TOLCO™ fire protection solutions
At Eaton, we believe that power is a fundamental part of just about everything people do. That’s why we’re dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people’s lives, the communities where we live and work, and the planet our future generations depend upon. Because this what really matters. And we’re here to make sure it works.

To learn more go to: Eaton.com/whatmatters
For over 45 years, the TOLCO™ brand has been synonymous with innovative, labor saving pipe hanger and seismic bracing solutions for the fire protection industry.

**Products & Services**

- TOLBrace™ Seismic Bracing Calculation Software
- One of the broadest lines of pipe hangers, strut and seismic bracing in the industry

**Fire Protection Team**

Our Fire Protection team actively participates in the fire protection industry, including:

- Membership in the NFPA Technical Committee on Hanging and Bracing of Water Based Automatic Fire Sprinkler Systems
- MSS 403 Standards Committee for Pipe Hanging and Seismic Bracing

**Product Certifications**

Many of the products shown in this catalog are certified with the following:

- Listed by Underwriters Laboratories (UL) in U.S. and Canada
- Factory Mutual Engineering Approved (FM)
- Pre-approved by the State of California, Office of Statewide Health, Planning and Development (OSHPD) as shown in our OPM-0052-13 Seismic Restraint Systems Guidelines

This catalog is intended to aid design engineers, specifying engineers, Authorities Having Jurisdiction (AHJs) and others seeking solutions to their pipe support and seismic bracing system installations and design challenges.

For more information on B-Line series pipe hangers and supports, and TOLCO seismic bracing solutions utilized in other applications, such as mechanical or plumbing systems, please refer to our Pipe Hangers & Supports and Strut Systems catalogs, and the State of California OSHPD Pre-Approved Seismic Restraint Systems Guidelines OPM-0052-13. These resources and other valuable information can be found online at [www.eaton.com/tolco](http://www.eaton.com/tolco).

For additional support, contact your TOLCO seismic bracing specialist at, tolcosupport@eaton.com

Many TOLCO brand products are included in our OSHPD pre-approved seismic guidelines. For specific information please visit [www.eaton.com/fireprotection](http://www.eaton.com/fireprotection) to view the OSHPD OPM-0052-13 catalog.
TOLBrace™ Fire Protection
Software

Allows you to create a submittal sheet, with all relevant information, at the click of a mouse!

TOLBrace™ includes a feature that will automatically update your software when new products are added, when there are updates to codes and standards, and/or any necessary software upgrades.

TOLBrace software assists a fire sprinkler system designer with the following:

- Seismic force factor calculations (Fp)
- Zone of influence calculations
- Sway brace orientation and angle selection
- Structural attachment of sway braces
- Brace material selection
- Appropriate selection of UL Listed and FM Approved sway brace components
- Creating a submittal sheet with all relevant information

TOLBrace follows the requirements of:

- Uniform Building Code
- International Building Code
- National Building Code of Canada
- California Office of Statewide Health Planning & Development (OSHPD)

For more information, visit www.eaton.com/tolbrace.

B3037 - Z-Purlin Malleable C-Clamp

Material: Malleable Iron  
Function: Designed for attaching a 3/8"-16 hanger rod to the bottom flange of a Z-purlin.  
Approvals: Underwriters Laboratories Listed (cULus) for up to 4" (100mm) pipe. Conforms to Federal Specification WW-H-171E & A-A-1192A, Type 23 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 23.  
Finish: Plain or Electro-Galvanized  
Order By: Figure number and finish.  
Weight: Approx. Wt./100 90 Lbs. (40.8kg)  
Design Load: 400 Lbs. (1.78kN)  
Setscrew Torque: Per MSS SP-58 14.2.5  
3/8"-16 set screws = 5 ft./lbs. (7 Nm)  
Caution should be taken not to over-tighten set screws.

B3033 - Wide Jaw Reversible C-Clamp

Size Range: 3/8"-16 thru 3/4"-10 rod  
Material: Cast Malleable Steel with hardened cup point set screw and jam nut  
Function: For attachment to structural shapes requiring wider throat especially under roof with bar joist construction. This clamp may be used with the set screw in the up or down position.  
Approvals: Underwriters Laboratories Listed (cULus) and Factory Mutual Engineering Approved (FM) for 3/8"-16 and 1/2"-13 rod sizes. Conforms to Federal Specification WW-H-171E Type 19 & A-A-1192A, Type 19 & 23 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 19 & 23. Factory Mutual Engineering Approved only with the setscrew in the down position.  
Finish: Plain. Contact customer service for alternative finishes and materials.  
Order By: Figure number, rod size and finish  
Setscrew Torque: Per MSS SP-58 14.2.5  
3/8"-16 set screws = 5 ft./lbs. (7 Nm)  
1/2"-13 set screws = 11 ft./lbs. (15 Nm)  
3/8"-11 set screws = 21 ft./lbs. (28 Nm)  
Caution should be taken not to over-tighten set screws.  
Designed to meet or exceed requirements of FM DS 2-0.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
**Beam Clamps**

**B3034 - C-Clamp**

**Size Range:** 3/8"-16 thru 3/4"-10 rod  
**Material:** Cast Malleable Steel with hardened cup point set screw and jam nut  
**Function:** Recommended for hanging from steel beam where flange thickness does not exceed 3/4” (19.0mm).  
**Features:** May be used on top or bottom flange of the beam. Beveled lip allows hanging from top flange where clearance is limited. May be installed with the set screw in the up or down position. Offset design permits unlimited rod adjustment by allowing the rod to be threaded completely through the clamp. The rear window design permits inspection of thread engagement.  
**Approvals:** Underwriters Laboratories Listed (cULus) and Factory Mutual Engineering Approved (FM) for 3/8”-16 and 1/2”-13 rod sizes. Conforms to Federal Specification WW-H-171E & A-A-1192A, Type 23 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 19.  
3/8”-16 is (cULus) Listed to support up to 4” (100mm) pipe with the set screw in the down position, up to 3” (75mm) pipe with the set screw in the up position.  
1/2”-13 is (cULus) Listed to support up to 8” (200mm) pipe with the set screw in the down position, up to 6” (150mm) pipe with the set screw in the up position.  
Factory Mutual Engineering Approved only with the setscrew in the down position.  
**Finish:** Plain. Contact customer service for alternative finishes and materials.  
**Order By:** Figure number, rod size and finish  
**Setscrew Torque:** Per MSS SP-58 14.2.5  
3/8”-16 set screws = 5 ft.lbs. (7 Nm)  
1/2”-13 set screws = 11 ft.lbs. (15 Nm)  
Caution should be taken not to over-tighten set screws.

**TOLCO™ Fig. 68W - Reversible Malleable Beam Clamp 1 1/4" (31.7mm) Throat Opening**

**Size Range:** 3/8"-16 rod sizes thru 7/8"-9 rod sizes

**Material:** Cast Malleable Steel with hardened cup point set screw and jam nut

**Function:** Recommended for hanging from steel beam where flange thickness does not exceed 3/4" (19.0mm) on Fig. 68S or 1 1/4" (31.7mm) on Fig.68W.

**Features:** May be used on top or bottom flange of beam. Beveled lip allows hanging from top flange where clearance is limited. May be installed with set screw in up or down position. Offset design permits unlimited rod adjustment by allowing the rod to be threaded completely through the clamp. The rear window design permits inspection of thread engagement.

**Approvals:** Factory Mutual Engineering Approved. Underwriters Laboratories Listed. Conforms to Federal Specification WW-H-171E, Type 23 and Manufacturers Standardization Society SP-58, Type 19.

Fig. 68S-3/8 is cULus Listed to support up to 4" (100mm) pipe with the set screw in the down position and up to 3" (80mm) pipe with the set screw in the up position.

Fig. 68S-1/2 is cULus Listed to support up to 6" (150mm) pipe with the set screw in the up position.

Fig. 68W-3/4 is cULus Listed to support up to 4" (100mm) pipe with the set screw in the down position and up to 3" (80mm) pipe with the set screw in the up position.

Fig. 68W-1/2 is cULus Listed to support up to 6" (150mm) pipe with the set screw in the down position and up to 4" (100mm) pipe with the set screw in the up position.

Factory Mutual Engineering Approved (FM) only with the set screw in the down position.

**Finish:** Plain. Contact customer service for Electro-Galvanized or HDG finishes.

**Set Screw Torque:** Per MSS SP-58 14.2.5

- 3/8" -16 set screws = 5 ft./lbs. (7 Nm)
- 1/2" -13 set screws = 11 ft./lbs. (15 Nm)
- 5/8" -11 set screws = 21 ft./lbs. (28 Nm)

Caution should be taken not to over-tighten set screws.

B-Line series Fire Protection Solutions

Eaton
Beam Clamps

TOLCO™ Fig. 65 - Reversible Steel C-Type Beam Clamp 3/4” (19.0mm) Throat Opening

Size Range:
- Fig. 65 - 1/2”-13 rod sizes, and 5/8”-11 rod sizes
- Fig. 65XT - 3/8”-16 rod size (see below)

Material: Steel with hardened cup point set screw and jam nut

Function: Recommended for hanging from steel beam where flange thickness does not exceed 3/4” (19.0mm).

Features: All steel construction eliminates structural deficiencies associated with casting type beam clamps. May be used on top or bottom flange of beam. (Beveled lip allows hanging from top flange where clearance is limited.) May be installed with set screw in up or down position. Offset design permits unlimited rod adjustment by allowing the rod to be threaded completely through the clamp. Open design permits inspection of thread engagement.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Exceeds requirements of the National Fire Protection Association (NFPA), pamphlet 13, 3/8”-16 rod will support 1/2” (15mm) thru 4” (100mm) pipe 1/2”-13 rod will support thru 8” (200mm) pipe

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number and finish

TOLCO™ Fig. 65XT - Reversible Steel C-Type Beam Clamp 3/4” (19.0mm) Throat Opening

Feature: Extruded holes allows for more thread engagement of threaded rod and set screw.

Finish: Plain or Electro-Galvanized

Order By: Figure number and finish

Approvals: Underwriters Laboratories Listed (cULus) and FM Approved (FM) for up to 4” (100mm) pipe.

Designed to meet or exceed requirements of FM DS 2-0 and NFPA 13.

**Beam Clamps**

TOLCO™ Fig. 67SS - Stainless Steel Reversible C-Type Beam Clamp 3/4” (19.0mm) Throat Opening

TOLCO™ Fig. 68SS - Stainless Steel Reversible C-Type Beam Clamp Wide Mouth

**Size Range:** 3/8"-16 and 1/2"-13 rod sizes

**Material:** Stainless Steel (Type 316 or 304)

**Function:** Recommended for hanging from steel beams where flange thickness does not exceed 3/4” (19.0mm) for Fig. 67SS or 1 1/4” (31.7mm) for Fig. 68SS.

**Features:** All steel construction eliminates structural deficiencies associated with casting type beam clamps. May be used on top or bottom flange of beam. May be installed with set screw in up or down position. Offset design permits unlimited rod adjustment by allowing the rod to be threaded completely through the clamp.

**Approvals:** Conforms to Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 19.

3/8"-16 rod will support 1/2” (15mm) thru 4” (100mm) pipe at maximum NFPA 13 spacing

1/2"-13 rod will support thru 8” (200mm) pipe at maximum NFPA 13 spacing

**Order By:** Figure number and stainless steel type.

TOLCO™ Fig. 69 - Beam Clamp Retaining Strap

**Size Range:** 3/8”-16 thru 3/4”-10 rod
4” (101.6mm) thru 16” (406.4mm) lengths
Note: longer lengths are available consult factory

**Material:** Pre-Galvanized Steel

**Function:** To offer more secure fastening of various types of beam clamps to beam where danger of movement might be expected. NFPA 13 requires the use of retaining straps with all beam clamps installed in earthquake areas. Satisfies requirements of NFPA 13.

