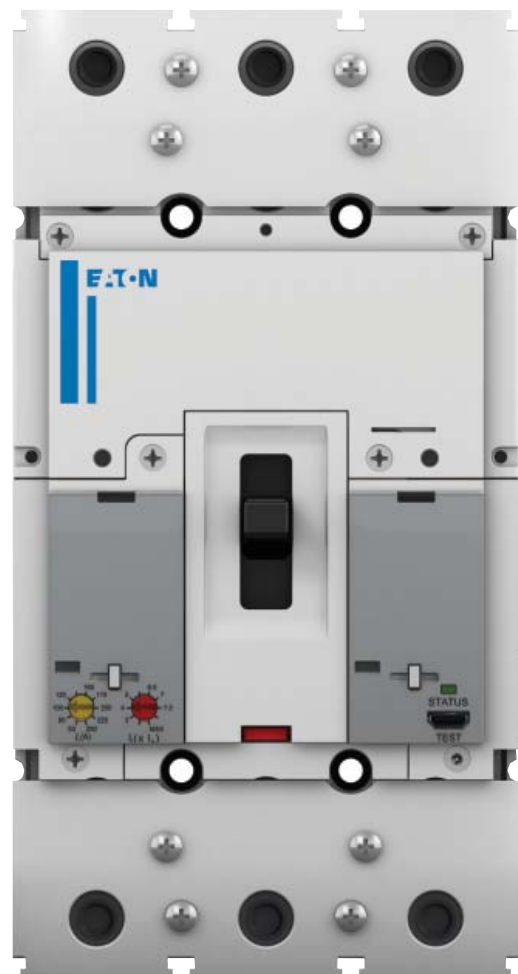

A globally rated platform from Eaton.

**Power  
Defense**

**Some people are able to see beyond what meets the eye: they look at an empty lot, an aging factory or a blank screen and see the potential to create something new through hard thinking and even harder work. They are the makers. The builders. The creators.**

Eaton will help you protect what you create with our new, globally rated Power Defense™ molded case circuit breakers (MCCBs). Whether you're building production capacity, your legacy, or the newest addition to a city's skyline, the Power Defense MCCBs will serve as guardian and protector as your ideas take shape in concrete and steel.

**Power Defense molded  
case circuit breakers,  
a globally rated  
platform from Eaton.**

## PROTECTED

The Power Defense MCCBs are the perfect fit for the energy distribution system of your commercial building, shop floor or other infrastructure. **They are designed to meet the requirements for safeguarding your applications,** including thermal magnetic and electronic protection from 16 A to 1,000 A, and safe and reliable fault-current interruption up to 70 kA at 415 V AC. In addition, the Power Xpert Release electronic trip units are equipped with the latest microprocessor technology, providing enhanced connectivity and LI protection.

## CONNECTED

Power Defense MCCBs with Power Xpert Release electronic trip units feature **build-in communications via USB to the PXPM Software.**

Eaton's Power Xpert Protection Manager (PXPM) provides a clean, intuitive user interface enabling unmatched control, testing and troubleshooting of the Power Xpert Release (PXR) electronic trip unit in Power Defense molded case circuit breakers, digital NZM molded case circuit breakers, and series IZMX power air circuit breakers.

### Features;

- An enhanced user interface enables engineers to remotely view and adjust the trip unit's programmable settings.
- Real-time data: Provides information regarding all status and metered data direction from the trip unit.

## GLOBAL

The Power Defense MCCBs are certified to meet local requirements while empowering you to build and design systems that can be used anywhere in the world. The Power Defense MCCBs can be found wherever Eaton does business, backed by our global support and fulfillment network, with the right resources in place to minimize project lead-times and maximize uptime.

Integrating new products can be a challenge, which is why the Power Defense MCCBs come with an online product selector, instructions and support: **tools that will help you engineer and deliver your projects quickly, ultimately improving your bottom line.**

**Our defense is  
your best offense.**

With our Power Defense MCCBs, you are getting the latest protection technology, engineered and tested for the future - not to mention Eaton's best-in-class support and service. Free yourself and your customers from safety concerns and gain the sort of assurance that allows your people to move and plan with confidence. That's why our defense is your best offense.
