Newport Camp Mate

Power Pedestal

The Newport Camp Mate is our most compact power pedestal with the ability to host a variety of electrical services.

Features
- Heavy Resin Housing with a Two-Part Polyurethane Coating for a UV Resistant, Long-Lasting Finish
- Photocell-Controlled 9 or 14 Watt Compact Fluorescent Twistbulb Light with Amber Lens
- 20A/125V GFI Receptacle
- Designed to Mount on a Post, Wall, or Eaton provided Pedestal
- Mechanical Lug Loop Feed Bus Bars for up to 350 MCM
- NEMA 3R Rating
- Circuit Breaker Protection for All Receptacles

Available Options
- Available with Single, Dual, or Combination of 30A or 50A Receptacles
- Single or Dual Phone, Cable TV, High-Speed Internet Connections
- Digital Electronic Metering
- Wireless Remote Metering for Electric and Water
- Free Standing Stainless Steel Pedestal
- LED Lighting
- Clear, Blue, and Red Lenses
- Direct Burial
- Copper Bus Bar Stud Lugs
- Hose and Cable Brackets
- Single or Dual Steel 1/4 Turn Ball Valves with 3/4" Hose Bibs and Stainless Steel Handles

Utility Direct Connect

Power Pedestal

The Utility Direct Connect provides a 200A meter socket for the utility to land their service entrance conductors through an isolated raceway inside the pedestal. It offers all of the same receptacle options as our other pedestals, in addition to offering the capability to feed an additional building or shed with a 100A main breaker inside the pedestal.

Features
- Photocell-Controlled 14 Watt Compact Fluorescent Twistbulb Light with Amber Lens
- Lockable Weatherproof Doors Which Protect Breakers and Receptacles While in Use
- 20A/125V GFI Receptacle
- Hose and Cable Brackets
- Mechanical Lug Loop Feed Bus Bars for up to 350 MCM
- Backlit Breaker Plate for Easy Receptacle Plug-In at Night
- NEMA 3R Rating
- Circuit Breaker Protection for All Receptacles
- Built-In Meter Socket
- Heavy Stainless Steel Housing that is Powder-Coated with a Polyester Resin

Available Options
- Wireless Remote Metering for Electric and Water
- Single or Dual Steel 1/4 Turn Ball Valves with 3/4" Hose Bibs and Stainless Steel Handles
- Single or Dual Phone, Cable TV, High-Speed Internet Connections
- LED Lighting
- Clear, Blue, and Red Lenses
- Direct Burial
- Surge Protection Device (SPD) to Protect from Voltage Surges, Spikes or Lightning on the AC Power Line
- Copper Bus Bar Stud Lugs

NEWPORT CAMP MATE
One of our most popular units, the all-purpose Powerhouse pedestal has a wide range of features. With units in service around the world, this stylish power pedestal is recognized for its practicality and exceptional durability.

Features
- Photocell-Controlled 14 Watt Compact Fluorescent Twistbulb Light with Amber Lens That Provides 360 Degrees of Lighting
- Lockable Weatherproof Doors Which Protect Breakers and Receptacles While In Use
- 20A/125V GFI Receptacle
- Hose and Cable Brackets
- Heavy Resin Housing with a Two-Part Polyurethane Coating for a UV Resistant, Long Lasting Finish
- Mechanical Lug Loop Feed Bus Bars for up to 350 MCM
- "Hingeless" Base Providing Easy Access for Both Installation and Maintenance
- Backlit Breaker Plate for Easy Receptacle Plug-In at Night
- NEMA 3R Rating
- Circuit Breaker Protection for All Receptacles

Available Options
- Digital Electronic Metering
- Wireless Remote Metering
- Surge Protection Device (SPD) to Protect from Voltage Surges, Spikes or Lightning on the AC Power Line
- Single or Dual Steel 1/4 Turn Ball Valves
- Single or Dual Phone, Cable TV, High-Speed Internet Connections
- LED Lighting
- Clear, Blue, and Red Lenses
- Direct Burial
- Copper Bus Bar Stud Lugs

For long lasting durability, the stainless steel Powerhouse SS pedestal is the most resilient power center offered. This pedestal will meet and exceed all applicable codes and withstand harsh inland and coastal environments.