**Important Note:** Good installation practice of a retaining strap requires that the strap be held tightly and securely to all component parts of the assembly. Therefore a locking mechanism of some kind, such as a hex nut for the Fig. 69 or the beveled locking slot of the Fig. 69R will provide a more secure reliable installation.

**Approvals:** Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Approved for use with any listed B-Line series or Tolco beam clamp.

**Finish:** Pre-Galvanized

**Order By:** Figure number, length (L), and finish.

**Note:** Minimum return on strap is 1” (25.4mm). Lengths over 16” (406mm) are not UL Listed

Beam Clamps

TOLCO™ Fig. 69R - Retrofit Capable Beam Clamp Retaining Strap

Size Range: 3/8”-16 & 1/2”-13 rod
4” (101.6mm) thru 16” (406.4mm) lengths
Note: longer lengths are available consult factory

Material: Pre-Galvanized Steel

Function: To offer more secure fastening of various types of beam clamps to beam where danger of movement might be expected. NFPA 13 requires the use of retaining straps with all beam clamps installed in earthquake areas. Satisfies requirements of NFPA 13.

Features: Beveled locking slot* is precisely formed to align with the threaded section of a hanger rod or set screw and engage the unit securely. May be used as shown in Section “A-A” or inverted. Allows easy installation for new construction or retrofit applications.

Important Note: Good installation practice of a retaining strap requires that the strap be held tightly and securely to all component parts of the assembly. Therefore the beveled locking slot of the Fig. 69R will provide a secure reliable installation.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Approved for use with any listed B-Line series or Tolco beam clamp.

Finish: Pre-Galvanized

Order By: Figure number, length, and finish.

Note: Minimum return on strap is 1” (25.4mm)

**TOLCO™ Fig. 130 - Composite Wood Joist Clamp**

**Size Range:**
- **130-1** = TJI 35 or equivalent
- **130-2** = —
- **130-3** = TJI 25 or equivalent
- **130-4** = TJI 55, TJI 65, & TJI 560D or equivalent
- **130-5** = TJI 75 & TJI H90 or equivalent
- **130-6** = TJI 96 or equivalent

**Material:** Steel

**Function:** Designed for attachment to composite wood joist beams. Use with eye rods, eye sockets, or angle bracket.

**Approvals:** Sizes 1 - 6 are Underwriters Laboratories Listed in the USA ([UL](#)) and Canada ([cUL](#)) list through 4” (100mm) pipe. All Fig. 130 Beam Clamps meet requirements of Factory Mutual Engineering ([FM](#)) and NFPA 13, through 4” (100mm) pipe.

**Finish:** Electro-Galvanized or Hot-Dip Galvanized

**Order By:** Figure number and finish.

Designed to meet or exceed requirements of FM DS 2-0.

’H’ and ‘W’ are beam dimensions.

† Larger bolts and I-rods are required for 5” (125mm) and 6” (150mm) pipe sizes.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
B3100 - Clevis Hanger for NFPA Sizes 3/4” (20mm) thru 2” (50mm)
TOLCO™ Fig. 1NFPA - Clevis Hanger for NFPA Sizes 21/2” (65mm) thru 12” (300mm)

Size Range: 3/4” (20mm) to 12” (300mm)

Material: Steel

Function: Recommended for the suspension of non-insulated pipe or insulated pipe with a B3151 shield.

Note: When an oversized clevis is used, a pipe spacer should be placed over the cross bolt to assure that the lower U-strap will not move in on the bolt. When attaching seismic bracing to the clevis hangers, a 1CBS (clevis bolt spacer) must be installed.

Order pipe sleeves Fig. 1CBS-(pipe size) separately.

Approvals: Underwriter’s Laboratories Listed in the USA (UL) and Canada (cUL) for sizes 3/4” (20mm) thru 12” (300mm). Factory Mutual Engineering Approved (FM) for 3/4” (20mm) thru 8” (200mm) pipe. Conforms to Federal Specification WW-H-171E & A-A-1192A, Type 1 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 1. Rod sizes per National Fire Protection Association (NFPA) Pamphlet 13.

Maximum Temperature: 650°F (343°C).

Standard Finish: Plain, Electro-Galvanized, DURA-GREEN™, or Hot-Dip Galvanized also available in Stainless Steel

Order By: Figure number and finish.

For pipe sizes under 21/2” (65mm) order B3100 Clevis Hanger, see chart below.

Designed to meet or exceed requirements of FM DS 2-0.

Pipe Hangers

TOLCO™ Fig. 1CBS - Clevis Bolt Spacer

**Size Range:** Size 1" (25mm) thru 20" (500mm) clevis hanger

**Material:** Steel

**Function:** Used as a spacer at a seismic brace location to keep clevis hanger from collapsing during seismic event.

**Approvals:** Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines OPM-0052-13, for 2½” - 8” (B3100) only

**Installation Note:** Fig. 1CBS fits easily over the cross bolt and attaches by pinching tabs down.

**Finish:** Pre-Galvanized. Contact customer service for alternative finishes and materials.

**Order By:** Figure number and finish.

TOLCO™ Fig. 25 - Surge Restrainer

**Size Range:** — One size fits ¾” (20mm) thru 2” (40mm) pipe.

**Material:** — Pre-Galvanized Steel

**Function:** — Designed to be used in conjunction with Fig. 200 band hangers to restrict the upward movement of piping as it occurs during sprinkler head activation or earthquake type activity. The surge restrainer is easily and efficiently installed by snapping into a locking position on the band hanger. This product is intended to satisfy the requirements as indicated in the National Fire Protection Association NFPA 13, 2016 edition, 9.2.3.4.4.1 and 9.2.3.4.4.4 Can be used to restrain either steel pipe or CPVC plastic Pipe.

**Approvals:** — Underwriters Laboratories Listed only when used with band hanger Fig. 200, in the USA (UL) and Canada (cUL).

**Finish:** Pre-Galvanized

**Order By:** Figure number and band hanger, size from ¾” (20mm) thru 2” (40mm).

**Patent #5,344,108**

**TOLCO™ Fig. 200C - “Trimline” Adjustable Band Hanger with Plastic Coated**

**TOLCO™ Fig. 200S - “Trimline” Adjustable Band Hanger with Removable Nut (For sizes 1” thru 2”)**

---

**Size Range:**
- Fig. 200 - 1/2” (15mm) thru 8” (200mm) pipe

**Material:** Steel, Pre-Galvanized

**Function:** For fire sprinkler and other general piping purposes. Knurled swivel nut design permits hanger adjustment after installation.

**Features:**
- 1/2” (15mm) thru 2” (50mm) sizes have flared edges for ease of installation on all pipe types and protects CPVC plastic pipe from abrasion. Captured knurled nut design (flared top) on 1” thru 2” sizes keep nut from separating with hanger. Hanger is easily installed around pipe.
- 1/2” (15mm), 3/4” (20mm), and 2 1/2” (65mm) thru 8” (200mm) Spring tension on nut holds it securely in hanger before installation. Knurled nut is easily removed.
- For 1/2” (15mm) and 3/4” (20mm) sizes with non-captured knurl nuts order Fig. 200S

**Approvals:** Underwriters Laboratories listed (1/2” (15mm) thru 8” (200mm)) in the USA (UL) and Canada (cUL) for steel and CPVC plastic pipe and Factory Mutual Engineering Approved (FM) (3/4” (20mm) thru 8” (200mm)). Conforms to Federal Specifications WW-H-171E & A-A-1192A, Type 10 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 10.

**Maximum Temperature:** 650°F (343°C)

**Finish:** Pre-Galvanized. Stainless Steel materials will be supplied with (2) hex nuts in place of a knurl nut.

**Order By:** Part number and pipe size

---

**Note:** For metric hanger rod sizes add the metric rod size to the figure number. Example: 200M8-1 1/2 or 200M10-1 1/2

Pipe Hangers

TOLCO™ Fig. 200H - Heavy Duty Band Hanger (For Trapeze)

**Size Range:** 2” (50mm) thru 4” (100mm) trapeze pipe size.

**Material:** Steel — Pre-Galvanized

**Function:** Designed primarily to support substantially heavier loads than is normally intended for the nominal hanger size. Used extensively to support trapeze installations and the increased loads from both above and below the trapeze assembly.

**Features:** Furnished with 3/8"-16 or 1/2"-13 adjusting threaded ring nut.

**Approvals:** Underwriters Laboratories listed in the USA (UL) and Canada (cUL). Conforms to Federal Specification WW-H-171E & A-A-1192A, Type 10 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 10.

**Maximum Temperature:** 650°F (343°C)

**Finish:** Pre-Galvanized

**Order By:** Figure number, pipe size and rod size.

**Important Design Note.** Because of the increased loads applied to the trapeze assembly, both the upper trapeze supports as well as the lower hanging unit must be able to hold the maximum loads intended.

B-Line series Fire Protection Solutions
TOLCO™ Fig. 120RWA - (Model B) Retrofit Wrap Around “U” Hanger Clamp

Size Range: 1” (25mm) thru 6” (150mm) pipe

Material: Steel

Function: Designed to restrain movement of the pipe within standard U-hangers as required by NFPA 13. Where retrofit capability is crucial, the Fig. 120RWA is a labor efficient alternative to the standard B-Line series Fig. 120W wrap around U-hanger. Fig. 120RWA can also be used in new installations.

Features: Installs easily by tightening two hex nuts. Features a unique bracing slot that locks onto a standard U-hanger to become a solid unit that will stabilize the pipe during seismic activity or sprinkler head activation. Designed to be used in retrofit or new construction applications. Will clamp to existing U-Hangers without restriction to leg angle.

Approvals: Underwriters Laboratories listed in the USA (UL) and Canada (cUL) as a restrainer. NFPA 13 (2016) 9.3.6.3.

Finish: Plain and Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, type numbers and pipe size

Ordering Note: Order the following type and pipe size:
Type 1 — (1” (25mm) and 1 1/4” (32mm) pipe size)
Type 2 — (1 1/4” (32mm) and 2” (50mm) pipe size)
Type 3 — (2 1/2” (65mm) and 3” (80mm) pipe size)
Type 4 — (4” (100mm) pipe size)
Type 6 — (5” (125mm) and 6” (150mm) pipe size)

Important Note: The bracing slot feature is sized to fit the U-Hanger rod schedule as required by NFPA 13 as follows:

5/16” (7.9mm) rod for up to 2” (50mm) pipe
3/8” (9.5mm) rod for 2 1/2” (65mm) - 6” (160mm) pipe
For other rod size requirements consult factory.

B3373 - Standard Riser Clamp
B3373C - PVC Coated Standard Riser Clamp

Size Range: (B3373) 1/2" (15mm) thru 30" (760mm) pipe
(B3373C) 1/2" (15mm) thru 6" (150mm) pipe

Material: Steel

Function: Used for supporting vertical piping.

Approvals: Underwriters Laboratories Listed in the USA (UL), Canada (cUL) 3/4" (20mm) - 8" (200mm). Factory Mutual Engineering Approved (FM), 3/4" (20mm) thru 8" (200mm). Conforms to Federal Specification WW-H-171E & A-A-1192A, Type 8, and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 8.

Maximum Temperature: 650°F (343°C)

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size and finish.

Designed to meet or exceed requirements of FM DS 2-0.

Notes: For ductile iron (D.I.) pipe use part number B3373DI-pipe size. Contact B-Line Engineering for more information.

For larger sizes, consult the full line pipe hanger catalog.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
Pipe Clamps

B3140 - Standard Pipe Clamp
B3140C - Standard Pipe Clamp PVC Coated
B3140F - Standard Pipe Clamp Felt Lined

Size Range: B3140/B3140C Size 1/2" (15mm) thru 12" (300mm) pipe.

