Fig. 1001 – Sway brace attachment

**Function:** For bracing pipe against sway and seismic disturbance. Fig. 1001 is the "braced pipe" attachment component of a lateral sway brace assembly. It is intended to be combined with a 1" or 1 1/4" NPS "bracing pipe" and a TOLCO structural attachment component to form a complete bracing assembly. Sway brace assemblies are intended to be installed in accordance with NFPA 13 and the manufacturer’s installation instructions.

**Installation Instructions:** Position Fig. 1001 over the pipe to be braced and tighten two hex head cone point set bolts until heads bottom out. A minimum of 1" pipe extension is recommended. Brace pipe can be installed on top or bottom of pipe to be braced. Rotate Fig. 1001 around pipe until desired angle is achieved and secure to structure using TOLCO brand transitional attachment and structural attachment.

**Important Note:** The Fig 1001 is precision manufactured to perform its function as a critical component of a complete bracing assembly. **The Fig. 1001 is not intended for use with the Fig. 907 4-way Longitudinal Brace Attachment.**

---

**Pipe Type** | **Pipe Size** | **UL Load Rating**
--- | --- | ---
Bull Moose Eddy Flow | 1¼" | 1000 lbs.
| 1½", 2" | 1500 lbs.
| 2½", 3", 4" | 2000 lbs.
Wheatland Mega Flow | 1¼" | 1000 lbs.
| 1½", 2" | 1500 lbs.
| 2½", 3", 4", 6" | 2000 lbs.
Sch. 10 | 1¼" | 1000 lbs.
| 1½", 2" | 1500 lbs.
Sch. 40 | 1", 1¼" | 1000 lbs.
| 1½", 2" | 1500 lbs.

**UL Approved Allowable Horizontal Capacity Per Installation Angle**
