Eaton PS-386
Synthetic Transmission Fluid

PS-386 is a synthetic transmission fluid designed for fuel efficiency, extended drain intervals and severe service in heavy duty commercial vehicle transmissions which require a non-EP transmission lubricant. It is specially formulated to protect higher torque transmissions coupled with increased horsepower engines. It is approved for use in Eaton transmissions such as UltraShift PLUS, Fuller Advantage, FR and RT Series transmissions.

Features:
- Uniquely formulated to provide up to 1.5 percent fuel economy improvement while maintaining excellent shear stability.
- Provides high performance and extended drain capabilities in transmissions.
- Excellent thermal and oxidation stability which resists deposit and sludge formation.
- Advanced additive system provides excellent protection from corrosion, foaming, rust, and wear.
- High viscosity index synthetic base fluid allows for superior high and low temperature performance.
- Provides friction retention, friction durability, and excellent shear stability to ensure and maintain smooth transmission operations throughout the extended drain interval.
- Formulated to reduce sump operating temperatures.

Applications:
Recommended where wear, low temperatures or heat present major problems and a non-EP lubricant is required. Typical usage includes transmissions, transfer cases, and wheel end hubs. Recommended commercial vehicle applications include line haul, vocational, off-road, pick-up and delivery, and buses.

Powering Business Worldwide

APPROVALS
Eaton PS-386 Synthetic Transmission Fluid is approved for these OEM specifications:
- Eaton PS-386 (supercedes PS-164 Rev 7)
- Mack TO-A Plus
- Navistar MPAPS B-6816 Type II
- API MT-1

### Handling

Please refer to safety data sheet for details.

### Shelf life

The product in the original package can be stored for at least three years at ambient storage conditions without any deterioration.
