Snap ‘N Shield support for strut and pipe hangers – new and improved

Eaton.com/snap-n-shield
Ease of installation

New horizontal strut attachment limits the need to lift the pipe during installation; innovative one-piece design for clevis & band hangers
Snap ‘N Shield support for strut and pipe hangers – new and improved

Time savings

Tighter fit limits shield movement along the strut lessening the need for use of self-tapping screws; more than 15% greater contact area to strut on most common sizes

Eaton.com/snap-n-shield
Performance
Structural ribs improve crush rating by more than 25% at strut attachment; larger shield diameters allow for a greater number of pipe and insulation combinations.
Industry standards
MSS standards require 12" of surface contact for pipe sizes up to 4". All sizes of Snap 'N Shield™ have 12" of surface contact; approximately 15% more contact area to insulation to more evenly distribute load.