Material: Steel

Function: Recommended for the suspension of non-insulated pipe or insulated pipe with B3151 shields. (Use B3200 weldless eye nut, B3210 eye rod or B3211 welded eye rod.) B3140F and B3140C are designed to help reduce noise and vibration and/or prevent electrolysis.

Approvals: Underwriters Laboratories Listed in the USA (UL), Canada (cUL) 3/4" (20mm) - 12" (300mm), and approved by Factory Mutual Engineering (FM), 3/4" (20mm) - 8" (200mm), Federal Specification WW-H-171E & A-A-1192A, Type 4, and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 4.

Note: For piping that requires sway bracing refer to Fig. 4A.

Maximum Temperature: — 750°F (399°C)

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size and finish.

Order Note: When ordering B3140F allow for 3/16" (4.8mm) felt on each half of clamp.

Designed to meet or exceed requirements of FM DS 2-0.

**B2400 - Standard Pipe Strap**

**Size Range:** 1/2" (15mm) thru 24" (600mm) pipe

**Material:** Steel

**Function:** Designed for supporting pipe runs from strut supports.

**Approvals:** Underwriters Laboratories Listed (UL), Canada (cUL) for B2400-1/2" thru B2400-8". Conforms to Federal Specification WW-H-171E & A-A-1192A, Type 26 and Manufacturers Standardization Society ANSI/MSS SP-69 & SP-58, Type 26. Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines OPM-0052-13

**Finish:** Electro-Galvanized. Contact customer service for alternative finishes and materials.

**Order By:** Figure number, pipe size and finish

**Note:** Ductile iron sizes available. Special “B” dimensions available on request, consult factory.

---

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
TOLCO™ Fig. 22 - Hanger for CPVC Plastic Pipe & IPS Steel Pipe
Single Fastener Strap

Size Range: 3/4" (20mm) thru 2" (50mm) CPVC pipe

Material: Pre-Galvanized Steel

Function: Intended to perform as a hanger to support CPVC piping used in automatic fire sprinkler systems. The product acts as a hanger when tab is upward and the fastener screw is in the horizontal position. Fig. 22 can be installed on the top of a beam, but in this situation acts as a guide to the piping which is supported by the beam itself. It is not intended to support CPVC pipe from under a flat horizontal surface, such as a ceiling.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) to support fire sprinkler piping. May be installed in wood using fasteners supplied with product, or into minimum 20 gauge (0.9mm) steel using (1) 1/4” x 1” tek type screw. Meets and exceeds the requirements of NFPA 13, 13R and 13D.

Features: Fig. 22 incorporates features which protect the pipe and ease installation. The flared edge design protects CPVC pipe from any rough surface. It is easily attached to the building structure using the special UL Listed hex head self threading screw* furnished with the product. It is recommended that rechargeable electric drills fitted with a hex socket attachment to be used as installation tools. No impact tools (such as a hammer) are allowed. Damage has been known to result from installations using impact type tools. No pre-drilling of a pilot hole in wood is required.

Finish: Pre-Galvanized

Order By: Figure number and pipe size.

* Hardened hex head self threading screw is furnished with the product and is the minimum fastener size acceptable.

TOLCO™ Fig. 22L2 - One Hole Hanger/Restrainer for CPVC & Steel Pipe

**Size Range:** 3/4" (20mm) thru 2" (50mm) CPVC & steel pipe

**Material:** Pre-Galvanized Steel

**Function:** cULus Listed to perform as a hanger and restrainer for CPVC or IPS piping systems. The innovative design also allows for a preferred installation location close to a CPVC fitting without applying damaging compression forces on the pipe which could result in serious Mechanical ESC (Environmental Stress Cracking).

**Approvals:** Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) to support fire sprinkler piping. Can be installed in wood or into minimum 20 gauge (0.9mm) steel using (1) 1/4" x 1" tek type screw. Meets and exceeds the requirements of NFPA 13, 13R and 13D.

**Installation Note:** Comes in open position for easier installation. Because of multi – structural installation possibilities, specific fastener not included; see notes below for various applications.

**For Concrete Installation** — UL requires a minimum test load of 340 lbs for CPVC hangers and 750 lbs for steel pipe hangers; verify anchors meet or exceed these requirements.

**For Wood Installation** — #14 x 1 1/2” wood screws will support the required load for cULus.

**For Steel Installation** — 1/4” x 1” (min. 20ga steel) Tek type screw will support required UL load.

**Finish:** Pre-Galvanized

**Order By:** Part number

B-Line series Fire Protection Solutions

Eaton
TOLCO™ Fig. 23 - Hanger for CPVC Plastic Pipe & IPS Steel Pipe

Double Fastener Strap (B-Line B3182)

Size Range: 3/4" (20mm) thru 3" (80mm) CPVC pipe

Material: Pre-Galvanized Steel

Function: Intended to perform as a hanger to support CPVC piping used in automatic fire sprinkler systems. Fig. 23 can be installed on the top, bottom or side of a beam.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) sizes 3/4" (20mm) thru 2" (50mm) to support fire sprinkler piping. May be installed in wood using fasteners supplied with product, or into minimum 20 gauge (0.9mm) steel using (2) 1/4" x 1" tek type screw. Meets and exceeds the requirements of NFPA 13, 13R and 13D.

Features: Fig. 23 incorporates features which protect the pipe and ease installation. The flared edge design protects the CPVC pipe from any rough surface. It also incorporates snap restrainers allowing easier and faster installation. Easily attaches to the building structure using the two UL Listed hex head self threading screws* furnished with the product. It is recommended that rechargeable electric drills fitted with a hex socket attachment be used as installation tools. No impact tools (such as a hammer) are allowed. Damage has been known to result from installations using impact type tools. No pre-drilling of a pilot hole in wood is required.

Finish: Pre-Galvanized

Order By: Figure number and pipe size

* Hardened hex head self threading screw is furnished with the product and is the minimum fastener size acceptable.

**TOLCO™ Fig. 27B - Speed Nut**

**Size Range:** — Fits screws supplied with all CPVC hangers.

**Material:** — Steel

**Finish:** — Pre-Galvanized (Zinc)

**Function:** — To be used anywhere a screw cannot achieve full embedment due to thickness of wood structural material when installed. Fig. 27B allows full pull out load capacity of screws when installed to the standard screws supplied with all CPVC hangers (Fig. 22, Fig. 22L2, Fig. 23, Fig. 24, Fig. 28, Fig. 28M, Fig. 29, and B3184).

**Part No.**

| 27B |  }
TOLCO™ Fig. 28 - “Stand-Off” Hanger & Restrainer for CPVC Plastic Pipe & IPS Steel Pipe

Size Range: — 3/4” (20mm) through 2” (50mm)

Material: — Steel, Pre-Galvanized

Function: — Designed to be used as a hanger and restrainer for CPVC piping where the “stand-off” design will ease installation by eliminating the need for wood blocking.

Features:
• Flared edge design protects CPVC pipe from any rough or abrasive surfaces.
• Unique twist and lock design holds pipe firmly in place and allows retrofit type of installation.
• The “Stand-Off” design eliminates the need for wood block extension.
• Can be installed on horizontal or vertical piping regardless of mounting surface orientation.
• Attaches easily to wood structure with two hex head self-threading screws furnished with product.
• Installs easily using rechargeable electrical driver with 9/16” (7.9mm) extension socket eliminating impact tool damage to pipe.
• Attaches easily to steel, minimum 18 gauge (1.024mm) with (2) 1/4” x 1” tek type self drilling tapping screws.
• UL Listed as a hanger and a restrainer for fire sprinkler piping.

Approvals: — Underwriters Laboratory Listed in the USA (UL) and Canada (cUL) to support automatic fire sprinkler systems. May be installed into wood using fasteners supplied with product, or into minimum 18 gauge steel using (2) 1/4” x 1” tek type screws. Meets and exceeds the requirements of NFPA 13, 13R and 13D. Fig. 28 satisfies the UL vertical restraint requirement where needed. UL Listed as a hanger and vertical restraint when installed on 3/8” (9.5mm) composite wood material. Use two Fig. 27B (page 36) Speed Nuts when used as a hanger and restraint. Use one Fig. 27B Speed Nut on the upper installed screw when used as a hanger only.

Order by: — Figure number and pipe size.

TOLCO™ Fig. 28M - Offset Hanger & Restrainer for CPVC Plastic Pipe and IPS Steel Pipe

Size Range: 3/4” (20mm) thru 2” (32mm)

Material: Steel, Pre-Galvanized

Function: Designed to be used as a hanger and restrainer for CPVC piping or steel piping where the “stand-off” design will ease installation by eliminating the need for wood blocking.

Features:
- Flared edge design protects CPVC pipe from any rough or abrasive surfaces
- Unique snap-on design holds pipe firmly in place and allows retrofit type of installation
- The “Stand-Off” design eliminates the need for wood block extension
- Can be installed on horizontal or vertical piping regardless of mounting surface orientation
- Attaches easily to wood structure with two hex head self-threading screws furnished with product
- Installs easily using rechargeable electrical driver with 5/16” (7.9mm) extension socket eliminating impact tool damage to pipe
- Attaches easily to steel, minimum 18 gauge (1.024mm) with (2) 1/4” x 1” tek type self drilling tapping screws
- (cULus) Listed as a hanger and a restrainer for fire sprinkler piping

Installation Note: When installed in wood structural members and threads from the #10 x 1” screws are exposed, use Fig. 27B (page 36) speed nut to secure

Approvals: Underwriters Laboratory Listed in the USA (UL) and Canada (cUL) to support automatic fire sprinkler systems.

May be installed into wood using fasteners screws.

Meets and exceeds the requirements of NFPA 13, 13R and 13D. Fig. 28M satisfies the UL vertical restraint requirements where needed.

B3184 - Offset Hanger for CPVC Plastic Pipe and IPS Steel Pipe

Size Range: 3/4" (20mm) thru 2" (32mm)

Material: Pre-Galvanized Steel

Function: Designed to be used as a hanger for CPVC piping or steel piping where the stand-off design will ease installation by eliminating the need for wood blocking. If restraint is required, see Fig. 28M.

Features:
- Flared edge design protects CPVC pipe from any rough or abrasive surfaces
- The stand-off design eliminates the need for wood block extension
- Can be installed on horizontal or vertical piping regardless of mounting surface orientation
- Attaches easily to wood structure with two hex head self-threading screws furnished with product
- (cULus) Listed as a hanger for fire sprinkler piping

Installation Note: When installed in wood structural members and threads from the #10 x 1" screws are exposed, use Fig. 27B (page 36) speed nut to secure

Approvals: Underwriters Laboratory Listed in the USA (UL) and Canada (cUL) 3/4" (20mm) thru 2" (50mm) to support automatic fire sprinkler systems. May be installed into wood using fasteners screws. Meets and exceeds the requirements of NFPA 13, 13R and 13D.

This product is cULus Listed as a hanger ONLY.
For hanger and restraint applications, please refer to Fig. 28 or Fig. 28M.
TOLCO™ Fig. 29 - Double Offset Hanger & Restrainer for CPVC Plastic Pipe & IPS Steel Pipe

Size Range: Available in 3/4" (20mm) and 1" (25mm) pipe sizes

Material: Pre-Galvanized Steel

Function: Intended to perform as a hanger and restrainer for CPVC, plastic fire sprinkler pipe. Provides double offset 1 1/2" (20mm) x 1 1/2" (20mm) from mounting surface. This design will ease installation by eliminating the need for wood block extension and allow retro-fit attachment of hanger to sprinkler pipe.

