The only explosionproof VFD solution utilizing a NEMA 7 classified enclosure

ACE10 explosionproof VFDs are highly flexible AC drives designed specifically for hazardous area locations. These drives can be mounted next to the motor in the classified area, providing significant installation cost savings - along with the traditional VFD benefits of energy savings, speed and torque control and system diagnostics.

This innovative product features the first ever NEMA 7 enclosure with active cooling, allowing the solution to be rated Class I, Divisions 1 and 2. It is designed to match the high requirements of pumps, compressors, fans, separators and mixers in the following process industries:

- Oil and gas/refineries
- OEM skid builders
- Petrochemical
- Water/waste water
- Pharmaceutical
- Food and beverage manufacturing

Applications:
- For speed control of pumps, compressors, fans, conveyors, separators, mixers and other process equipment
- Designed to meet the high reliability and safety requirements of process industries such as oil and gas, chemical and mining

Features:
- ACE explosionproof VFDs are installed ‘on-machine’ inside the hazardous areas, eliminating expensive, complicated installations
- There is no need to run long lines of conduit and motor cable, dig up roadways and sidewalks, navigate around obstacles and hazards or build off-site control rooms in non-hazardous areas to house VFD clusters
- Reflected Wave Syndrome is eliminated due to short motor cable runs

Certifications and compliances:
UL classified:
- Class I, Divisions 1 & 2, Groups B, C, D

cUL classified:
- Class I, Divisions 1 & 2, Groups B•, C, D

UL standard:
- UL1203

Environmental ratings:
- NEMA 3, 4X, 7BCD
- Raintight
- Wet locations

Operating temperature range:
- -10°C to 50°C (14°F to 122°F)

Standard materials and finishes:
- Body and cover – copper-free aluminum, epoxy powder coated
- Operating handle – copper-free aluminum, epoxy painted
- Window – tempered soda lime glass
- Blower – aluminum, natural
- Filters – stainless steel, natural
- Pre-filters – stainless steel, natural
- Disconnect – stainless steel, natural
- Shroud – copper-free aluminum, epoxy painted
- Cover hinges, bolts, washers and springs – stainless steel, natural
- Internal brackets – stainless steel, natural
- Manifold and intake – EPDM rubber, natural

Horsepower ratings:
- Available from 1.5 to 60 HP

VFD system specifications:
- ABB low voltage, compact AC drives:
  - ABB ACS880-M04 series
ACE10 explosionproof variable frequency drives
Utilizes ABB ACS880-M04 drives

1.5 to 60 HP

Variable Frequency Drive (VFD) in explosionproof enclosure allows installation in classified area, providing significant installation savings.

Fused disconnect.

Internal and external grounding lugs.

Shroud\(\) covering top filters maintains NEMA 4X rating.

Stainless steel hinges provide convenient and easy access to enclosure interior.

Explosionproof window allows for viewing of the VFD interface module LCD screen.

Explosionproof pilot lights provide run, stop and alarm indication.

Explosionproof keypad allows operation of VFD interface module without opening the enclosure door.

Heavy duty blower\(\) creates airflow through the enclosure, allowing VFD to operate in ambient temperatures up to 50ºC.

Filters\(\) in top and bottom of enclosure allow airflow into and out of the enclosure, cooling the VFD and eliminating risk of overheating.

Pre-filter screens\(\) (not shown) eliminate clogging of the primary filters, ensuring reliable and consistent airflow. Pre-filter screens can be easily removed and cleaned without shutting down operations.

Enclosure epoxy painted for superior corrosion resistance.

Stainless steel, captive, triple lead quick release spring loaded bolts install faster and provide clear indication that the cover bolts are fully retracted from the body.

\(\)5 HP and below listed for Group B.
\(\)Heavy duty blower, shroud, filters and pre-filter screens not included with units containing 1.5 to 6 HP VFDs.
