1) Position terminal shield into load or line of breaker as shown. For installation on the line end of GD devices, the flapper shields must be moved to clear the terminal shield.

2) Insert lexan screw and tighten.

Cutler-Hammer is not liable for the misapplication of misinstallation of its products.

**WARNING**

Do not attempt to install or perform maintenance on equipment while it is energized. Severe personal injury, death, or substantial property damage can result from contact with energized equipment. Always verify that no voltage is present before proceeding with the task, and always follow generally accepted safety procedures.