Features:
- Thumb tab provides protection to restrain pipe in rough job site conditions. Tab is not required to be bent for listed installation.
- Offset edge eliminates abrasion.
- Attaches easily to wood structure with two special #10 x 1” hex head self-threading screws furnished with product.
- Can be used as a single offset hanger by aligning “dimples” with top of mounting surface and utilizing two fasteners in two of the three holes provided.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) as a hanger and restrainer to support fire sprinkler systems. Meets and exceeds requirements of NFPA 13, 13R and 13D.

Finish: Pre-Galvanized

Order By: Figure number and pipe size.

Install using a rechargeable electric drill fitted with a 5/16" (7.9mm) socket attachment with the special hex head self-tapping screws provided. Install screws until they bottom out. Pipe can be “snapped” into hanger before or after installation of the screws to the mounting surface. “Thumb tab” may be bent up to provide additional protection to the pipe, but is not required for performance of the hanger / restrainer function.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
TOLCO™ Fig. 75 - Swivel Attachment

**Size Range:** — 3/8”-16 Rod Attachment

**Material:** Steel

**Function:** Three recommended applications for this product:
- May be used as a branch line restraint for structural attachment to anchor bolt, beam clamp, etc.
- May be used as an upper attachment with short hanger rod to omit seismic bracing.
- May be used in a pitched or sloped roof application, to meet requirements of NFPA 13 (2010) 9.1.2.6.

**Approvals:** Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) to support up to 4” (100mm) pipe.

**Finish:** Electro-Galvanized

**Weight:** Approx. Wt./100 - 13.3 Lbs. (6.0kg)

**Order By:** Part number

**Patent:** #7,887,248
Fig. 76 - TOLCO™ Structural Attachment for Branch Line Restraint Assembly  (UL Listed)

Size Range: ⅜" and ½" all threaded rod (ATR)

Material: Steel

Function: Structural attachment for restraint (sway brace) or hanger assembly

Features: The Fig. 76 has multiple sized fastener holes to accommodate multiple types of fasteners for various types of structures (concrete, wood and steel) see table below. It can be bent in the field to accommodate multiple angles, but is supplied fixed at 45° to accommodate the most common installation configuration. Its open design allows easy inspection to verify thread engagement. It will fit both ⅜" and ½" all thread rod to accommodate changing field conditions when longer brace material is required. It is UL listed both as a restraint and as a hanger attachment for up to 4” (IPS) pipe size.

Installation Instructions: Follow fastener manufacturer and NFPA 13 guidelines to install appropriate fastener for the structural type (i.e. concrete, wood, steel). Install all thread rod (brace member) to TOLCO™ Fig. 76 structural attachment. Bottom out ATR to ensure full thread engagement. This can be visually confirmed due to the open thread design. For more information visit our website for the most up to date instructions sheets.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). For FM Approval information refer to FM Approved page 43.

Finish: Pre-Galvanized.

Order By: Figure number.

CPVC Clamps

TOLCO™ Fig. 77 - System Piping Attachment for Restraint Assembly (UL Listed)
For CPVC & Steel Pipe

Size Range: 3/8” and 1/2” all threaded rod (ATR)

Material: Steel

Function: System attachment for restraint (sway brace) assembly

Features: The Fig. 77 is UL Listed to be used with both (IPS) steel and CPVC fire sprinkler pipe, in 1” through 2” diameters. It fits multiple rod diameters allowing for field adjustment if longer brace material is needed. Its sturdy break-off bolt will not strip and verifies proper installation. Its snap on design has many advantages. It can be installed with one-hand, can easily position the brace all thread rod over the top of the pipe being braced or underneath the pipe being braced to accommodate the desired brace angle. It can be fixed in place or moved to a new location by sliding along the pipe or snapping on or off and relocating. An entire prefabricated assembly (Fig. 76 & 77 joined with ATR) can be pre-assembled to save time and labor and later be field installed and adjusted to fit.

Installation Instructions: Install TOLCO™ Fig. 77 system attachment to sprinkler pipe branch line to be restrained. You can position with the rod engagement either above or below the sprinkler pipe. Rod must extend a min. of 1’ (25.4) past the edge of the Fig. 77. The attachment can be slid along the pipe to position close to where the Fig. 76 structural attachment will be fastened to the structure. The snap on design allows maximum adjustability during this stage of the installation process. Engage ATR (previously attached to the Fig. 76 structural attachment to the rod engagement portion of the Fig. 77 system attachment. Tighten set bolt on Fig. 77 system attachment until head breaks off verifying proper installation torque. For more information visit our website for the most up to date instructions sheets.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL).
For FM Approved information refer to FM Approved page 45.

Finish: Pre-Galvanized.

Order By: Figure number and pipe size.

Eaton
TOLCO™ Fig. 77 - System Piping Attachment for Sway Brace Assembly (FM Approved)
For CPVC & Steel Pipe

Size Range: ¾” and ½” all threaded rod (ATR)
Material: Steel
Function: System attachment for restraint
Features: The Fig. 77 is to be used with both (IPS) steel and CPVC fire sprinkler pipe, in 1” through 2” diameters. It fits multiple rod diameters allowing for field adjustment if longer brace material is needed. Its sturdy break-off bolt will not strip and verifies proper installation. Its snap on design has many advantages. It can be installed with one-hand, can easily position the brace all thread rod over the top of the pipe being braced or underneath the pipe being braced to accommodate the desired brace angle. It can be fixed in place or moved to a new location by sliding along the pipe or snapping on or off and relocating. An entire prefabricated assembly (Fig. 76 & 77 joined with ATR) can be pre-assembled to save time and labor and later be field installed and adjusted to fit.

Installation Instructions: Install TOLCO™ Fig. 77 system attachment to sprinkler pipe branch line to be restrained. It can be positioned with the rod engagement either above or below the sprinkler pipe. Rod must extend a min. of 1” past the edge of the Fig. 77. The attachment can be slid along the pipe to position close to where the Fig. 76 structural attachment will be fastened to the structure. The snap on design allows maximum adjustability during this stage of the installation process. Engage ATR (previously attached to the Fig. 76 structural attachment to the rod engagement portion of the Fig. 77 system attachment. Tighten set bolt on Fig. 77 system attachment until head breaks off verifying proper installation torque. For more information visit our website for the most up to date instructions sheets.

Approvals: Approved by Factory Mutual Engineering (FM).
For UL Listed information refer to UL Listed page 44.

Finish: Pre-Galvanized.
Order By: Figure number and pipe size.

Eaton’s B-Line series seismic bracing components are designed to be compatible only with other B-Line series bracing components, resulting in a listed seismic bracing assembly. Eaton B-Line Division warranty for seismic bracing components will be the warranty provided in Eaton B-Line Division standard terms and conditions of sale made available by Eaton, except that, in addition to the other exclusions from Eaton B-Line Division warranty, Eaton makes no warranty relating to B-Line series seismic bracing components that are combined with products not provided by Eaton.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.

B-Line series Fire Protection Solutions 45 Eaton
TOLCO™ Fig. 3000 - CPVC Sway Brace Attachment

Size Range: Pipe size to be braced: in 1” (25mm) thru 3” (75mm) pipe sizes
Pipe size used for bracing 1” (25mm) Schedule 40 IPS

Material: Steel

Function: For bracing CPVC and steel pipe against sway and seismic disturbance. The pipe attachment component of a sway brace system: Fig. 3000 is used in conjunction with a Fig. 900 Series fitting and joined together with bracing pipe per NFPA 13, forming a complete sway brace assembly.

Features: The Fig. 3000 is UL Listed as a sway brace to be used with both CPVC and (IPS) steel sprinkler pipe, in 1” (25mm) through 3” (75mm) diameters. The unique design does not compress the CPVC pipe, and the brace pipe to system pipe offset keeps the brace pipe from leaving harmful residue and oils on the CPVC pipe. Field adjustable, making critical pre-engineering of bracing pipe length unnecessary and requires no threading of bracing pipe. Comes assembled and ready for installation. Has a built-in visual verification of correct installation. See the following installation note.

Installation Instructions: Slide the Fig. 3000 bracket over the brace member. Place the Fig. 3000 clamp over the pipe being braced, align the holes, and tighten the supplied bolts until the underside of the bolt bottoms out against the Fig. 3000 clamp. The sway brace fitting is intended to be used with any Tolco 900 series transitional or 800 series structural attachments.

Note: Brace member may be over or under the braced pipe.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL).

Finish: Electro-Galvanized

Order By: Figure number and pipe size.

Important Note: Fig. 3000 is precision manufactured to perform its function as a critical component of a complete bracing assembly. To ensure performance, the UL Listing requires the Fig. 3000 must be used with other TOLCO bracing products.

Pipe Supports

B3088S - Seismic Base Stand

Size Range: \(\frac{3}{4}\)" (20mm) thru 4" (100mm) pipe

Material: Steel

Function: Designed as an unthreaded base stand for pipe supports, B3090, B3094, B3095, B3096, B3097 and B3098, to meet requirements of 12X anchor diameter hole spacing for seismic applications. The standard B3088-3 & B3088-6 already meet this requirement.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, height and finish.

Note: See Pipe Hangers & Supports catalog for attachments

B3092 - Adjustable Pipe Saddle Support with Yoke

Size Range: 3/4” (20mm) thru 36” (900mm) pipe

Material: Steel with cast iron reducer

Function: Designed to support horizontal pipe from floor stanchion where vertical adjustment is required. U-bolt and hex nuts are provided to hold pipe securely to saddle. To complete floor stanchion, use with B3088T (page 42) threaded pipe stand.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number and finish

Notes: Order with B3088T for complete stanchion support.
4” (100mm) thru 12” (300mm) fits both steel and ductile iron pipe. For other ductile iron pipe sizes specify B3092DI - size.
3” (80mm) Ductile Iron uses B3092-31/2

B-Line series Fire Protection Solutions 49

Eaton
Pipe Supports

B3093 - Adjustable Pipe Saddle Support

Size Range: 1” (25mm) thru 36” (900mm) pipe

Material: Steel with cast iron reducer

Function: Designed to support horizontal pipe from floor stanchion where vertical adjustment is required. U-bolt and hex nuts are provided to hold pipe securely to saddle. To complete floor stanchion, use with B3088T (page 42) threaded pipe stand.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number and finish

Note: Order with B3088T for complete stanchion support.

Note:

4” (100) thru 12” (300) fits both steel and ductile iron pipe.

For other ductile iron pipe sizes specify B3093DI - size.

3” (80) Ductile Iron uses B3093-3 1/2
All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
**TOLCO™ Fig. 828 - Universal Sway Brace Attachment to Steel (UL Listed)**

**Size Range:** One size accommodates all Fig. 900 Series sway brace attachments. Fits from \( \frac{3}{8} \)” (9.4mm) to \( \frac{3}{8} \)” (22.2mm) thick steel structure. For thicknesses less than \( \frac{3}{8} \)” (9.4mm) refer to Fig. 825 and Fig. 825A.

**Material:** Steel

**Function:** To attach sway bracing and/or hangers to various types of steel structural members.

**Features:** Permits secure non-friction connection without drilling or welding. Unique design allows offset placement on wide flange beam, I-beam, C-channel, open web, welded steel trusses, etc. Secures brace to structure either across or along the beam. Break-off set bolts allow for visual verification of proper installation torque.

**Approvals:** Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13. For FM Approval information refer to FM Approved page 53.

**Installation Instructions:** The Fig. 828 is the structural attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with a TOLCO transitional attachment, “bracing pipe” and a TOLCO “braced pipe” attachment to form a complete bracing assembly. NFPA 13 guidelines should be followed.

**To Install:** Place the Fig. 828 on the flange of the beam, truss, or girder. Be sure the attachment is fully engaged to the rear of the opening. Tighten the cone point set bolts (A) until the heads break off. Tighten the cone point set bolt (B) until the head breaks off. Remove the flange nut from set bolt (B). Install a TOLCO swivel fitting (Fig. 980, 910, 909, or any other TOLCO approved transitional fitting). Use flange nut to secure the swivel fitting*. 

