600 A 15 and 25 kV class PUSH-OP™ insulated standoff bushing

General
Eaton meets the full requirements of IEEE Std 386™-2006 standard, Separable Insulated Connector Systems with its Cooper Power™ series 600 A, 15 and 25 kV insulated PUSH-OP™ standoff bushing.

The bushing provides a single deadbreak interface made of high quality insulating epoxy material. It is used in switchgear, transformers, and other apparatus to isolate and sectionalize an energized cable. Temporary or permanent parking of energized 600 A 15 and 25 kV PUSH-OP deadbreak connectors is simplified with the use of an insulated standoff bushing.

The PUSH-OP insulated standoff bushing is designed to be installed in the parking stand mounted on a switchgear, transformer, or other apparatus. A drain wire lug is provided on the standoff bracket for attachment of a drain wire lead to ensure deadfront construction. The bushing provides a fully-shielded, submersible connection for deadbreak operation.

All standoff bushing brackets have a stainless steel eyebolt with a brass pressure foot. The bushing body is bolted to a stainless steel base bracket using a stainless steel bolt. The bracket and latch mechanism provides easy installation of a PUSH-OP connector without any threading operations.

Installation
A clampstick tool is used to place the standoff bushing in the parking stand on the front plate of the apparatus. The PUSH-OP connector is then installed onto the standoff bushing tap. Refer to Service Information S600-65-1 600 A 15/25 and 35 kV Class PUSH-OP Insulated Standoff Bushing Installation Instructions for complete installation details.

Production tests
Tests are conducted in accordance with IEEE Std 386™-2006 standard.
- ac 60 Hz 1 Minute Withstand
  - 40 kV
- Minimum Corona Voltage Level
  - 19 kV
Tests are conducted in accordance with Eaton requirements.
- Physical Inspection
- Periodic Dissection
- Periodic Fluoroscopic Analysis
Figure 1. Front view shows standoff bushing and latch mechanism. Side view shows standoff bushing and latch mechanism with bracket assembly.

Note: Dimensions given are for reference only.

Each kit contains:
- Standoff Bushing with Bracket
- Shipping Cap (not for energized operation)
- Silicone Lubricant
- Installation Instruction Sheet
600 A 15/25 kV class PUSH-OP insulated standoff bushing
