We make what matters work. *

The jobsite is often unforgiving. The terrain. The heavy loads. The long hours and constant vehicle use. Each day is the truest test of both man and machine. At Eaton, we’re diligently working to help you minimize downtime and maximize the profitability of your fleet.

You demand a lot from your construction, severe service, and vocational trucks — capability, reliability, low cost of ownership, and vehicle control. Our transmissions provide the versatility you need, the performance you can count on, all while keeping your bottom line in mind. Improve your productivity through transmissions designed for fuel efficiency, with less wear and tear on drivetrain components for improved uptime and lower maintenance costs. We’re here to support your fleet every step of the way.

We don’t just talk about profitability, we make it tangible. Get connected with IntelliConnect™ Remote Diagnostics by Eaton, a forward-thinking telematics analysis system for automated transmissions. It maximizes uptime and efficiency by empowering fleet managers with:

• Live data diagnostics using your telematics system
• Fault code action plans with severity levels
• Customized alerts and information
• Vehicle watch lists

This is just one more way Eaton is working to lower your operating costs while making your business run more smoothly.

The jobsite is often unforgiving.

The terrain. The heavy loads. The long hours and constant vehicle use. Each day is the truest test of both man and machine. At Eaton, we’re diligently working to help you minimize downtime and maximize the profitability of your fleet.

See more at: www.roadranger.com

Roadranger® is synonymous with dependability. The one tried-and-true name in the trucking industry, proven time and again. Nobody works harder to keep your trucks where they belong: on the jobsite. Visit www.roadranger.com to find your representative.
Gibco Trucking
Location: Cleveland, TN
Application: Construction
Transmission(s): UltraShift PLUS
Benefits: Fuel efficiency, safety and durability, driver friendliness
“We do not have any intentions of ever buying anything else. We are picking up anywhere from 1.5 to 2 miles per gallon better fuel consumption, so it’s doing great and easy driving and it has meant a big, big difference to us financially.”
-Duane Gilbert, COO, Gibco Trucking

Redbank Transport
Location: Cincinnati, OH
Application: Construction
Transmission(s): RT-8LL, RT-13, UltraShift PLUS
Benefits: Maneuverability, fuel efficiency, driver comfort, superior service and support
“The best part is having so many options to have these transmissions do whatever it is you want. You don’t have the versatility of these transmissions and you can’t beat the support we’re getting from our Roadranger representative to help accomplish that. Eaton will absolutely be a part of our future new truck orders here.”
-Dave Jackson, co-owner, Redbank Transport

Shamco, Inc.
Location: Upper Peninsula, MI
Application: Logging
Transmission(s): RT-18, UltraShift PLUS
Benefits: Maneuverability, driver comfort, high GCW capability
“Our trucks operate through rough off-road conditions that include sand, gravel, mud and snow. Not only do our drivers deal with these extreme conditions, they also interact with often times Mother Nature throwing them at them. The UltraShift PLUS helps them handle this difficult terrain so that they can concentrate on the task of delivering their load safely. The transmission also reduces stress and fatigue on the driver after a long day of hauling wood.”
-Scott Shamion, co-owner, Shamco, Inc.

Fleets getting the job done.