Features
- Photocell-Controlled 14 Watt Compact Fluorescent Twistbulb Light with Amber Lens That Provides 360 Degrees of Lighting
- Available with Lockable Weatherproof Doors
- 20A/125V GFI Receptacle
- Heavy Stainless Steel Housing that is Powder Coated with a Polyester Resin
- Large Removable Access Panel for Easy Maintenance and Installation
- Backlit Breaker Plate for Easy Receptacle Plug-In at Night
- NEMA 3R Rating
- Circuit Breaker Protection for All Receptacles

Available Options
- Digital Electronic Metering
- Wireless Remote Metering
- Surge Protection Device (SPD) to Protect from Voltage Surges, Spikes or Lightning on the AC Power Line
- Single or Dual Phone, Cable TV, High-Speed Internet Connections
- Single or Dual 3/4" Hose Bibs with Stainless Steel Handles
- LED Lighting
- Clear, Blue, and Red Lenses
- Direct Burial

The Park Light is an elegant and low cost solution to your RV Park. It utilizes the same 360 degree light assembly as the Powerhouse, yet is only 31 inches tall. Thousands of these attractive pedestals are found not only in RV Parks, but also around pools, deck areas, boardwalks and landscape areas.

Features
- Photocell-Controlled 14 Watt Compact Fluorescent Twistbulb Light with Amber Lens That Provides 360 Degrees of Lighting
- Heavy Resin Housing with a Two-Part Polyurethane Coating for a UV Resistant, Long Lasting Finish
- 20A/125V GFI Receptacle
- Mechanical Lug Loop Feed Bus Bars for up to 2/0 Wire
- NEMA 3R Rating
- Circuit Breaker Protection for All Receptacles

Available Options
- Digital Electronic Metering
- Single or Dual Phone, Cable TV, High-Speed Internet Connections
- Single or Dual 1/2” or 3/4” Silcock with Stainless Steel Handles
- LED Lighting
- Clear, Blue, and Red Lenses
- Direct Burial
- Copper Bus Bar Stud Lugs

The Firehouse is designed to provide added fire safety to RV parks and campgrounds. The Firehouse provides a convenient location and easy access to fire extinguishers and to an optional life ring when installed around pools and waterfront amenities. In addition, the Firehouse provides area lighting for easy identification during an emergency and for security lighting around the unit. The Firehouse can be equipped with an alarm strobe light and siren which are automatically activated when the fire extinguisher cabinet door is opened or the optional life ring is removed.

Features
- Photocell-Controlled 14 Watt Compact Fluorescent Twistbulb Light with Red Lens That Provides 360 Degrees of Lighting
- 10 lb. ABC Type Fire Extinguisher
- Heavy Stainless Steel Housing that is Powder-Coated with a Polyester Resin
- NEMA 3R Rating

Available Options
- 24” Life Ring
- 20 lb. ABC Type Fire Extinguisher Available
- Alarm Strobe Light & Siren: Automatically Activated When Door Is Open or Optional Life Ring Is Removed
- LED Lighting
- Clear, Blue, and Amber Lenses

Digital Electronic Kilowatt Hour Meters

Using the latest technology, Eaton manufactures a line of robust digital electronic sub-meters providing economical energy management solutions. Our product meets the +/- 2% accuracy requirements by ANSI (American National Standards Institute) and is approved by the state of California (+/- 1% over full range 0-100 amp with .5 to 1 power factor).

The meter drives an electromechanical counter with a 12 volt pulse providing readings to the tenth of kilowatt hour. Optional output allows for integration of our wireless metering system providing remote kilowatt hour readings.

User Friendly Design
Eaton’s meter is compact and user friendly. The unit will automatically calibrate to current transformers eliminating the need to ensure proper polarity direction during installation. Simple LEDs, both red and green, indicate the line and load condition making trouble shooting a breeze.

Wireless System
All of our meters are “wireless capable” to allow for wireless meter reading. This technology enables the park to get meter readings from one central location rather than visiting every site to read the counters.

Benefits:
- LED uses significantly less current (lumenal and lasts longer than a fluorescent bulb reducing operating and maintenance costs
- LED does not contain mercury which can create disposal issues

Available Options:
- LED upgrade kit available for pedestals already installed

LED Lighting

LED Lighting saves electricity over conventional lighting, lasts much longer, and has a positive influence on our environment versus more inefficient mercury-filled fluorescent lighting. Go green and save money with Eaton’s LED lighting option. LED lighting option is UL certified.

Benefits:
- LED Lighting saves electricity over conventional lighting, lasts much longer, and has a positive influence on our environment versus more inefficient mercury-filled fluorescent lighting.
- Go green and save money with Eaton’s LED lighting option.

Available Options:
- LED lighting option is UL certified.

Surge Protection Device (SPD)

Surge Protection Devices (SPDs) from Eaton are designed to protect solid state equipment from voltage surges caused by poor power or lightning strikes. As campers have increasingly sophisticated electronics on board their vehicles, the need arises to protect them in the event of a surge. The application of SPDs can mitigate problems with sensitive electronic equipment, keeping the equipment and related processes up and running reliably without disruption or damage due to surge-related events.