**Finish:** Plain or Electro-Galvanized

**Approx. Weight/100:** 275 Lbs. (124.7kg)

**Order By:** Figure number and finish

TOLCO™ Fig. 825 - Bar Joist Sway Brace Attachment To Steel (UL Listed)

Size Range: One size accommodates all
Fig. 900 Series sway brace attachments. Maximum Horizontal Design Load 2015 lbs (8.96kN).

Material: Steel

Function: To attach sway bracing and hanger assemblies to steel members.

Features: This product’s design incorporates a concentric attachment point which is critical to the performance of structural seismic connections. NFPA 13 indicates the importance of concentric loading of connections and fasteners. Permits secure non-friction connection without drilling or welding. Unique design reinforces point of connection to joist. Break off head set bolt design assures verification of proper installation torque (min. 31 ft.-lbs.).

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13. For FM Approval information refer to FM Approved page 55.

Installation Instructions: Fig. 825 is the structural attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with a TOLCO transitional attachment, “bracing pipe” and a TOLCO “braced pipe” attachment, to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Place the Fig. 825 on the steel beam, tighten the cone point set bolts until heads break off. Attach other TOLCO transitional attachment fitting, Fig. 980, 910, 909, or any other TOLCO approved transitional fitting. Transitional fitting attachment can pivot for adjustment to proper brace angle.

Finish: Plain, Electro-Galvanized and HDG

Approx. Wt./100: 247.5 Lbs. (112.2kg)

Order By: Figure number and finish

TOLCO™ Fig. 906 - Sway Brace Multi-Fastener Adapter

Material: Steel

Application: Allows sway brace fittings to develop greater load carrying ability by providing multiple fastener attachments for steel and wood. The National Fire Protection (NFPA) provides information on fastener loads to various structures. Refer to NFPA 13 (2016) 9.3.5.9.1.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) only when used with TOLCO Fig. 900 Series Earthquake Brace Attachments. Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Installation Instructions: Fig. 906 is a multiple fastener structural attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with a TOLCO transitional attachment, "bracing pipe" and a TOLCO "braced pipe" attachment to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Attach the Fig. 906 to the structural surface as per fastener design guidelines. Attach other TOLCO transitional attachment fitting, Fig. 980, 910, 909, or any other TOLCO approved transitional fitting. Transitional fitting attachment can pivot for adjustment to proper brace angle.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

TOLCO™ Fig. 800 - Adjustable Sway Brace Attachment to Steel  (UL Listed)

Size Range:  4" (101.6mm) thru 18" (457.2mm) beam width

Material: Steel

Function: Seismic brace attachment to steel.

Features: This product’s design incorporates a concentric attachment point which is critical to the performance of structural seismic connections. NFPA 13 indicates the importance of concentric loading of connections and fasteners. Permits secure connection to steel where drilling and/or welding of brace connection could present structural issues.

Installation Instructions: Fig. 800 is the structural attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with a TOLCO transitional attachment, “bracing pipe” and a TOLCO “braced pipe” attachment to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Place the Fig. 800 on the steel beam, tighten the cone point set bolts on flange until the heads break off. Tighten hex head bolts into clamp body until lock washers are fully flat. Attach other TOLCO transitional attachment fitting, Fig. 980, 910, 909, or any other TOLCO approved transitional fitting. Transitional fitting attachment can pivot for adjustment to proper brace angle.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13. * The loads listed are axial loads on the brace. The horizontal load capacity, H, of the brace is: 

\[ H = F \times \sin \theta \]

where \( \theta \) is the installation angle measured from the vertical.

FM Approved design loads are based on ASD design method.

Eaton’s B-Line series seismic bracing components are designed to be compatible only with other B-Line series bracing components, resulting in a listed seismic bracing assembly. Eaton B-Line Division warranty for seismic bracing components will be the warranty provided in Eaton B-Line Division standard terms and conditions of sale made available by Eaton, except that, in addition to the other exclusions from Eaton B-Line Division warranty, Eaton makes no warranty relating to B-Line series seismic bracing components that are combined with products not provided by Eaton.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.

B-Line series Fire Protection Solutions

Eaton
**Seismic Bracing**

**TOLCO™ Fig. 980 - Universal Swivel Sway Brace Attachment - 3/8” to 3/4” (UL Listed)**

**Size Range:** One size fits bracing pipe 1” (25mm) thru 2” (50mm), B-Line series 12 gauge (2.6mm) channel, and all structural steel up to 1/4” (3.17mm) thick.

**Material:** Steel

**Function:** Multi-functional attachment to structure or braced pipe fitting.

**Features:** This product’s design incorporates a concentric attachment opening which is critical to the performance of structural seismic connections. NFPA 13 (2016) 9.3.5.8.4 indicates clearly that fastener table load values are based only on concentric loading. Mounts to any surface angle. Break off bolt head assures verification of proper installation.

**Installation:** Fig. 980 is the structural or transitional attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with the “bracing pipe” and TOLCO “braced pipe” attachment, Fig. 1000, 1001, 2002, 3000, 4L, 4LA, 4A or approved attachment to pipe to form a complete bracing assembly. NFPA 13 guidelines should be followed.

**To Install:** Place the Fig. 980 onto the “bracing pipe”. Tighten the set bolt until the head breaks off. Attachment can pivot for adjustment to proper brace angle.

**Approvals:** —Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

For FM Approval information refer to FM Approved page 61.

**Note:** Fig. 980 Swivel Attachment and Fig. 1001, 1000, 2002, 4A, 4L, 4LA, or approved attachment to pipe that make up a sway brace system of UL Listed attachments and bracing materials which satisfies the requirements of Underwriters Laboratories and the National Fire Protection Association (NFPA)

**Finish:** Plain, Electro-Galvanized or Stainless Steel. Contact customer service for alternative finishes.

**Order By:** Figure number and finish.

**Patent Numbers:** Pat. #6,273,372, Pat. #6,517,030, Pat. #6,953,174, Pat. #7,008,530, Pat. #7,191,987, Pat. #7,441,730, Pat. #7,669,806

Seismic Bracing

TOLCO™ Fig. 980 - Universal Swivel Sway Brace Attachment - 3/8” to 3/4” (FM Approved)

Size Range: One size fits bracing pipe 1” (25mm) thru 2” (50mm), B-Line series 12 gauge (2.6mm) channel, and all structural steel up to 1/4” (31.7mm) thick.

Material: Steel

Function: Multi-functional attachment to structure or braced pipe fitting.

Features: This product’s design incorporates a concentric attachment opening which is critical to the performance of structural seismic connections. NFPA 13 (2016) 9.3.5.8.4 indicates clearly that fastener table load values are based only on concentric loading. Mounts to any surface angle. Break-off bolt head assures verification of proper installation.

Installation: Fig. 980 is the structural or transitional attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with the “bracing pipe” and TOLCO “braced pipe” attachment, Fig. 1000, 1001, 3000, 4L, 4LA, or other TOLCO approved attachment to pipe to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Place the Fig. 980 onto the “bracing pipe”. Tighten the set bolt until the head breaks off. Attachment can pivot for adjustment to proper brace angle.

Approvals: —Approved by Factory Mutual Engineering (FM). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13. For UL Listed information refer to UL Listed page 60.

Note: Fig. 980 Swivel Attachment and Fig. 1000, 1001, 4L, 4LA or other TOLCO approved attachment to pipe that make up a sway brace system of bracing materials which satisfies the requirements of Factory Mutual Engineering and the National Fire Protection Association (NFPA)

Finish: Plain, Electro-Galvanized or Stainless Steel.

Contact customer service for alternative finishes.

Order By: Figure number and finish.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
TOLCO™ Fig. 909 - No-Thread Swivel Sway Brace Attachment (UL Listed)

Size Range: 1” (25mm) bracing pipe. For brace pipe sizes larger than 1” (25mm), use Fig. 980. Available with holes for ½”, 5/8”, or ¾” fastener attachment.

Material: Steel, hardened cone point set bolt

Function: The structural component of a sway and seismic bracing system.

Features: This product’s design incorporates a concentric attachment opening which is critical to the performance of structural seismic connections. NFPA 13 indicates clearly that fastener table load values are based only on concentric loading. No threading of the bracing pipe is required. Open design allows for easy inspection of pipe engagement.

Application Note: Fig. 909 is used in conjunction with the Fig. 1000, Fig. 1001, Fig. 4A or Fig. 4L or other approved TOLCO attachment to pipe, and joined together with bracing pipe. Sway brace assemblies are intended to be installed in accordance with NFPA 13. The required type, number and size of fasteners used for the structure attachment fitting shall be in accordance with NFPA 13.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Installation Instructions: Fig. 909 is the structural or transitional attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with the ‘bracing pipe’ and TOLCO ‘braced pipe’ attachment, Fig. 1000, 1001, 2002, 3000, 4A, 4LA or other approved TOLCO attachment to pipe to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Place the Fig. 909 onto the bracing pipe. Tighten the set bolt until the head bottoms out on surface. Attachment can pivot for adjustment to proper brace angle.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, fastener attachment size and finish.

Eaton’s B-Line series seismic bracing components are designed to be compatible only with other B-Line series bracing components, resulting in a listed seismic bracing assembly. Eaton B-Line Division warranty for seismic bracing components will be the warranty provided in Eaton B-Line Division standard terms and conditions of sale made available by Eaton, except that, in addition to the other exclusions from Eaton B-Line Division warranty, Eaton makes no warranty relating to B-Line series seismic bracing components that are combined with products not provided by Eaton.
TOLCO™ Fig. 910 - Threaded Swivel Sway Brace Attachment (UL Listed)

Size Range: 1” (25mm) bracing pipe. For brace pipe sizes larger than 1” (25mm), use Fig. 980. Available with holes for 1/2”, 5/8”, or 3/4” fastener attachment.

Material: Steel

Function: For bracing pipe against sway and seismic disturbances. The building attachment component of a sway brace system; the Fig. 910 is used in conjunction with the Fig. 1001, Fig. 1000 or with a Fig. 4A, Fig. 4L, or Fig. 4LA pipe clamp and joined together with a brace pipe per NFPA 13.

Features: This product’s design incorporates a concentric attachment opening which is critical to the performance of structural seismic connections. NFPA 13 (2010) 9.3.5.8.4 and (2013-2016) 9.3.5.11.5 indicates that fastener table load values are based only on concentric loading. Universal swivel design allows Fig. 910 to be attached at any surface angle.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Installation Instructions: Fig. 910 is a structural or transitional attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with the "bracing pipe", and TOLCO ‘braced pipe’ attachment, Fig. 1000, Fig. 1001, Fig. 4A, Fig. 4L or Fig. 4LA to form a complete bracing assembly. Follow NFPA 13 and/or OSHPD guidelines.

To Install: Thread the pipe into the Fig. 910 until pipe threads are visible through inspection site hole. Attachment can pivot for adjustment to proper brace angle.

Note: Fig. 910 swivel attachment and Fig. 1001, 1000, 2002, 3000, 4A, 4L, or 4LA pipe clamps make up a sway brace system of (UL) Listed attachments and bracing materials which satisfies the requirements of Underwriters Laboratories and the National Fire Protection Association (NFPA).

Finish: Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size, fastener attachment size, and finish.

TOLCO™ Fig. 907 - Multi-Angle Attachment

Size Range: 1” (25.4mm) x 1” (25.4mm), 1” (25.4mm) x 1 1/4” (31.7mm) and 1 1/4” (25.4mm) x 1 1/4” (25.4mm) bracing pipe.

Material: Steel, hardened cone (or cup) point set bolt

Function: For attaching two pieces of pipe together at various angles.

To Install: Attach the Fig. 907 over one piece of pipe and adjust to desired position. Tighten set bolt until head bottoms out on surface, then repeat the process for the second pipe.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, bracing pipe sizes and finish.

