

Stackable shelves

Please read these instructions carefully and follow the installation steps in sequence.

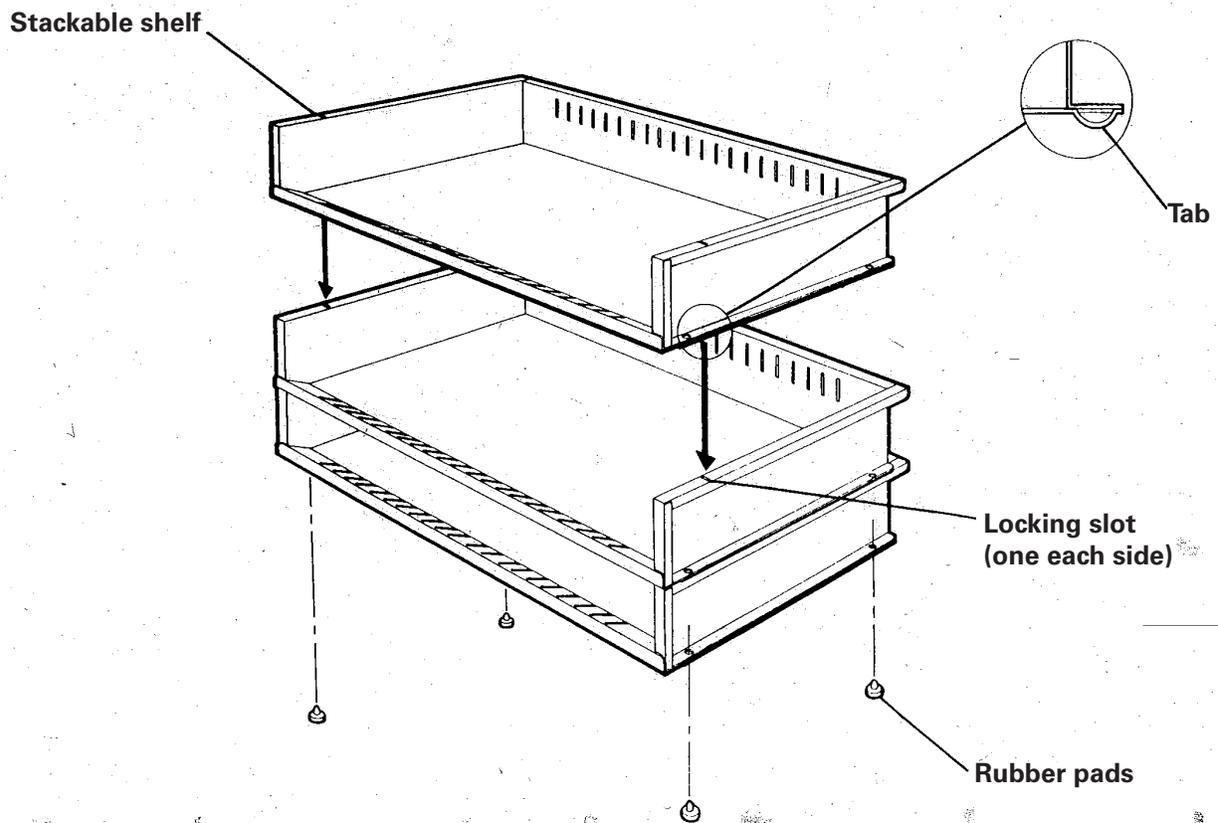

If the Stackable Shelves are to begin on the bottom of the cabinet, place (4) rubber pads (provided) into the (4) holes in the bottom of the first tray.

For any other position in the cabinet, the mounting brackets (purchased separately) are installed at the chosen starting level. The rubber pads are not used when using brackets.

NOTE: If the stack tends to lean back, two rubber pads may be installed at the rear only of the first shelf.

When installing each level onto the previous level (or the mounting bracket) be sure the tab in the bottom of each shelf engages the slot in the top of the one it is stacked on.

CAUTION: The stackable shelves are not designed to be stacked higher than FIVE levels on a pair of brackets. If more are required, install a second pair of #UM38-FP Mounting Brackets.
