Foreseeer Electrical Power Monitoring Software (EPMS)

Product snapshot

Foreseer® is a highly customizable web based software platform that has been in production for over 25 years and used by many customers worldwide to monitor, trend, analyze, predict, and store data.

Foreseer supports monitoring of systems such as:

- **Power**
  - Electrical distribution equipment (SWGR, SWDB, panels) power meters, branch circuit monitors, trip units, protective relays, UPS, generators, PDU, RPP, CRP, ATS, STS, VFD, and PLC.

- **Environmental**
  - HVAC, chillers, pumps, condensers, temp/humidity, flow, and chilled water.

- **Systems and Sub-systems**
  - BAS, leak detection, fuel management, battery monitoring, security, fire suppression, weather monitoring, and photovoltaic systems.

- **WAGES**
  - Water, Air, Gas, Electric, and Steam

Product overview

Foreseeer open communications 64 bit architecture supports

- Polling and logging all integrated systems, devices, and parameters up to once per second
- Vendor-neutral software with an extensive library of device drivers available
- ModbusTCP or RTU, BACnet IP, OPC, LON, SNMP, proprietary protocols and others upon request
- Each server can support up to 5,000 devices or 500,000 channels
- Dashboard, device, single line, and floor plan WebViews
- Email alarm notifications and standard reports

Support available for:

- Dynamic one-line diagrams
- True redundancy or high availability
- Full graphics editing with web editor’s software
- Manager of Manager (MOM) for expansion beyond 5,000 devices and 500,000 channels
- Data Acquisition Engine (DAE)
- Sequence of events recorder with 1msec precision
- Onsite or offsite instructor led training
- Customizable customer care agreements for software, hardware, or onsite engineering
- Engineering, hardware, project management, driver development, custom graphics development, system architecture and contractor drawing packages, and turnkey installation
Minimum hardware requirements
To run Foreseer, you’ll need a server class machine with a minimum of two quad-core processors, 16GB of RAM, and 100GB of free drive space.

Supported operating systems

<table>
<thead>

Protocols supported
- ModbusTCP or RTU
- BACnet IP
- SNMP
- OPC
- LON
- INCOM via Power Xpert® gateway
- Proprietary
- Others by request

Supported interfaces to Building Automation System (BAS), Building Management System (BAS), Data Center Infrastructure Management (DCIM), and other integrated systems
- OPC gateway
- ModbusTCP gateway
- BACnet gateway
- SNMP gateway