**TOLCO™ Fig. 975 - Straight Sway Brace Fitting (UL Listed)**

Size Range: 1" (25mm) bracing pipe. For brace pipe sizes larger than 1" (25mm), use Fig. 980. Available with holes for 1/2", 5/8", or 3/4" fastener attachment.

Material: Steel

Function: For bracing pipe against sway and seismic disturbances. The building attachment component of a sway brace system; the Fig. 975 is used in conjunction with the Fig. 1000, Fig. 1001 or with any approved TOLCO seismic bracing attachment to pipe and joined together with a brace pipe per NFPA 13.

Features: Open design allows for easy checking of thread engagement.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL).

Installation: Fig. 975 is the structural or transitional attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with the "bracing pipe" and TOLCO "braced pipe" attachment, Fig. 1000, 1001, 4A or any approved TOLCO seismic bracing attachment to pipe to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Thread the Fig. 975 onto the threaded bracing pipe. Attachment can pivot for adjustment to proper brace angle. Bending of plate not permitted.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number and finish.

Note: Bending of this fitting alters the material strength and voids the cULus Listing. Use Fig. 980, 910, 909, or any other TOLCO fitting when angled fitting is required.

B-Line series Fire Protection Solutions

---

Eaton
Seismic Bracing

TOLCO™ Fig. 1001 - Sway Brace Attachment (UL Listed)

Size Range: Pipe size to be braced: 1” (25mm) thru 8” (200mm) IPS. Pipe size used for bracing: 1” (25mm) and 1 1/4” (32mm) Schedule 40 IPS.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance. The pipe attachment component of a sway brace system: Fig. 1001 is used in conjunction with a Fig. 900 Series fitting and joined together with bracing pipe per NFPA 13, forming a complete sway brace assembly.

Features: Can be used to brace schedule 7 through schedule 40 IPS. Field adjustable, making critical pre-engineering of bracing pipe length unnecessary. Unique design requires no threading of bracing pipe. Comes assembled and ready for installation. Fig. 1001 has built-in visual verification of correct installation. See installation note below.

Installation Note: Position Fig. 1001 over the pipe to be braced and tighten two hex head cone point set bolts until heads bottom out. A minimum of 1” (25mm) pipe extension is recommended. Brace pipe can be installed on top or bottom of pipe to be braced.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13. For FM Approval information refer to FM Approved page 67.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Order by figure number, pipe size to be braced, followed by pipe size used for bracing (1” (25mm) or 1 1/4” (32mm)), and finish.

Important Note: Fig. 1001 is precision manufactured to perform its function as a critical component of a complete bracing assembly. To ensure performance, the UL Listing requires that Fig. 1001 must be used only with other TOLCO bracing products.

TOLCO™ Fig. 1001 - Sway Brace Attachment (FM Approved)

Size Range: Pipe size to be braced: 1” (25mm) thru 8” (200mm) IPS. Pipe size used for bracing: 1” (25mm) and 1 1/4” (32mm) Schedule 40 IPS.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance. The pipe attachment component of a sway brace system: Fig. 1001 is used in conjunction with a Fig. 900 Series fitting and joined together with bracing pipe per NFPA 13, forming a complete sway brace assembly.

Features: Can be used to brace schedule 7 through schedule 40 IPS. Field adjustable, making critical pre-engineering of bracing pipe length unnecessary. Unique design requires no threading of bracing pipe. Can be used as a component of a four-way riser brace. Comes assembled and ready for installation. Fig. 1001 has built-in visual verification of correct installation. See installation note below.

Installation Note: Position Fig. 1001 over the pipe to be braced and tighten two hex head cone point set bolts until heads bottom out. A minimum of 1” (25mm) pipe extension is recommended. Brace pipe can be installed on top or bottom of pipe to be braced.

Approvals: Approved by Factory Mutual Engineering (FM). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

For UL Listed information refer to UL Listed page 66.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Order by figure number, pipe size to be braced, followed by pipe size used for bracing (1” (25mm) or 1 1/4” (32mm)), and finish.

Important Note: Fig. 1001 is precision manufactured to perform its function as a critical component of a complete bracing assembly. To ensure performance, the FM Approval requires that Fig. 1001 must be used only with other TOLCO bracing products.

Designed to meet or exceed requirements of FM DS 2-8.

1 FM Approved when used with 1 or 1 1/4 inch NPS Schedule 40 GB/T 3091, EN 10255H, or JIS G3451 steel pipe as the brace member.
2 Load rating for LW above refers to FM Approved Lightwall Pipe commonly referred to as “Schedule 7”. These ratings may also be applied when EN 10220 and GB/T 8163 steel pipe.
3 Load rating for Schedule 10 above may be applied to GB/T 3092, EN 10255M and H, or JIS G3454, FM Approved Thinwall, or Schedule 40 steel pipes.

Note: See UL load ratings in UL Listed Design Load chart shown under drawing.

Note: Metric sizes are available, contact factory.
Seismic Bracing

TOLCO™ Fig. 1000 - “Fast Clamp” Branch Line Restraint Attachment  (UL Listed)

Size Range: Pipe size to be braced: 1” (25mm) thru 4” (100mm) 40 IPS. Pipe size used for bracing: 1” (25mm) and 1 1/4” (32mm) Schedule 40 IPS.

For pipe sizes larger than 2” (500mm) please refer to TOLCO Fig. 1001.

Material: Steel

Function: A restraint device intended for lateral bracing.

Features: Field adjustable, making critical pre-engineering of bracing pipe unnecessary. Unique design requires no threading of bracing pipe. Steel leaf spring insert provided to assure installer and inspector necessary minimum torque has been achieved.

Installation: Fig. 1000 is the “braced pipe” attachment component of a lateral sway brace assembly. It is intended to be combined with the “bracing pipe” and TOLCO structural attachment component, Fig. 980, 910, 909 or other approved TOLCO component to form a complete bracing assembly. Follow NFPA 13 guidelines.

To Install: Place the Fig. 1000 over the pipe to be braced, insert bracing pipe through opening leaving a minimum of 1” extension. Brace pipe can be installed on top or bottom of pipe to be braced. Tighten hex nuts until leaf spring is flat. It is recommended that the brace angle be adjusted before hex nuts are fully tightened.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Approved for use with engineered light wall sprinkler pipe up to 2” as a restraint device. Torque requirement is 6-8 ft./lbs. (8-10Nm). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

For FM Approval information refer to FM Approved page 69.

Application Note: Position Fast Clamp and tighten two hex nuts until leaf spring flattens. A minimum of 1” pipe extension beyond the Fig. 1000 is recommended.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Order by figure number, pipe size to be braced, followed by pipe size used for bracing (1” (25mm) or 1 1/4” (32mm)), and finish.

Eaton’s B-Line series seismic bracing components are designed to be compatible only with other B-Line series bracing components, resulting in a listed seismic bracing assembly. Eaton B-Line Division warranty for seismic bracing components will be the warranty provided in Eaton B-Line Division standard terms and conditions of sale made available by Eaton, except that, in addition to the other exclusions from Eaton B-Line Division warranty, Eaton makes no warranty relating to B-Line series seismic bracing components that are combined with products not provided by Eaton.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
Seismic Bracing

TOLCO™ Fig. 1000 - “Fast Clamp” Sway Brace Attachment (FM Approved)

Size Range: Pipe size to be braced: 1” (25mm) thru 4” (100mm) 40 IPS. Pipe size used for bracing: 1” (25mm) and 1 1/4” (32mm) Schedule 40 IPS. For pipe sizes larger than 4” (100mm) please refer to TOLCO Fig. 1001.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance.

Features: Field adjustable, making critical pre-engineering of bracing pipe unnecessary. Unique design requires no threading of bracing pipe. Steel leaf spring insert provided to assure installer and inspector necessary minimum torque has been achieved.

Installation: Fig. 1000 is the “braced pipe” attachment component of a lateral sway brace assembly. It is intended to be combined with the “bracing pipe” and TOLCO structural attachment component, Fig. 980 or other approved TOLCO seismic brace to form a complete bracing assembly. Follow NFPA 13 guidelines.

To Install: Place the Fig. 1000 over the pipe to be braced, insert bracing pipe through opening leaving a minimum of 1” extension. Brace pipe can be installed on top or bottom of pipe to be braced. Tighten hex nuts until leaf spring is flat. It is recommended that the brace angle be adjusted before hex nuts are fully tightened.

Approvals: Approved by Factory Mutual Engineering (FM). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13. For UL Listed information refer to UL Listed page 68.

Application Note: Position Fast Clamp and tighten two hex nuts until leaf spring flattens. A minimum of 1” pipe extension beyond the Fig. 1000 is recommended.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Order by figure number, pipe size to be braced, followed by pipe size used for bracing (1” (25mm) or 1 1/4” (32mm)), and finish.

Designated to meet or exceed requirements of FM DS 2-8.

Seismic Bracing

TOLCO™ Fig. 2002 - Sway Brace Attachment (UL Listed)

**Size Range:** Pipe size to be braced: 2 1/2” (65mm) thru 8” (200mm) all steel schedules. Consult factory when bracing other than steel. The Fig. 2002 accepts brace pipes sizes 1 1/2” (40mm) and 2” (50mm) steel schedule 10 through schedule 40.

**Material:** Steel

**Function:** For bracing pipe against sway and seismic disturbance. The pipe attachment component of a sway brace system: Fig. 2002 is used in conjunction with a TOLCO Fig. 980 sway brace attachment and joined together with bracing pipe. Install per NFPA 13.

**Features:** Easy verification of proper installation by tightening bolts until ears touch.

**Installation:** Place Fig. 2002 over pipe to be braced. Slide bracing pipe through attachment and tighten hex nuts until ears touch.

**Approvals:** Underwriters Laboratories Listed in the USA (UL) and Canada (cUL).

**Finish:** Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

**Order By:** Figure number, pipe size to be braced, pipe size used for bracing (1 1/2” (40mm) or 2” (50mm)) and finish.

**Important Note:** Fig. 2002 is precision manufactured to perform its function as a critical component of a complete bracing assembly. To ensure performance, the UL Listing requires that the Fig. 2002 must be used only with other TOLCO bracing products.

**TOLCO™ Fig. 75 - Swivel Attachment**

**Function:** Three recommended applications for this product:
- May be used as a branch line restraint for structural attachment to anchor bolt, beam clamp, etc.
- May be used as an upper attachment with short hanger rod to omit seismic bracing.
- May be used in a pitched or sloped roof application, to meet requirements of NFPA 13 (2010) 9.1.2.6.

Refer to page 41 for more information and sizing.

---

**Fig. 76 - TOLCO™ Structural Attachment for Branch Line Restraint Assembly (UL Listed)**

**Function:** Structural attachment for branch line restraint or sway brace assembly

Refer to pages 42 for UL Listed information and sizing.
Refer to pages 43 for FM information and sizing.

---

**Fig. 77 - TOLCO™ Structural Attachment for Branch Line Restraint Assembly (UL Listed)**

**Function:** System attachment for branch line restraint or sway brace assembly

---

**TOLCO™ Fig. 3000 - CPVC Sway Brace Attachment**

**Function:** For bracing CPVC and steel pipe against sway and seismic disturbance. The pipe attachment component of a sway brace system: Fig. 3000 is used in conjunction with a Fig. 900 Series fitting and joined together with bracing pipe per NFPA 13, forming a complete sway brace assembly.

Refer to page 46 for more information and sizing.
Seismic Bracing

TOLCO™ Fig. 98 - Rod Stiffener
TOLCO™ Fig. 98B - Rod Stiffener with Break-Off Bolt Head

Size Range: Secures 3⁄8"-16 thru 7⁄8"-9 hanger rod

Material: Steel

Function: Secures channel to hanger rod for vertical seismic bracing.

