One-stop solutions from Eaton

Your challenges are our challenges

The fact that customers in the field have increasingly higher expectations is making the complexity of operational solutions grow greater by the minute. This means that whether you are a machine and system manufacturer, a panel builder, or a direct user, you share a common goal: having a contact that not only can meet your specific needs, but that can also provide unparalleled project support!

Eaton is a global company that is engaged in the field of power management and is perfectly positioned to provide the custom-tailored solutions you want. Our engineering know-how, combined with our products and services, is the answer to your needs.

Eaton's Application Engineering team offers unrivaled support in areas such as automation, drive, and control engineering. By working closely together with you, we will make your challenges our own and flesh out the perfect solution for your application.

If you need assistance solving your challenges, simply contact us!

Powering Business Worldwide

Creating value together

Bring solutions to life with Eaton as a partner

In today's world, users are not just looking for components. Instead, they are looking for solutions for their specific needs. That is exactly where Eaton's Application Engineering team comes in.

Application Engineering uses Eaton components as a basis in order to develop solutions designed to meet specific needs.

As a partner, Eaton is not only able to provide you with extensive support, but is also in a position to enable you to use your resources efficiently. You can rest assured knowing that you will get expert assistance all the way from your starting needs to the moment your solution is commissioned. That is what we call creating value!

We offer:

- Custom-tailored solutions
- Project planning for whole projects and subprojects
- Development services for solutions for standard machines
- Commissioning
- Decades of application know-how

Does this sound interesting to you?

Do you need support?
