Padlockable Handle Lock

CAUTION: The handle lock is not designed to be removed once installed. Removal will cause loss of clamping force of damage to handle lock & circuit breaker escutcheon.

Instructions:
1. Align the handle lock on the circuit breaker with Padlockable on the left side of handle.
2. Press down on Line and Load side ends while ensuring tabs of lock engage with primary cover escutcheon.
3. (Optional) Insert self-tapping screw through notch in the line end of base.