Approvals: Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines OPM-0052-13.

Finish: Electro Galvanized. Contact customer service for alternative finishes and materials.

Weight: Approx. Wt./100: Fig. 98 - 11.8 Lbs. (5.3kg)
Fig. 98B - 12.7 Lbs. (5.7kg)

Order By: Figure number

Notes:
1.) Rod stiffeners are required only on hanger and trapeze assemblies that have seismic bracing attached at or within 6” (152.4mm) of the rod. A minimum of two rod stiffeners (Figure 98, 98B, or SC228) must be installed.

2.) Recommended torque on Figure 98 and SC228 is 8 ft-lbs. (10.8Nm) or finger tight and one full turn with a wrench. Figure 98B has the break off bolt head.

Fig. SC228 - Hanger Rod Stiffener

Size Range: Secures 3⁄8"-16 thru 5⁄8"-11 hanger rod

Material: Steel

Function: Secures channel to hanger rod for vertical seismic bracing. Slight distortion of the channel (strut) may occur upon installation of rod stiffeners.

Finish: Electro Galvanized. Contact customer service for alternative finishes and materials.

Weight: Approx. Wt./100: 21.0 Lbs. (9.5kg)

Order By: Figure part number

Note: Order channel separately

* Use with SC228 only.

Notes:

1.) Rod stiffeners are required only on hanger and trapeze assemblies that have seismic bracing attached at or within 6” (152.4mm) of the rod. A minimum of two rod stiffeners (Figure 98, 98B, or SC228) must be installed.

2.) Recommended torque on Figure 98 and SC228 is 8 ft-lbs. (10.8Nm) or finger tight and one full turn with a wrench. Figure 98B has the break off bolt head.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
TOLCO™ Fig. 4A - Pipe Clamp for Sway Bracing

Size Range: 2½" (65mm) thru 8" (200mm) pipe. For sizes smaller than 2½" (65mm) use Fig, 4LA.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) 2½" (65mm) thru 8" (200mm).

Installation Instructions: Fig. 4A is the “braced pipe” attachment component of a longitudinal, lateral or riser brace assembly. It is intended to be combine with the “bracing pipe” and TOLCO transitional and structural attachment component(s) to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Place the Fig. 4A over the pipe to be braced. Attach TOLCO transitional fitting, either Fig. 980, 910 or 909, to the clamp ears. Tighten bolts and nuts; torque requirement is a minimum of 50 ft./lbs. (68Nm). Transitional fitting attachment can pivot for adjustment to proper brace angle.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size and finish

Note: Please refer to Fig. 4LA for longitudinal brace applications for 1” (25mm) - 12” (300mm) pipe sizes.

Eaton's B-Line series seismic bracing components are designed to be compatible only with other B-Line series bracing components, resulting in a listed seismic bracing assembly. Eaton B-Line Division warranty for seismic bracing components will be the warranty provided in Eaton B-Line Division standard terms and conditions of sale made available by Eaton, except that, in addition to the other exclusions from Eaton B-Line Division warranty, Eaton makes no warranty relating to B-Line series seismic bracing components that are combined with products not provided by Eaton.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
TOLCO™ Fig. 4L - Longitudinal In-Line Sway Brace Attachment (UL Listed)

Size Range: 2” (50mm) through 8” (200mm) IPS.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance.

Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL) 2 1/2” (65mm) through 8” (200mm) pipe.

For FM Approval information refer to FM Approved page 75.

Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD).

For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Installation Instructions: Fig. 4L is the "braced pipe" attachment component of a longitudinal sway brace assembly. It is intended to be combined with the "bracing pipe" and TOLCO structural attachment component to form a complete bracing assembly. NFPA 13 guidelines should be followed.

To Install: Place the Fig. 4L over the pipe to be braced and tighten bolts. Then engage "bracing pipe" into jaw opening and tighten set bolt until head snaps off. Jaw attachment can pivot for adjustment to proper brace angle.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size and finish.

TOLCO™ Fig. 4L - Longitudinal In-Line Sway Brace Attachment  (FM Approved)

Size Range: 2 1/2” (65mm) through 8” (200mm) IPS.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance.

Approvals: Approved by Factory Mutual Engineering (FM), 2 1/2” (65mm) through 8” (200mm) pipe.
For UL Listed information refer to UL Listed page 74.
Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD).
For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Installation Instructions: Fig. 4L is the “braced pipe” attachment component of a longitudinal sway brace assembly. It is intended to be combined with the “bracing pipe” and TOLCO structural attachment component to form a complete bracing assembly. NFPA 13 and/or FM guidelines should be followed.

To Install: Place the Fig. 4L over the pipe to be braced and tighten bolts. Then engage “bracing pipe” into jaw opening and tighten set bolt until head snaps off. Jaw attachment can pivot for adjustment to proper brace angle.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size and finish.

Designed to meet or exceed requirements of FM DS 2-8.

Seismic Bracing

TOLCO™ Fig. 4LA - In-Line Sway Brace Attachment (UL Listed)

Size Range: 1” (25mm) through 8” (200mm) IPS.

Material: Steel

Function: For bracing pipe against sway and seismic disturbance.

Approvals: For FM Approval information refer to FM Approved page 77. Underwriters Laboratories Listed in the USA and Canada (cULus). Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Installation Instructions: Fig. 4LA can be used as the system attachment component of a longitudinal or lateral brace assembly. It is intended to be combined with the "bracing member" and TOLCO transitional attachment and structural attachment to form a complete bracing assembly. For fire sprinkler applications NFPA 13 guidelines should be followed.

To Install: Place the Fig. 4LA pipe clamp component over the pipe to be braced and tighten down the break-off nuts until the hex head portion breaks off to verify correct installation torque. Next engage brace member (pipe or strut) with jaw component and tighten break-off head bolt until the hex head breaks off to verify correct installation torque. Pivot jaw for correct angle and attach to structure using TOLCO brand transitional attachment and structural attachment.

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number, pipe size and finish.

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.
**Seismic Bracing**

**TOLCO™ Fig. 4LA - In-Line Sway Brace Attachment (FM Approved)**

**Size Range:** 1” (25mm) through 12” (300mm) IPS.

**Material:** Steel

**Function:** For bracing pipe against sway and seismic disturbance.

**Approvals:** Approved by Factory Mutual Engineering (FM), 1” (25mm) through 12” (300mm) pipe.

For UL Listed information refer to UL Listed page 76.

Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD).

For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

**Installation Instructions:** Fig. 4LA can be used as the system attachment component of a longitudinal or lateral brace assembly.

It is intended to be combined with the "bracing member" and TOLCO transitional attachment and structural attachment to form a complete bracing assembly.

For fire sprinkler applications NFPA 13 guidelines should be followed.

**To Install:** Place the Fig. 4LA pipe clamp component over the pipe to be braced and tighten down the break-off nuts until the hex head portion breaks off to verify correct installation torque.

Next engage brace member (pipe or strut) with jaw component and tighten break-off head bolt until the hex head breaks off to verify correct installation torque.

Pivot jaw for correct angle and attach to structure using TOLCO brand transitional attachment and structural attachment.

**Finish:** Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

**Order By:** Figure number, pipe size and finish.

* Eaton’s B-Line series seismic bracing components are designed to be compatible only with other B-Line series bracing components, resulting in a listed seismic bracing assembly. Eaton B-Line Division warranty for seismic bracing components will be the warranty provided in Eaton B-Line Division standard terms and conditions of sale made available by Eaton, except that, in addition to the other exclusions from Eaton B-Line Division warranty, Eaton makes no warranty relating to B-Line series seismic bracing components that are combined with products not provided by Eaton.*

All dimensions in charts and on drawings are in inches. Dimensions shown in parentheses are in millimeters unless otherwise specified.

B-Line series Fire Protection Solutions

Eaton
Seismic Bracing

TOLCO™ Figure 4B Pipe Clamp

Size Range: 3/4” (20mm) to 8” (200mm) pipe

Material: Steel

Function: For bracing pipe against sway and seismic disturbance

Approvals: Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

Standard Finish: Plain or Electro-Plated. Contact customer service for alternative finishes and materials.

Ordering: Specify part number and finish.

Installation Instructions: Fig. 4B is the “braced pipe” attachment component of a longitudinal or lateral sway brace assembly. It is intended to be combined with the “bracing pipe” and transitional and structural attachment component(s) to form a complete bracing assembly. OSHPD guidelines should be followed.

To Install: Place the Fig. 4B over the pipe to be braced. Attach other transitional fitting, Fig. 909, 910, 980, or 990. Tighten bolts and nuts. Transitional fitting attachment can pivot for adjustment to proper brace angle.

Concrete Anchors

AWSD Series - Power Stud+® SD2 Seismic Wedge Anchors

Features:
• Fully threaded, torque-controlled, wedge anchor which is designed for consistent performance in cracked and uncracked concrete.
• For use in concrete, structural sand lightweight concrete, and concrete over metal deck.
• Nominal drill bit size is the same as the anchor diameter.
• ICC-ES listed, ESR-2502, Category 1
• Zinc plated carbon steel body with stainless steel expansion clip from premium performance.
• Qualified for seismic and wind loading.

Approvals: Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

ICC-ES Certified. See ICC-ESR-2502
UL (Underwriters Laboratories) Listed
FM (Factory Mutual) Approved

Refer to pages 11-20 through 11-23 in Seismic Engineering Guidelines OPM-0052-13 for approval OSHPD structural attachment data.

Concrete Anchors

TOLCO™ Fig. 109DD - DDI+™ - Concrete Deck Insert - Hanger Application

Size Range: ⅜"-16 thru 7/8"-9 rod
Material: Steel

Function: For use in concrete filled metal deck (20 GA. min.) assemblies (i.e. pan deck, Q-deck) applications. After installation, the threaded male hanger of the insert protrudes below the surface of the deck. The threaded bolt offers adjustability for precise height requirements and guarantees the minimum embedment depth. The longer plate enables a variety of installation locations across the deck. Pre-mounted drill screws included for installation.

Approvals: International Code Council, Evaluation Service (ICC-ES), ESR-3958 for concrete, for ⅜"-16 thru ⅝"-11" anchor sizes. Approved for seismic and wind loading. UL (Underwriters Laboratories) Listed FM (Factory Mutual) Approved

Order By: Figure number, rod size and finish.

Applications Per NFPA 13 (2010): UL Listed as a component of a hanger assembly per Section 9.1.1.4.1

See dimensions and installation Detail below.

Note: Fig. 109DD replaces Fig. 109A which has been discontinued.

</tbody>
</table>

NOTES:
1. Mounting holes are standard. If the plate is not mechanically secured to the deck ribs, a jam nut is required to prevent the anchor bolt from laying over when concrete is poured. There is no structural strength added from the use of a mechanical fastener to hold the product in place before the pour.
2. Minimum spacing between inserts shall be not less than 3 times the embedment depth or 12 times the anchor diameter (whichever is greater)

B-Line series Fire Protection Solutions

Eaton
Concrete Anchors

ACPW Series - Wood-Knocker™ II

Features:
- Wood-Knocker™ concrete inserts are installed onto wooden forms used to support newly poured concrete floor slabs, roof slabs or walls.
- When the forms are stripped, the color-coded flange is visibly embedded in the concrete surface.
- The unique, six sided impact plate offers resistance to rotation within the concrete as threaded rod is being installed.
- Suitable for overhead installations such as suspending cable tray, pipe hangers, strut and conduit.
- Color coded by size for all trades.
- UL and FM approved.
- Lowest installation cost.

