**Before You Begin**

Before installing Profile locking core skin panels, it is recommended that you familiarize yourself with the steps outlined in the installation procedure.

**Tools Required**

The following tools are required when installing Profile locking core skin panels:

- Power wrench-drill;
- #18 Drill Bit;
- #2 Phillips head screwdriver.
Installation Procedure

To install Profile locking core skin panels, do the following:

1. Position and center the lock bracket under the core top channel assembly.

2. Align flange on lock bracket flush with the edge of the top channel assembly, as shown below.

3. Use the lock bracket as a template to mark holes for drilling. Then drill two 11/64” holes using a #18 drill bit.
4. Using a #2 Phillips screwdriver, attach the lock bracket to the core with two #10-24 x 3/8” Phillips, pan-head, black oxide, thread forming screws (PN 66714).

5. Attach removable locking core skin panel to core and lock into place, as shown below.

This procedure is complete.
