Installation Instructions for PSG240F POWER SUPPLY

READ INSTRUCTIONS BEFORE INSTALLING OR OPERATING THIS DEVICE. KEEP FOR FUTURE REFERENCE.

1. Safety instructions
   • Switch main power off and wait 5 minutes before making any connection or disconnection on the device. Danger of explosion!
   • Dangerous voltage present for at least 5 minutes after disconnecting all sources of power.
   • For sufficient convection cooling keep a distance of 50 mm above and below the device as well as a lateral distance of 20 mm to other units.
   • The enclosure of the device can become very hot depending on the ambient temperature and load of the power supply. Risk of burn!
   • Do not introduce any objects into the unit!

2. Device description (Fig. 1)
   (1) Input terminal block connector
   (2) Output terminal block connector
   (3) DC voltage adjustment potentiometer
   (4) DC OK control LED (green)
   (5) Universal mounting rail system

3. Mounting (Fig. 2)
   The power supply unit can be mounted on 35 mm DIN rails in accordance with EN 60715. Each device is delivered ready to install.
   Snap on the DIN rail as shown in Fig. 2:
   1. Tilt the unit slightly upwards and put it onto the DIN rail.
   2. Push downwards until stopped.
   3. Press against the bottom front side for locking.
   4. Shake the unit slightly to ensure that it is secured.

4. Removal (Fig. 3)
   To uninstall, pull or slide down the latch as shown in Fig. 3. Then, slide the PSU in the opposite direction, release the latch and pull out the PSU from the rail.

5. Connection
   The terminal block connectors allow easy and fast wiring. A plastic cover provides the necessary isolation of the electric connection.
   Use flexible (stranded wire) or solid cables 0.82-8.4 mm² (AWG 18-8) and torque of 1.18-1.57 Nm (10.41-13.89 lb in). The insulation stripping length should be 7 mm.
   In accordance to EN 60950 / UL 60950, flexible cables require ferrules.
   Use copper wire that is designed to sustain operating temperature of 75°C or more to fulfill UL requirements.

   5.1. Input connection (Fig. 1 and Fig. 5)
   Use L1, L2, L3 and PE connections of input terminal connector (see Fig. 5) to establish the 3 x 400-500 VAC connection.
   In the event of a phase failure, unrestricted operation is possible with nominal capacity.
   The device has an internal fuse. 3 x power circuit-breakers 6 A, 10 A or 16 A are recommended as backup fuses.
   The internal fuse must not be replaced by the user.
   In case of internal defect, Please call 1- 877- ETN – CARE

   5.2. Output connection (Fig. 1 (2))
   Use the ‘+’ and ‘−’ screw connections to establish the 24 VDC connection. The output provides 24 VDC. The output voltage can be adjusted from 22 to 28 VDC on the potentiometer. The green LED DC OK displays correct function of the output (Fig. 1 (4)).
   The device has a short circuit and overload protection and an over voltage protection limited to 35 VDC.

   5.3. Output characteristic curve
   The device functions normal under operating line and load conditions. In the event of a short circuit or over load the output voltage and current collapses (I_{OC} or I_{OL} < I_{surg} (150%)). The secondary voltage is reduced and bounces until short circuit or over load on the secondary side has been removed.

   5.4. Thermal behavior (Fig. 6)
   In the case of ambient temperatures above +50°C, the output capacity has to be reduced by 2.5% per increase in temperature. If the output capacity is not reduced when T_{Amb} > 50 °C device will run into thermal protection by switching off i.e. device will go in bouncing mode and will recover when ambient temperature is lowered or load is reduced as far as necessary to keep device in working condition.