Approvals: Qualified for static, wind, and seismic loading in concrete.
- Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.
- ICC-ES Certified. See ICC-ESR-3657
- UL (Underwriters Laboratories) Listed
- FM (Factory Mutual) Approved

**ACPD Series - Bang-It™+ Anchors**

**Features:**
- Bang-It™ concrete inserts are designed for installation in and through metal composite deck used to support newly poured concrete floors or roof slabs.
- After installation, the protective sleeve of the insert protrudes below the surface of the deck, allowing overhead attachment of threaded rod.
- The unique, six sided impact plate offers resistance to rotation within the concrete as threaded rod is being installed.
- Suitable for overhead installations such as suspending cable tray, pipe hangers, strut and conduit.
- Color coded by size for all trades.
- Lowest installation cost.

**Approvals:** Qualified for static, wind, and seismic loading in concrete. Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). Concrete Anchors

ACB Series - Concrete Screw Bolts

Features:
- For use in racking, shelving, material handling, structural anchorage, masonry AND food & beverage facilities.
- One piece heavy-duty anchor with a finished hex-head.
- Anchor design allows for shallow embedment and mechanically interlocks with base material.
- Fast installation and immediate loading reduces downtime.
- For proper performance, screw anchors must be installed with the corresponding bits. The bits have a matched tolerance range designed to provide optimum performance.

ATM Series - Self-Tapping Machine Screw Anchors

Features:
- For use in normal-weight concrete, structural sand lightweight concrete and concrete over metal deck.
- Anchor design allows for shallow embedment and mechanically interlocks with base material.
- Internally threaded anchor for easy adjustment and removability of threaded rod or bolt.
- Fast anchor installation with a powered impact wrench.
- Suitable for overhead applications such as suspending cable tray, strut, pipe hangers and conduit.
- Made of Zinc Plated carbon steel.
- Setting tool included.
- Approvals: ICC-ES certified. See ICC-ESR-2272. FM (Factory Mutual) Approved

B3065 - Welded Bracket - Light Duty

**Max. Recommended Load:** 275 lbs. (1.22kN)

**Material:** Steel

**Function:** Recommended for supporting pipe on top or hanging through support bracket outward from mounting surface.

**Finish:** Plain

**Note:** Available in Electro-Galvanized and HDG finish or Stainless Steel materials.

**Order By:** Figure number and finish

TOLCO™ Fig. 78 - All Steel Ceiling Plate

Size Range: 3/8"-16 rod
Material: Pre-Galvanized Steel
Function: Attachment to wood beams, ceilings, metal decks or walls. Can also be welded to steel beams.
Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL). Additionally, UL has listed the Fig. 78 with fasteners as shown in the table below.
Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.
Order By: Figure number, rod size and finish
Patent #5,702,077

* No pre-drilling

Larger pipe sizes can be hung with reduced spacing.

TOLCO™ Fig. 51 - Side Beam Bracket for NFPA Rod & Fastener Sizing

Size Range: 3/8"-16 thru 1/2"-13 rod, 1/2" (15mm) thru 8" pipe (200mm)
Material: Steel
Function: Recommended for attaching hanger rod to side of beams or walls. Designed to accommodate current rod schedule and fastener requirements per National Fire Protection Association (NFPA) Pamphlet 13.
Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL), and Factory Mutual Engineering approved.
Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.
Order By: Figure number and finish

TOLCO™ Fig. 56 - Tapped Side Beam Connector (Stainless Steel)

Size Range: 1/2" (15mm) thru 4" (100mm) pipe (3/8"-16 rod)
Material: Stainless Steel Type 304 or 316
Function: Recommended for attaching hanger rod to steel or wood beams. Tapped hole allows easy adjustment of hanger rod.
Approvals: Underwriters Laboratories Listed in the USA (UL) and Canada (cUL), and Factory Mutual Engineering (FM) approved for 1/2" (15mm) thru 4" (100mm) pipe.
Order By: Figure number
Note: Available only in Stainless Steel materials.
Per NFPA 13: 1/2" (15mm) thru 2" (50mm) pipe use 3/8"-16 fastener; 2 1/2" (65mm) thru 4" (100mm) pipe, use 1/2"-13 fastener.

TOLCO™ Fig. 58 - Threaded Side Beam Bracket

**Size Range:** 3/8"-16 rod, pipe sizes 1/2" (15mm) thru 4" (100mm)

**Material:** Pre-Galvanized Steel

**Function:** Practical and economical bracket used to support piping from wood, concrete or steel beams.

**Features:** Unique design allows rod to be easily threaded into bracket. Offset design permits unlimited rod adjustment. Center mounting hole will accept 3/8" and 1/2" fastener bolts. Per NFPA 13: 1/2" (15mm) thru 2" (50mm) pipe requires 3/8" fastener, 21/2" (65mm) thru 4" (100mm) pipe requires 1/2" fastener.*

**Approvals:** Underwriters Laboratories Listed in the USA (UL) and Canada (cUL), and Factory Mutual Engineering approved thru 4" (100mm) pipe.

**Finish:** Pre-Galvanized

**Order By:** Figure number and finish

*Note: Additionally UL has listed the Fig. 58 with fasteners as shown in table below.

Threaded Attachments

**B3200 - Weldless Eye Nut**

**Size Range:** 3/8”-16 thru 2 1/2”-4 1/2 machine thread.

**Material:** Forged Steel

**Quality Assurance:** Conforms to the requirements of NCA 3800.

**Threads:** Tapped UNC Class 2B. Right hand threads are standard. Left hand threads supplied upon request (B3200L).

**Function:** Used on piping installations where high strength and swivel action are required. Left hand tap is also available.

**Approvals:** Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

**Finish:** Plain. Contact customer service for alternative finishes and materials.

**Order By:** Figure number and finish.

## B501 - Light Weight U-Bolt with 2 Hex Nuts

**Size Range:** Size 1/2” (15mm) thru 8” (200mm) pipe  
**Material:** Carbon Steel  
**Function:** Recommended for supporting or anchoring light pipe loads.  
**Maximum Temperature:** 650°F (343°C)  
**Finish:** Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.  
**Order By:** Figure number and finish.  
**Note:** When furnished in Hot-Dip Galvanized finish, oversize tapped hex nuts must be used.

Threaded Accessories

B3188 - Standard U-Bolt with 4 Hex Nuts
B3188C - Standard Plastic Coated U-Bolt

Size Range: Size 1/2" (15mm) thru 30" (900mm) pipe

Material: Steel

Function: Recommended for support, anchor or guide of pipe.

Maximum Temperature: 750°F (399°C)

Finish: Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

Order By: Figure number and finish. U-bolt can be furnished with longer tangents “D” or with longer threads “E”. Consult factory.

Note: When furnished in Hot-Dip Galvanized finish, oversize tapped hex nuts must be used.
B3188NS - Non-standard (NS) U-bolts are available upon request. Specify dimensions other than standard. B3188DI - For ductile iron pipe.

### Threaded Accessories

**B3205 - Threaded Rod (right-hand threads - both ends)**

**B3205L - Threaded Rod (right & left hand threads)**

**Size Range:** 3/8”-16 thru 7/8”-9 rod

**Material:** Steel

**Function:** Recommended for use as a hanger support in hanger assemblies. Rod is threaded on both ends with right hand threads of the length shown. Also available with left and right hand threads - specify Fig. B3205L when ordering.

**Maximum Temperature:** 750°F (399°C)

**Finish:** Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

**Order By:** Figure number, rod size, length and finish

Threaded Accessories

B3213 - Coach Screw Rod

Size Range: 3/8"-16 rod thru 1/2"-13 rod

Material: Steel

Function: Typically used to suspend pipe from wood joists. Machine threaded on one end and lag threaded on the other end. It is recommended that pilot holes be pre-drilled to prevent beam from splitting and to aid in starting lag threads.

Approvals: Conforms to the requirements of NFPA13.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, rod size, length and finish.

<table>
<thead>
<tr>
<th>Part No.</th>
<th>Thread Size A</th>
<th>Standard Rod Lengths L</th>
<th>Coach Screw Thread Length B</th>
<th>Rod Thread Length C</th>
<th>Design Load</th>
</tr>
</thead>
<tbody>

<td>390 (1.73)</td>
</tr>
<tr>
<td>B3213-1/2 x 'L'</td>
<td>1/2&quot;-13</td>
<td>*3/4&quot;, 8&quot; (88.9, 203.2)</td>
<td>21/2&quot; (63.5)</td>
<td>21/2&quot; (63.5)</td>
<td>640 (2.84)</td>
</tr>
</tbody>
</table>

*3/8 x 3/4" and 1/2 x 3/4" will have a coach screw thread length of 2" (50.8) and a rod thread length of 1" (25.4). Design Load is based on proper installation and solid wood.

B3214 - Tie Bolt

Material: Steel

Function: Recommended for securing the connection of steel pipe to ductile pipe first attach tie bolts to pipe flanges then connect tie rods. May be used in vertical or horizontal applications.

Approvals: As shown in NFPA Pamphlet 24, Installation of Private Fire Service Maintenance 4" (100mm) - 12" (300mm) pipe size.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, length and finish.

Custom lengths for thicker flange available.

---

**B3228 - Hex Head Lag Bolt**

*Material:* Steel  
*Function:* Designed to fasten metal to wood. Lag screws are made with hex heads in lengths of 6" (152.5mm) or shorter and square heads in lengths longer than 6" (152.5mm). Both types have coarse lag threads and gimlet points and are available in diameters of 1/4" (6.3mm) to 5/8" (15.9mm) inclusive. Square-head lag screws are also available in 3/4" (19.0mm), 7/8" (22.2mm) and 1" (25.4mm) diameters.  
*Approvals:* Qualified for static, wind, and seismic loading in concrete. Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.  
*Finish:* Plain or Electro-Galvanized. Contact customer service for alternative finishes and materials.

**B3211 - Welded Eye Rod (right-hand threads)**  
**B3211L - Welded Eye Rod (Left & right hand threads)**

**Size Range:** 3/8"-16 thru 7/8"-9 rod  
**Material:** Steel  
**Function:** Designed for use as support hanger rod that may be attached directly to structure or to other pipe support product. The welded eye allows for heavier loads.  
**Approvals:** Conforms to the requirements of NFPA13.  
**Finish:** Plain. Contact customer service for alternative finishes and materials.  
**Order By:** Figure number, rod size, length and finish  
**Important Note:** The Eye I.D. dimension may be larger if needed. Contact B-line if larger Eye I.D. dimension is required.

Threaded Accessories

B3210X - Linked Eye Rods (Right-hand threads-both ends)
B3210XL - Linked Eye Rods (Left & right threads)

B3211X - Linked Welded Eye Rods (Right-hand threads-both ends)
B3211XL - Linked Welded Eye Rods (Left & right threads)

Size Range: 3/8"-16 thru 7/8"-9 rod

Material: Steel

Function: Designed for use in a hanger assembly where universal movement is necessary. The welded eye rods allow for heavier loads.

Approvals: Conforms to the requirements of NFPA13.

Finish: Plain. Contact customer service for alternative finishes and materials.

Order By: Figure number, rod size, length, and finish.

### B200 - Series Square Washer

**Material:** Steel  
**Standard Finish:** Electro-Galvanized  
**Service:** Designed as a washer to suspend hanger rods.  
**Approvals:** Qualified for static, wind, and seismic loading in concrete. Included in our Seismic Engineering Guidelines approved by the State of California Office of Statewide Health Planning and Development (OSHPD). For additional load, spacing and placement information relating to OSHPD projects, please refer to our Seismic Engineering Guidelines, OPM-0052-13.

</tbody>
</table>

Based on ASTM A53-86.
1 cubic ft. of water weighs 62.41 lbs.
1 gallon (U.S.) weighs 8.335 lbs.
1 cubic meter of water weighs 999.97 kg.
1 liter weighs .999 kg.

*Many codes require pipe hangers to be spaced every 10’ (3.048 meters) regardless of size. Check local codes.
Spacing and capacities are based on water filled pipe. Closer hanger spacing may be required where additional valves and fittings increase the load.