Features:
- Common voltages and configurations as well as a variety of surge current capacity ratings from 50 through 400 kA provide application flexibility
- Utilizes thermally protected metal oxide varistor (MOV) technology, which provides both high energy capacity and failsafe operation
- 200 kA short circuit current rating (SCCR)

Wire

We can provide all of the wiring necessary to complete any project.

Wire Options:
- THHN/THWN Wire
- XHHW Wire

We can provide all of the wiring necessary to complete any project.

Wire Options:

Substations
Distribution Equipment

The introduction of substations into the recreational vehicle market allows Eaton to be your complete RV park electrical products supplier. Our substations are designed for any coastal or inland environment and are constructed of powder coated stainless steel NEMA 3R housing cabinets. All of our substations use Eaton panels and circuit breakers providing our customers the utmost in circuit protection and quality.

Available Options
• Heavy Stainless Steel Housing that is Powder-Coated with a Polyester Resin
• Single-Phase and Three-Phase Models
• Copper-Wound, Low-Noise Transformer that is Double Insulated and Epoxy Over Coated
• Up to 1200 Amp Main Circuit Breaker
• Ground Fault Monitoring System
• Surge Protection Device (SPD) to Protect from Voltage Surges, Spikes or Lightning on the AC Power Line
• Up to 1200A Single Phase
• Up to 800A Three Phase

Ventilation
The substation ventilation is designed to optimize air circulation over and around the transformers and through the panel compartment so that the substation operates at lower temperatures. Substations come equipped with temperature controlled cooling fans for exhausting hot air from the cabinet and solar shield.

One of the many electrical distribution products we offer are Eaton panelboards. All of our panels feature copper buss and bolt-on breakers. Panels can be configured as Main Lugs Only or Main Breaker with branch circuit breakers based on customers’ requirements. Our lockable stainless steel enclosures are powder-coated with a polyester resin and NEMA 3R rated.

Standard Features
• Copper Bus Bars
• All Exterior Hardware Is Stainless Steel
• Heavy Stainless Steel Housing that is Powder-Coated with a Polyester Resin
• Main Breaker or Main Lugs up to 1200A
• Branch Breaker 20 to 1200 Amps

Available Options
• Surge Protection Device (SPD) to Protect from Voltage Surges, Spikes or Lightning on the AC Power Line
• Ground Fault Monitoring
• 316L Stainless Steel Enclosure

Single-Phase or Three-Phase
• Up to 1200 Amp Main Circuit Breakers
• Up to 42 Branch Circuit Breakers
In order to keep wiring costs down, many RV park design engineers specify higher voltages on long wire runs, requiring transformers to transform that power down to a usable voltage. Eaton offers enclosed transformers designed to withstand harsh inland and coastal environments. Through proper utilization of electrical distribution equipment, the RV park designer is able to reduce the overall electrical infrastructure costs while increasing efficiency.

**Standard Features**
- Copper Terminations
- Copper-Wound, Low-Noise Transformer that is Double Insulated and Epoxy Over-Coated
- All Copper to Copper Connections
- Heavy Stainless Steel Housing that is Powder-Coated with a Polyester Resin

**Available Options**
- Single-Phase: 50 to 500 KVA
- Three-Phase: 45 to 500 KVA
- 316L Stainless Steel Enclosure

**Primary Voltages**
- 480V YE 3ø
- 480V 3ø Delta 3-Wire + G
- 480V 1ø 2-Wire + G

**Secondary Voltages**
- 127/220V 3ø Y 4-Wire
- 120/208V 3ø Y 4-Wire
- 120/240V 1ø 3-Wire

**Marina Power Distribution Transformer KVA Availabilities**
- Single-Phase: 50, 75, 100, 150, 167.5, 200, 250, 300, 500 KVA
- Three-Phase: 45, 75, 112.5, 150, 225, 300, 500 KVA
Eaton Corporation is a diversified power management company with more than 100 years of experience providing energy-efficient solutions that help our customers effectively manage electrical, hydraulic and mechanical power. With 2011 sales of $16.0 billion, Eaton is a global technology leader in electrical components, systems and services for power quality, distribution and control; hydraulics components, systems and services for industrial and mobile equipment; aerospace fuel, hydraulics and pneumatic systems for commercial and military use; and truck and automotive drivetrain and powertrain systems for performance, fuel economy and safety. Eaton has approximately 73,000 employees and sells products to customers in more than 150 countries. For more information, visit www.eaton.com.