   FOR TECHNICAL ASSISTANCE CALL 1 - 877- ETN – CARE
## TECHNICAL DATA FOR PSG240F

### Input (AC)
- **Nominal input voltage**: 3 x 400-500 VAC
- **Voltage range**: 320-575 VAC (DC input range 450-800 VDC)
- **Frequency**: 47-63 Hz (0 Hz @ DC input)
- **Nominal current**: 0.8 A @ 400 VAC approx.
- **Inrush current limitation**: $I_{\text{t}} (+25 \, ^\circ\text{C})$ typ. <40 A (typical) @ 400 VAC
- **Mains buffering at nominal load**: > 35 ms @ 3 x 400 VAC , > 60 ms @ 3 x 500 VAC
- **Turn-on time**: < 1 sec.
- **Internal fuse**: 3.15 AH / 500 V
- **Recommended backup fuse**: 3 x circuit breakers 6 A, 10 A or 16 A
- **Power circuit-breaker characteristic**: B
- **Leakage current**: < 3.5 mA

### Output (DC)
- **Nominal output voltage UN / tolerance**: 24 VDC ± 2 %
- **Adjustment range of the voltage**: 22-28 VDC
- **Nominal current**: 10 A
- **Derating above +50 °C**: 2.5 % / K. (> 70 °C 4 % / K.)
- **Startup with capacitive loads**: Max. 10,000 µF
- **Max. power dissipation idling / nominal load approx.**: 36 W
- **Efficiency (at 400V AC and nominal values)**: >87% @ 3 x 400 VAC, > 86 % @ 3 x 500 VAC
- **Residual ripple/ peak switching (20 MHz) (at nominal values)**: < 50 mV / < 240 mVpp
- **Parallel operation**: With oring diode

### General Data
- **Type of housing**: Aluminium (Al5052)
- **Signals**: Green LED DC OK
- **MTBF**: > 300,000 hrs.
- **Dimensions (L x W x H)**: 121 mm x 85 mm x 120.5 mm
- **Weight**: 0.99 kg
- **Connection method**: Screw connection
- **Stripping length**: 7 mm or use suitable lug to crimp
- **Operating temperature**: -20 °C to +75°C (> 50°C derating)
- **Storage temperature**: -25 °C to +85°C
- **Humidity at +25 °C, no condensation**: < 95 % RH
- **Vibration (operating)**: 10 to 150 Hz, 0.35 mm acc. 50 m / s², single amplitude (5 G max.) for 90 min. in each X, Y & Z directions, in acc. with IEC 68-2-6
- **Pollution degree**: 2
- **Climatic class**: 3K3 according to EN 60721

### Certification and Standards
- **Electrical equipments of machines**: IEC60204-1 (over voltage category III)
- **Electronic equipment for use in electrical power installations**: EN50178 / IEC62103
- **Safety entry low voltage**: PELV (EN60204), SELV (EN60950)
- **Electrical safety (of information technology equipment)**: EN60950-1 (GS-mark), UL/C-UL recognized to UL60950-1, CSA C22.2 No. 60950-1, CB scheme to IEC60950-1, cCSAsus to UL60950-1 and CSA C22.2 No.60950-1 (file no.181564)
- **Industrial control equipment**: UL listed to UL508, CSA to CSA107.1-01 (File no.181564)
- **Protection against electric shock**: DIN57100-410
- **CE**: In conformance with EMC directive 2004/108/EC and low voltage directive 2006/95/EC.
- **ITE**: EN55022,EN61000-3-2,EN61000-3-3, EN55024
- **Industrial**: EN55011
- **Limitation of mains harmonic currents**: EN61000-3-2 CLASS A Limit
- **RoHS Compliant**: Yes

### Safety and Protection
- **Transient surge voltage protection**: VARISTOR
- **Current limitation at short-circuits approx.**: $I_{\text{surge}} = 150 \%$ of $P_{\text{max}}$ typically
- **Surge voltage protection against internal surge voltages**: Yes
- **Isolation voltage**: Input / output (type test/routine test) 4 kVAC / 3 kVAC
- **Input / PE (type test/routine test)**: 1.5 kVAC / 1.5 kVAC
- **Output / PE (type test/routine test)**: 1.5 kVAC / 500 VAC
- **Protection degree**: IPX0
- **Safety class**: Class I with PE connection
- **Shock (in all directions)**: 30 G (300 m/s²) in all directions according to IEC 68-2-27
