Eaton's Arrow Hart Commercial buildings line card

Surge protection receptacles

- Provides point of use protection for sensitive electronics
- Available with LED indication, audible alarm and isolated ground options
- Tamper Resistant (TR) for 15A & 20A 125 V/AC applications

Heavy-duty commercial grade receptacles

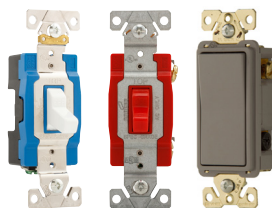

- Federal Specification (FedSpec) listed for maximum durability
- Eaton exclusive 5-leaf contacts for better plug retention after repeated use on extra heavy-duty models
- Available in standard duplex and decorator styles to meet any design aesthetic

Controlled receptacles

- Dual or half control options
- NEMA-approved and NEC-compliant "controlled" marking on face of the receptacle
- Multiple styles and color options available

Heavy-duty commercial grade switches

- Designed for easy installation to save time and labor
- Robust construction for long-term use and performance
- Specialty locking switch and illuminated options available

Slim GFCI receptacles

- Slim design for easy installation, leaving more room for wires in the box
- Intuitive LED status indicators for trip and end of life states
- Wider TEST/RESET buttons make it easier to test and reset
- FedSpec Certified (20A)

USB receptacles

- Fast, convenient charging of portable electronic devices without bulky adapters
- Type A & C styles with up to 5A or 60W charging capabilities.
- Replaces a standard receptacle with no additional wiring

Heavy-duty plugs and connectors

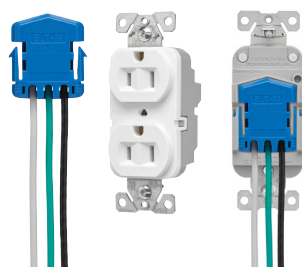

- Locking and straight blade design styles provide safe and secure connections
- Wide range of grip styles for any high use application
- Perfect for maintenance and repair or building customer cord sets

Lighting control solutions

- Occupancy and Vacancy sensors to help meet energy efficiency goals
- High wattage and dual rated universal load dimmers
- Dimmer sensors combine dimming, switching and motion sensing

EZ Link modular devices

- Increase productivity
- Addresses needs to meet deadlines and budgets
- Revolutionary design
- Fast to the Finish
