When the Transfer Switch IS used as a Service Entrance.

If this Transfer Switch IS to be used as Service Entrance, apply the “Service Disconnect” label adjacent to the keyed selector switch in the space provided. Follow the steps shown below. If this Transfer Switch IS NOT to be used as Service Entrance, see page 2.

Step 1: Remove the bag from the keyed selector switch.

Step 2: Remove the “Service Disconnect” label from the bag. Discard the other label, it will not be used.

Step 3: Remove backing covering the adhesive on the back of the label.

Step 4: Apply the “Service Disconnect” label as shown.
When the Transfer Switch IS NOT used as a Service Entrance.

If this Transfer Switch IS NOT to be used as Service Entrance, apply the “Disconnect” label adjacent to the keyed selector switch in the space provided. Follow the steps below.

**Step 1:** Remove the bag from the keyed selector switch.

**Step 2:** Remove the “Disconnect” label from the bag. Discard the other label, it will not be used.

**Step 3:** Remove backing covering the adhesive on the back of the label.

**Step 4:** Apply the “Disconnect” label as shown.
