

Outdoor Eluxa Amber Lens Options – Change Notice

Technical Bulletin TB-ASD240005 | Dec 9th 2024

Since its launch in May 2021, the Eluxa range has established itself as the industry's most versatile notification device lineup. It offers comprehensive candela settings, low current draw, and various lettering options to simplify installation. With the recent addition of Eluxa Outdoor products, the range now provides a cohesive look and feel across both indoor and outdoor applications, while maintaining the advanced technical features users have come to expect.

To ensure the ranges continued success while keeping up with the latest code requirements we are making the following changes to the Eluxa Outdoor range SKUs. Going forward all Outdoor Amber lens devices will ship with ALERT lettering only. This means the following SKUs will be retired from sale:

- CN106660 EL3RMTSTA-NW
- CN106664 EL3RSTA-NW
- CN106668 EL3RSPSTA-NW
- CN106669 EL4XMTSTA-NW
- CN106673 EL4XSTA-NW
- CN106677 EL4XSPSTA-NW

The new ALERT versions are:

- CN106678 EL3RMTSTA-ALW
- CN106680 EL3RSTA-ALW
- CN106682 EL3RSPSTA-ALW
- CN106684 EL4XMTSTA-ALW
- CN106686 EL4XSTA-ALW
- CN106688 EL4XSPSTA-ALW

If NO LETTERING is required, then the ALERT versions above should be purchased along with the NO LETTERING plates part number:

- CN106636 ELLP-NW (10Pk)

Existing orders for the -NW Amber lens devices will be switched by the factory to be -ALW versions, they will ship with -NW plates as a free of charge temporary deviation as we transition to the new -ALW SKUs.

We welcome your ongoing support and continued feedback regarding our products and services.

Best regards,

Andrew Dodsworth
Commercial & Marketing Director
