

# Durable, efficient and safe industrial solutions

Wiring devices built to last

## Superior performance in tough industrial environments

Our Arrow Hart wiring devices are designed to provide installation efficiency with workhorse performance. Ideal for OEMs that need trouble-free wiring solutions for manufacturing equipment, our extensive breath of line is suitable for a variety of applications and environments to help to optimize operational performance, lower costs and increase energy efficiency.

From motor controls and industrial switches to extra heavy-duty receptacles, plugs and connectors, our code-compliant industrial products feature innovative designs for quick and easy installation.

# Eaton's Arrow Hart

## Industrial manufacturing line card

### IEC pin & sleeve devices

- Extra heavy-duty, corrosion resistant construction to resist physical and chemical abuse
- Built on IEC 60309 standard
- Full offering of plugs, connectors, receptacles and inlets up to 100A

### Locking devices

- Industry-first color coding for voltage on full range of 20A and 30A ultra grip locking devices
- 50A non-NEMA California Standard locking devices
- Easy to assemble features for quick installation on new or existing equipment

### Weatherproof covers

- Extra-duty While-in-Use covers provide NEMA 3R protection
- Self-closing designs provide superior protection in wet and damp locations
- Available in aluminum, polycarbonate and glass-reinforced nylon

### Protection receptacles

- GFCI receptacles comply with latest standards and self-test requirements
- Surge receptacles provide point of use protection for sensitive electronics
- Isolated ground and audible alarm options also available

### Extra heavy-duty plugs and connectors

- Extra heavy-duty designs for long-life and quick installation
- Wide range of grip styles for any high use application
- Perfect for maintenance and repair or building custom cord sets

### Motor controllers & industrial switches

- Non-fused 30, 60 and 100 Ampere motor control disconnect switches
- Stainless steel X-Switch and non-metallic disconnect switches with compact mounting footprint
- Optional auxiliary contacts for PLC and VFD applications
- Industrial grade toggle switches for fractional horsepower motor loads

### Complex environments

- Full line of Watertight locking and straight blade devices rated to NEMA 4X and IP67
- Corrosion resistant devices feature robust materials for environments with harsh chemicals
- Weather protective boots available for standard plugs and connectors

### Wire mesh grips

- Strain Relief, Support, and Pulling grips available in a wide range of styles and sizes
- Deluxe grips feature NPT threading for easy installation on enclosures
- Lace-up and rod attachment styles for existing cable runs

### Extra heavy-duty grade receptacles

- Eaton exclusive 5-leaf contacts for better plug retention after repeated use
- Glass-filled nylon construction for maximum durability
- Available in standard duplex, decorator and single receptacle styles
