

# Pendant transmitters

On your side when you need help most. Hopefully, you'll never need to find out why our pendant transmitters are so highly regarded. But should you ever be attacked, you'll quickly realise why over 750,000 people worldwide trust them with their lives.

## At a glance...

- Reliable, secure Scantronic 868 MHz narrow-band radio operation
- Suitable for use as panic alarms and social alarm triggers
- Two models cater for all applications
- A range of fixings enable the units to be carried or worn on the person
- Soldered-in lithium battery-powered to ensure operation even if dropped

Both the 701 & 702 models use our tried and tested 868 MHz narrow-band radio signal for secure, reliable operation. And to ensure your transmitter is always working, the lithium battery sends a signal when less than one month's operation remains. Moreover, the wide variety of wearing options – including neck pendant, hand-held, pocket clip and watch strap – means there's a style to suit everyone.
